UPDATE OF ACTIVITIES WITHIN APEC

ASIA-PACIFIC ECONOMIC COOPERATION

November 2000
Foreword

Welcome to our third and final edition for 2000 of the Update of Activities within APEC.

This issue provides a status report on key APEC projects and areas of activity as we approach the lead-up to the annual meetings of APEC Ministers and Economic Leaders to be held this November in Brunei Darussalam.

The theme adopted for the year of “Delivering to the Community” is reflected strongly in the achievements recorded across all areas ranging from activities focused on improving market and trading conditions and addressing the challenges and opportunities presented by new technologies, through to those supporting the development of human resources or improving the flow of information to business and other sectors of community.

Update provides summary information on an increasingly extensive range of APEC programmes and initiatives. We remind readers that the main APEC website at www.apecsec.org.sg provides a continuously updated and comprehensive reference point for those interested in tracking issues and developments more closely. A series of APEC fora websites are also maintained and readily accessed from the main site, to serve industry, sectoral and other specialised interests. Major improvements are planned for the main website later this year to further enhance delivery of online information to our audiences.

We also recommend our readers visit the Brunei APEC 2000 website at www.apec2000.gov.bn for further detailed information on the meetings in Brunei and associated events for the remainder of the year 2000.

Ambassador Serbini Ali
Executive Director
APEC Secretariat, Singapore

### Abbreviations ..................................................................... 53
The following highlights a selection of APEC projects undertaken during the year together with progress reports on the “Priority Projects for 2000” endorsed by Ministers and Leaders at their meeting in September 1999 in Auckland. For more information on the various APEC activities, readers are invited to visit APEC’s Project Database at the APEC website at http://www.apecsec.org.sg in the section ‘Database.’

**ECOTECH Information Clearing House (ESC/01/2000)**

The ECOTECH Clearing House is a web-based facility to enhance information flows between the identification of ECOTECH needs within APEC and the capacity to provide appropriate expertise to meet those needs. Phase 1 of the ECOTECH Clearing House is now complete and operational at http://www.apec-ecotech.org. Phase 2 of the Clearing House will be completed in time for an official launch of the site at the Leaders’ Meeting in November 2000. Phase 2 extends the functionality of the Clearing House to:

- allow users to register on the Clearing House, describe their areas of interest and then receive automatic email notification whenever new information, which matches their interests, is added to the Clearing House,
- include an electronic notice-board to support the initiation of economic and technical cooperation partnerships. The notice-board will enable Senior Officials/ESC contacts, Working Group/Fora members, development agency personnel, business/private sector contacts, researchers and academics etc to discuss opportunities to work together on cooperation activities,
- facilitate the survey of members of the economic and technical cooperation community,
- enable communication exchange on areas of requirement and corresponding areas of expertise.

**Electronic Individual Action Plan (e-IAP)**

The Electronic Individual Action Plan (e-IAP) is an interactive web-based system that enables the efficient preparation, presentation and use of Individual Action Plans, the core mechanism by which APEC member economies use to demonstrate their commitment towards achieving the Bogor goals of free and open trade and investment in region. The delivery of the e-IAP responds to the APEC Business Advisory Council (ABAC)’s recommendations for IAPs to be more transparent, specific and comprehensive. Initial reactions to the new system from the business community have been strongly supportive. The e-IAP is also an excellent example of APEC collaboration with the private sector as the software development work of the system is being sponsored by Microsoft. A demonstration of the e-IAP will be given at the November Ministerial Meeting and thereafter will be accessible on-line through the APEC Secretariat Homepage as a trial site until November 2001 when it will become fully operational.

**Cooperation Framework for Strengthening Economic Legal Infrastructure**

A Cooperation Framework for Strengthening Economic Legal Infrastructure has been developed this year to clarify the future course of cooperation in the area of strengthening economic legal infrastructure in APEC. Briefly, it proposes to concentrate future work in this area on three broad topics: (i) corporate law; (ii) competition policy; and (iii) capacity and institutional building, including training of legal professionals.

**Capacity Building Measures – APEC’s Contribution to the World Trade Organisation (WTO)**

A strategic plan to build capacity in APEC to implement WTO agreements has been developed. This strategic plan aims to provide tailor-made packages of technical assistance for developing APEC economies that will facilitate their ability to implement WTO agreements. A questionnaire has been distributed to all economies to survey the needs of APEC developing economies, to enable an analysis and evaluation of existing international cooperation schemes in order for a strategic plan to be developed for improved coordination and effectiveness of capacity-building activities. In 2001, APEC will actively explore initiatives to implement the strategic plan.

**APEC Investment and Competition Policies Seminar**

In conjunction with the third ABAC meeting of the year, Peru also hosted the First APEC Investment and Competition Policies Seminar in Lima, 23 August 2000. The seminar, launched under Japan’s initiative, brought together experts from APEC ministries, business, academia, and the World Trade Organization to examine investment trends in APEC, discuss an investment framework in the region, and analyze competition policies and their impact on trade and investment. Well over 120 attendees participated in this very successful session.

**Regional Integration for Sustainable Economies (RISE) Project**

The joint APEC-PECC-private/public sector initiative Regional Integration for Sustainable Economies (RISE) is a multi-faceted project encompassing not only improvement of rural infrastructure, but also the dissemination of technological advances in food production and processing, and fostering of sustainable growth. Pilot scale work with regional growth centres (RGCs) in Jiangmen (China) and Manado-Bitung (Indonesia) has commenced with a view to improving holistic regional development plans. The project will comprehensively and efficiently provide rural-urban infrastructure links, vertically integrate production and trade schemes and provide infrastructure support, including basic social infrastructure in rural areas. It has built close cooperative links

**Selected APEC Achievements for 2000**

Continued on page 6
between the public and private sectors, and drawn support from major institutions including the Asian Development Bank and the World Bank. Further information on the RISE initiative can be obtained from its website http://www.riselink.net/

**Information Sessions for APEC Fora on Gender Analysis and the Application of the Framework for the Integration of Women in APEC**

The Framework for the Integration of Women in APEC was developed to assist APEC to achieve goals for effective policies and activities, to strengthen horizontal linkages across APEC, and to promote a common understanding of how the goals of gender integration can be achieved. This project proposal addresses one element of the Framework's implementation: the provision of information sessions for APEC fora on gender analysis and on the application of the Framework. The project aims to develop capacity within APEC working groups, task forces and committees to apply the elements of the Framework; develop better understanding among members of APEC fora of gender analysis and why it is an important tool for improved policy and project outcomes; identify and train a pool of gender specialists in the Asia-Pacific region to serve as trainers and experts for APEC fora; and develop both a format for information sessions that can be adapted to each APEC forum, and specific training material that will be provided to all APEC fora.

To date, information sessions have been provided to 12 APEC fora, Senior Officials Meeting(SOM) and the APEC Secretariat. Work is also underway on compilation of best practices on gender integration in APEC fora and economies and a project on sex-disaggregated data.

**APEC Workshop on Public Sector Management**

This workshop was aimed at enhancing the capability of APEC economies to address public sector governance issues, with, inter alia, a focus on public sector financial management, through cooperation within APEC and leveraging off the efforts of other international organisations. Other public sector reform topics covered included: civil service reform; the future of e-government; productivity; and accountability and regulatory reform. The Workshop on Public Sector Management was held on 9-11 May, in Singapore involving participants and speakers from 13 APEC economies.

**Trade Facilitation Workshop**

A Workshop on Trade Facilitation: New Directions and the Development Challenge was held 13-14 September in Singapore. The Workshop identified effective measures for action in four areas: a) regulatory reform and standards; b) customs procedures; c) mobility of business persons and professional accreditation; and d) electronic commerce as a mechanism of trade facilitation. The following conclusions were drawn:

(a) APEC should conduct more coordinated work in the area of Trade Facilitation;
(b) APEC should increase business participation in all trade facilitation efforts;
(c) APEC needs to better communicate its trade facilitation work to the business sector; and
(d) APEC's work in trade facilitation was well suited for technical assistance, particularly in the areas of customs, standards, business mobility and e-commerce.

**APEC Pension Fund Reform Seminar (FIN 01/2000)**

This is part of a continuing series of regional seminars on pension fund reform. The seminars focus on such issues as individual policies, the costs of the transition from public to private systems and their possible financing, the role of specialized institutions in pension fund administration and the performance of the public sector as a safety net provider. This year's seminar was held on 30-31 March in Bangkok, Thailand.

This seminar was intended to improve the quality of domestic level training programs for securities regulators and ensure that core curricula and international best practices and standards are being incorporated into domestic banking supervisors’ training programs. The seminar was held on 6-8 March in Kuala Lumpur, Malaysia.

The purpose of this seminar was to assist senior bank supervisors, central bank regulators and financial supervisory authorities to assess the components of an effective supervisory/regulatory framework as well as new techniques in the field. It also enabled participants to review the methodologies for implementing the core principles of effective banking supervision; to consider the new Basel Capital Accord and determine best practices for effective bank supervision. The seminar was conducted in June 2000.

**Publications**

A number of significant reports have been published this year including:

- *APEC Economies beyond the Asian Crisis*, which highlights the factors shaping the future of APEC economies, outlines likely scenarios for growth and trade in the APEC region, and sets out broad policy directions to achieve sustainable growth and equitable development;
- *Towards Knowledge-based Economies in APEC*, which provides the analytical basis useful for promoting the effective use of knowledge, and the creation and dissemination of knowledge among APEC economies;
- *2000 APEC Economic Outlook*, which reviews economic conditions in the APEC region, and discusses a particular topical structural issue which, for this year, is on the issue of regionalism.
I. ACTIVITIES OF APEC FORA

Committee on Trade and Investment

The Committee on Trade and Investment (CTI) was established by the Declaration on an APEC Trade and Investment Framework in November 1993.

The CTI coordinates APEC’s work on the liberalization and facilitation of trade and investment (refer to the Bogor Declaration 1994). It works to reduce impediments to business activity in 15 specific areas as outlined in the Osaka Action Agenda (OAA): tariffs and non-tariff measures; services; investment; standards and conformance; customs procedures; intellectual property rights; competition policy; government procurement; deregulation; rules of origin; dispute mediation; mobility of business people; and implementation of WTO obligations.

CTI also provides a forum for discussion of trade policy issues. Activities in CTI’s 14 work areas are outlined under the relevant sections in the Update.

Business and Private Sector Participation

The CTI engages in regular outreach efforts to business via the APEC Business Advisory Council and more directly through seminars, speeches, the Internet, publications, and media relations. The Pacific Economic Co-operation Council (PECC) regularly attends CTI meetings, providing analytical and business input. The private/business sector plays a key role in technical work areas (for example, standards and conformance) by providing specialized input.

Achievements

During 2000, the CTI intensified its implementation and enhancement work on the Collective Action Plans (CAPs), making significant progress towards the OAA objectives and Bogor goals in response to Leaders’/Ministers’ instructions (Major individual achievements are outlined under the relevant sections.) In addition, CTI:

- pursued all aspects of the work program on the Individual Action Plan (IAP) review; including the development of the electronic prototype IAP (e-IAP) system; the review and development of OAA/improved guidelines for use by member economies to show how they intended to achieve Bogor goals; and the improvement of the peer review process;
- continued to play a coordinating role in carrying forward the work programs of the non-tariff elements of Early Voluntary Sectoral Liberalization (EVSL);
- led the development of a strategic plan to build capacity in APEC to implement WTO agreements;
- progressed work on strengthening markets through the implementation of relevant elements of the Road Map; and
- intensified efforts in trade facilitation, including drawing up a list of core elements of the trade facilitation principles that would form the basis for further development of a set of APEC non-binding principles on trade facilitation.

Next Steps

The CTI will continue to implement, improve and expand CAPs, as envisaged in the OAA.

Tariffs and Non-Tariff Measures

Tariffs and Non-tariff Measures (NTMs) are two of the 15 specific areas under the CTI as outlined in the Osaka Action Agenda through which APEC member economies are working to eliminate tariff and non-tariff barriers to trade. Member economies are committed to creating a region of free and open trade and investment no later than 2010 for industrialized economies and 2020 for developing economies.

A new Market Access Group (MAG) was established in 1998 to handle the CTI’s work on tariffs and NTMs.

The Collective Action Plans for Tariffs and NTMs require APEC members to keep the data in the computerized tariff database (APEC Tariff Database) up-to-date; pursue incorporation of information on NTMs into a future version of the APEC Tariff Database (TDB); compile a list of measures recognized as non-tariff impediments to trade; compile a list of products affected by those impediments; and identify industries in which the progressive reduction of tariffs and NTMs may have a positive impact on trade and economic growth in the Asia-Pacific region, or for which there is regional industry support for early liberalization.

In February 2000, CTI instructed MAG to explore ways to broaden and deepen the collective action plans on NTMs, coordinating and following the progress of the NTMs component of the EVSL, and positively contributing to WTO’s future negotiations on tariffs and NTMs.

Business and Private Sector Participation

APEC member economies consult their private sectors regularly. Business views have been incorporated in the development of the TDB, which is sponsored by the private sector (Federal Express).

Business and academia provide important input to the CTI’s work on tariffs and NTMs, particularly through the analytical work performed by PECC. Businesses that would like to become more involved in the CTI’s work on tariffs and NTMs should contact the APEC office in their member economies. (See page 51 for member economies’ contact information.)

Achievements

- Consulted EVSL sectoral coordinators on NTMs identified through their respective sectors’ work programme, and developed a list of generic NTMs for MAG’s consideration on progressing its NTM work programme.
- Discussed a follow-up work mechanism to progress EVSL NTMs work.
- Requested members to provide regular updates of tariff information as changes occur, and provide annual updates of trade and other agreed data to the APEC Tariff Database (TDB) Manager.
- Submitted contact details/website addresses to the APEC Secretariat for forwarding to the TDB Manager.
- Requested members to provide the WTO Secretariat with tariff and trade data annually in accordance with WTO obligations.
- Liaised with the WTO Secretariat on the possibility of conducting a second seminar on WTO Integrated Database in February 2001.
- Developed improved format for the tariffs chapter of the IAP for use as the e-IAP template for reporting progress on liberalisation in tariffs by member economies.
- Developed improved format for the NTMs chapter of the IAP for use as the e-IAP template to enhance transparency of NTMs and for reporting progress on their reduction.
- Undertake a stock-take of work in the NTMs area by various fora, including identifying types of NTMs, with a view to intensify work on reducing NTMs.

Next Steps

- Review the Terms of Reference of the MAG in both tariffs and NTMs area with a view to provide clearer guidance on the roles and functions of the group.
- Undertake study in the tariffs area with respect to trade data and tariff information, including issues of particular interest to developing member economies, with a view to build capacity to participate in the WTO negotiations.
- Develop improved format for the tariffs chapter of the IAP for use as the e-IAP template for reporting progress on liberalisation in tariffs by member economies.
- Develop improved format for the NTMs chapter of the IAP for use as the e-IAP template to enhance transparency of NTMs and for reporting progress on their reduction.
- Undertake a stock-take of work in the NTMs area by various fora, including identifying types of NTMs, with a view to intensify work on reducing NTMs.

Services

The Group on Services (GOS) was established by the CTI as an informal subgroup in 1997 to address the TILF tasks in the area of services as mandated in the Osaka Action Agenda and instructed by Leaders, Ministers, SOM and CTI. Since 1997, the GOS has held 13 meetings, with the last one held in Bandar Seri Begawan, Brunei Darussalam on 17-18 September 2000. The current Convenor of the GOS is Chinese Taipei.

In addition to the continuous progress on various CAP items, including information gathering and analysis, experience sharing and transparency, the GOS completed in 2000 the development of a broader policy framework for APEC work on services, which is a task commenced in 1999 pursuant to the mandate of the CTI. The Policy Framework to be adopted takes into account the cross-cutting nature of service work and therefore facilitates better organization of APEC services work and better coordination of APEC service-related fora/sub-fora.

To implement the Policy Framework, the GOS also accomplished Phase I of the “Menu of Options for Voluntary Liberalization, Facilitation and Promotion of Economic and Technical Cooperation in Service Trade and Investment” in 2000, which presents a better organized framework for GOS’ future work and also provides concrete elements for individual member economies to adopt for advancing their services work.

1. Collective Actions Achieved

- Assisted the development of service chapter template for the Prototype Individual Action Plan (IAP), which will improve information gathering and analysis of the services section of IAPs after member economies start using the template to report their services IAPs.
- Implemented a project on the identification of measures affecting trade and investment in education services, with participation of volunteer member economies.
- Identified measures affecting trade and investment in service sectors other than education services, such as telecommunication services, tourism services, financial services and distribution services, through the process of case presentation by volunteer member economies as well as the process of consultations by the Convenor with other service related fora for issues requiring the latter’s expertise, e.g. consulting with the CPD, SCCP, and TPTWG for issues of air courier services.
- Held a Seminar of Statistical Reporting on Service Trade, which built up the partnership between services authorities and statistic authorities of member economies and complemented the international efforts to improve statistical reporting on service trade for more accurate assessment.
- Improved the understanding of the impact of the liberalization of financial services, telecommunications, tourism services as well as services as a whole by voluntary experience sharing among member economies.
- Pursuant to CTI’s instructions, supported the ongoing EVSL initiatives by completing the initial assessment on services component of the environment EVSL.
- Improved the dissemination of GOS activities-related information by better organizing the contents of the existing GOS web page on the APEC Secretariat website and providing useful links to other service-related sites, aiming to enhance transparency in services sectors.
- Supported the development of the possible APEC Trade Facilitation Principles by suggesting the elements to be incorporated therein for services trade and organizing a service-trade facilitation workshop to generate more valuable inputs.
- Monitored the development of the WTO negotiation on environmental services with an aim to assist the process where possible and appropriate.
- Contributed to the WTO’s work on services as a whole by discussion of “innovation in services” and a Study on Possible Economic and Technical Cooperation in the Field of Trade in Services, both of which could enhance the capacity of developing member economies to compete effectively in global service market and therefore promote their active participation in WTO service work.
- Developed a broader policy framework (Policy Framework for Work on Services) to strengthen APEC’s work in the service area.
- Completed Phase I of the “Menu of Options for Voluntary Liberalization, Facilitation and Promotion of Economic and Technical Cooperation in Service Trade and Investment.”

2. New Collective Actions Agreed

- Implement the Policy Framework for Work on Services.
- Complete Phase II of the Menu of Options and develop a project to support Phase III of the Menu.
- Promote the use of service chapter template of the Prototype IAPs for services IAP reporting.
- Propose a study on the impact of service trade liberalization on developing economies in this region.
- Build up APEC support for WTO’s work/negotiations on services trade.
- Continue the ongoing work under existing CAPs, including improving the understanding of the impact of the liberalization of services trade by voluntary experience sharing among member economies.
- Explore the possible best practices in innovation in services that could help build capacity in developing economies.

3. Benefits and Beneficiary

The Policy Framework for Work on Services to be adopted will ensure that APEC’s work on services, in pursuit of the Bogor goal and in compliance with Osaka Action Agenda, delivers focused and outcome-oriented results in

Continued on page 4
an effective and efficient manner. Meanwhile, the Framework will build up closer inter-relationship of the GOS with other service-related fora, which will integrate different efforts in advancing APEC services work and produce coherent services work programs for APEC. In addition, the Framework can provide the public with a clear and comprehensive picture of APEC’s work in the services area.

The GOS’ Menu of Options under development will better organize the GOS’ current and future work and facilitate more efficient operation of the GOS. It can also facilitate the IAP process for it will provide concrete elements for individual member economies to adopt based on the need of each economy, in advancing their work on three-pillars for service trade and investment.

The Project on the Identification of Measures Affecting Trade and Investment in Education Services will enhance transparency in the area of education services and also increase the understanding of impact on liberalization of such sector. As a result, government bodies, education services providers and recipients of education services can all benefit from the information and analysis provided in the outcome of the project.

The Seminar of Statistical Reporting on Service Trade increases dialogue between service trade and statistic authorities of member economies and promotes members’ awareness of the importance of service trade statistics. It also increases transparency by directing the way to interpret services trade statistics in light of the limits current statistics have. Government bodies that are directly involved in statistics reporting and analysis as well as in service trade policy making, and the private sector, like service suppliers and consumers, will benefit from the seminar for its contribution to the international efforts towards better and more detailed services trade statistics.

The Study on Possible ECOTECH in the Field of Trade in Services will benefit government officials, responsible for policy-making in the field of trade in services, in both developed and developing economies in the APEC region. The study can enhance the understanding of the technological development needed by developing economies in the APEC region for their service trade.

The 2000 Service Trade Facilitation Workshop can enhance the understanding of importance of facilitation in service trade and investment. It will also contribute to the development of APEC Trade Facilitation Principles.

All of the above collective actions also add “APEC value” to the WTO services work for their implementation. They either complement on-going WTO services negotiation, work in progress or increase APEC members’ capacity for full participation in the WTO process.

Enhancement of information dissemination by improving and better utilizing the GOS web page at the APEC Secretariat’s website will increase transparency and make the information flow among members more efficient. The collective action can also facilitate the dialogue of the GOS and other service-related fora to improve coordination. In addition, the service industry and general public will also benefit as they can be better informed of the GOS work and therefore may provide feedback to GOS.

Next Steps

For 2001, the GOS will endeavor to develop Phase II of the Menu of Options and continue contributing, where possible and appropriate, to the WTO’s work on services, particularly in the on-going negotiation.

Achievements

- Completion of the development of APEC Policy Framework for Work on Services.
- Completion of Phase I of the development of the Menu of Options for Voluntary Liberalization, Facilitation and Promotion of Economic and Technical Cooperation in Service Trade and Investment.
- Identification of Measures Affecting Trade and Investment in Education Services.
- APEC Seminar of Statistical Reporting on Service Trade.
- Study on Possible Economic and Technical Cooperation in the Field of Trade in Services.
- Enhancement of information dissemination by improving and fully utilizing the GOS web page at the APEC Secretariat website.
- Addition of CAP item, that is, the Menu of Options for Voluntary Liberalization, Facilitation, and Promotion of Economic and Technical Cooperation in Service Trade and Investment.
- Recommendation for possible inclusion into 2000 APEC Ministerial Declaration on APEC’s contribution to the WTO services.

**Investment**

The Investment Experts’ Group (IEG) is a sub-group of the APEC Committee on Trade and Investment (CTI). It was established in 1994 to bring together officials in the region involved in the regulation of foreign investment. Its main role is to assist the CTI in achieving the investment-related components of APEC’s liberalization and facilitation agenda.

**Business and Private Sector Participation**

The IEG seeks views from the private/business sector about priorities for APEC’s investment liberalization and facilitation agenda through its annual Investment Symposium and Business Survey. Business people were also invited to participate in the 1st APEC Investment Mart held in Seoul, Korea in June 1999.

**Achievements**

Major achievements in 2000 include:

- Held policy discussions to review the investment regimes of Papua New Guinea and Russia (March 2000); Brunei and Japan (May 2000); and Thailand (September 2000).
- Conducted the second/third phase of the awareness program for APEC investment/trade officials to understand and be informed of the various options for investment liberalization and business facilitation.
- Conducted the 5th APEC Investment Symposium in China in March 2000.
- Initiated discussions on start-up companies and venture capital.
- Agreed to make cross-reference between IAPs and Menu of Options.
- Finalized the new e-IAP chapter format on investment.
- Developed the Menu of Facilities offered in a one-stop agency.

**Next Steps**

- Organize the 6th APEC Investment Symposium in Korea in 2001.
- Organize the 2nd APEC Investment Mart in China in 2001.
- Update the Menu of Options.
- Consider expanding the Menu of Options.
- Consider possible cooperation with the International Institute for Management Development (IMD) on surveying investment environments.

Standards and Conformance

The CTI Sub-committee on Standards and Conformance (SCSC) was established by the Declaration on an APEC Standards and Conformance Framework (November 1994).

The principal objectives of the SCSC are to: encourage alignment of members’ standards with international standards; achieve mutual recognition among APEC economies of conformity assessment in regulated and voluntary sectors; promote cooperation for technical infrastructure development in order to facilitate broad participation in mutual recognition arrangements in both regulated and voluntary sectors; and ensure the transparency of the standards and conformity assessments of APEC economies.

Business and Private Sector Participation

Representatives from Specialist Regional Bodies are invited to SCSC meetings, and business people also attend SCSC meetings. In 2000, SCSC has developed a work program on trade facilitation in information technology products in collaboration with the Information Technology Industry Council (ITI).

Achievements

Highlights of TILF Outcomes in 2000:

- Endorsement of Principles and Features of Good Practice for Technical Regulation and Information Notes on Good Practice for Technical Regulation
- [Adoption] of a work program on trade facilitation in information technology products developed in collaboration with the ITI.
- Completion of a comprehensive review of progress on alignment with international standards in the four priority areas
- Review of the APEC Mid-Term Technical Infrastructure Development Program (to be completed by February 2001)
- The 3rd APEC Conference on Standards and Conformance (September 2000, Bandar Seri Begawan)
- Completion of APEC Expert-Trainers-Executives Workshops on International Quality Assurance System for SME Competitiveness and publication of the Standards-Based Management for Enterprise Competitiveness Handbook
- Publication of a research on food labeling laws, regulations and standards in APEC member economies.

Next Steps

The SCSC will continue to implement and improve CAPs in the area of standards and conformance. SCSC’s future work program includes:

- alignment work with international standards in the additional priority areas related to standards and guides on conformity assessment and management systems by 2002/2005 as well as safety of information technology equipment by 2004/2008;
- revision of the APEC Mid-Term Technical Infrastructure Development Program; and
- compilation of member economies’ regulatory profile of the food/drug interface.

Customs Procedures

The Customs Procedures Group of Customs Experts was converted into a formal CTI Sub-committee on Customs Procedures (SCCP) in 1995. Its objective is to facilitate trade in the Asia-Pacific region by simplifying and harmonizing customs procedures.

Business and Private Sector Participation

Private sector representatives such as customs brokers, importers, exporters, freight forwarders and business people have attended the APEC Customs-Industry Symposia held annually since 1993.

The 1st Business Outreach meeting of 1999 was held in Wellington on 5 February 1999. It was organized by SCCP, the New Zealand Institute of Management, and the Wellington Chamber of Commerce. This event included a workshop on ‘Future Customs Procedures throughout APEC’.

The Australian business sector is supporting the Sub-committee’s Temporary Importation CAP. Federal Express has agreed to continue the sponsorship of the APEC Tariff Database.

Joint activities are carried out with the business/private sector to support SCCP’s work programme, for example, on Temporary Importation.

Achievements

The Simplification and Harmonization of Customs Procedures initiative has already resulted in significant cost savings for exporters and importers. Among other outcomes, the SCCP is promoting risk management techniques to APEC Custom administrations to enable them to better target enforcement efforts and facilitate the movement of low-risk shipments and ‘paperless trading’ in the region. Other achievements include:

• The development of better tools for forging strategic partnerships with the business/private sector and exploring possible partnerships with the private sector to progress the work on its CAPs.
• About half of the SCCP’s Collective Action Plan work programmes on important customs areas such as WTO Valuation, WTO TRIP Agreement (on border controls), Clear Appeals Provisions, Advance Classification Ruling, Temporary Importation and Express Consignment will be completed by this year.
• Peru, Russia and Viet Nam became full APEC members in 1999. In response to their needs, the SCCP is considering issues on timeframes and schedules for technical assistance for our new members.
• SCCP has included ‘paperless trading’ as a new work area for collective action. As electronic commerce rapidly spreads to all sectors of economic activity and regions in the world, the SCCP felt incumbent that it should build upon existing infrastructure and explore modern technologies to further lower transaction costs for business, including SMEs. The SCCP has also embarked on a timely task of developing an assessment approach to measure the effectiveness of its work programme, in particular its comprehensive technical assistance programme, which was first developed five years ago. In addition, the SCCP has developed plans to improve the levels of ‘Integrity’ in Customs Administrations, a collective action newly introduced last year.

Next Steps

The SCCP will continue to implement and improve the Collective Action Plans in the areas of customs procedures. Future SCCP work programs include:

• Improving direct involvement of the business/private sector in SCCP activities.
• Publishing the 2000 and 2001 Blueprint for APEC Customs Modernization.
• Continue promoting and facilitating ‘paperless trading’.

• Developing a proposed work program on ‘Integrity’ which was elevated to CAP status at the end of last year.
• Developing proposed Best Practices Handbook on Express Consignment Clearance.
• Development of an Assessment/Evaluation Approach to measure the implementation of SCCP CAPs and cargo release time.

Intellectual Property Rights

The Intellectual Property Rights (IPR) Experts’ Group (IPEG) has carried out a work program since 1996 to achieve the planned Collective Actions as well as to enhance APEC-wide cooperation in the following areas: deepening the dialogue on intellectual property policy; surveying and exchanging information on the current status of IPR protection and administrative systems; studying measures for the effective enforcement of IPR; fully implementing the TRIPS Agreement no later than 2000; and facilitating technical cooperation to that end.

Business and Private Sector Participation

The IPEG seeks views from the private/business sector about priorities for APEC’s work on IPR through various symposiums. A contact list of public, business and private sector experts on IPR is available on the APEC Secretariat’s website at http://www.apecsec.org.sg.

Achievements

Key achievements of the IPR Experts’ Group for 2000 included:

• Joint Statement on the WTO/TRIPS Agreement Implementation. The IPEG members agreed on the draft of the Joint Statement on the WTO/TRIPS Agreement Implementation and it was adapted with some modifications at the Meeting of Ministers Responsible for Trade held in June 2000.

• APEC/IPEG Separate meeting on IPR Enforcement. APEC/IPEG Separate meeting on IPR Enforcement was held to exchange information relating IPR enforcement issues between the private and public sector in July 2000.

Next Steps

• A proposal for a range of best-practice for technical cooperation. Best-practice for technical cooperation will be sought to bring about full and sustained implementation of the WTO/TRIPS Agreement and ensure the development of the necessary skills in all APEC economies.

• Program on Public Education and Awareness. The IPEG members will undertake greater cooperation within the APEC region on the planning, development and delivery of public education programs concerning IP.

Competition Policy

The globalization of business has highlighted the importance of competition issues. APEC’s objective in this work area is to enhance the competitive environment of the region. In November 1994, APEC Ministers agreed that the Committee on Trade and Investment (CTI) would develop an understanding of competition issues, in particular competition laws and policies of economies in the region. They agreed that CTI should learn how competition laws and policies affect flows of trade and investment in the APEC region and identify potential areas of technical cooperation among member economies. In 1996, the Osaka Action Agenda work programs for competition policy and deregulation were combined, in view of the linkages between the two issues. The competition policy/deregulation work area is a key component of work in the “Building Strong Foundation” / “Strengthening markets” themes, promoted by the 2000/1999 APEC Chairs respectively. (See the Deregulation update)

Business and Private Sector Participation

Business and academia provide important input to APEC’s work on competition policy, particularly through the Pacific Economic Cooperation Council (PECC). Promoting dialogue with the business community on competition policy and regulatory reform remains a priority.

Achievements

Six annual workshops have been held, covering issues such as approaches and exemptions to competition policies and law; technical assistance; linkages between competition policy and trade policy; objectives and mechanisms of competition policy; the interrelationship between competition policy and deregulation; regulation of national monopolies; occupational regulation; and regulatory reform. The 6th workshop was held in Bandar Seri Begawan, Brunei Darussalam from 27-28 May. The workshop included presentations
Continued from page 8

by Hong Kong, China; Japan; Korea; New Zealand; Peru; United States; and the delegate from PECC on effective ways to implement the APEC Principles of Competition and Regulatory Reform. It discussed this theme, noting the importance of working jointly with other APEC fora and subfors, the private sector and academia in the implementation of the principles.

In year 2000, work focused on the implementation of the APEC Principles to Enhance Competition Policy and Regulatory Reform. The Principles provide a template for future work by APEC in developing competition policies and applying competition principles and frameworks across all sectors of APEC member economies.

The Group agreed on a Cooperative Initiative on Regulatory Reform with the OECD. The agreement is based on a series of related events in 2000 and 2001 that will focus on the exchange of information on good regulatory practices and concepts built around a common agenda established between APEC and OECD economies.

**Next Steps**

Work on Competition Policy for the next two years will focus on the implementation of the APEC Principles to enhance Competition Policy and Regulatory Reform, specific projects arising from the Principles as well as from the “APEC Competition Law for Developing Economies” study.

---

**Government Procurement**

The Government Procurement Experts’ Group (GPEG) was established in 1995. The Osaka Action Agenda of November 1995 commits APEC economies to “develop a common understanding on government procurement policies and systems” and to “achieve liberalization of government procurement markets throughout the Asia-Pacific region in accordance with the principles and objectives of the Bogor Declaration.”

**Business and Private Sector Participation**

Business people have attended GPEG educational programs.

**Achievements**

The GPEG:
- Has completed a set of non-binding principles on government procurement (GP) based on the free trade principles already embraced by APEC. These principles, endorsed by Ministers in Auckland in September 1999, include transparency, value for money, open and effective competition, fair dealing, non-discrimination, accountability and due process. In addition, the GPEG has developed practices illustrating how these elements could be implemented.
- Has contributed to the WTO’s study on Transparency in GP by providing the WTO information on APEC members’ GP regimes, commitments on GP in their individual action plans, and APEC’s views on several of the principles listed above.
- Has continued its educational programs with a February 1999 seminar, sponsored by New Zealand, on unilateral liberalization of GP and use of electronic tendering; and a July 1999 workshop on GP practices, sponsored by China. Earlier programs included a GP training program, a seminar on bid challenge systems, a seminar on existing international GP agreements, and a seminar on GP principles.
- Is updating the surveys that member economies completed on their government procurement systems and their publication arrangements for GP opportunities. These are available on the APEC GP homepage (http://www.apecsec.org.sg/govtproc/gphome.html) along with other information about GPEG activities.

**Next Steps**

Now that the GPEG has finished the full set of GP non-binding principles, GPEG members are reviewing their individual action plans regarding the consistency of their GP systems with the non-binding principles. Several economies have already carried out voluntary reviews before the GPEG, most recently Hong Kong, China; New Zealand; and Chinese Taipei. At the GPEG meeting held in Brunei Darussalam in September 2000, GPEG members also agreed that all members would voluntarily review their individual action plans with respect to the transparency meeting at the first GPEG meeting in China in 2001. Through this process, members are continuing to explore how best to implement the principles and voluntarily bring their systems into conformity with the principles. The Group will also continue its educational and information-sharing activities. It will also work more closely with other APEC groups, in particular the Electronic-Commerce Steering Group and the Policy Level Group on Small and Medium Enterprises, looking at a number of issues including paperless trading.

Deregulation

Unilateral deregulation by APEC economies makes an important contribution to trade and investment liberalization and facilitation. Transparency in regulatory regimes and the elimination of trade-impeding or unnecessarily restrictive regulations are the key objectives of APEC work in the deregulation area. This work is undertaken by the Committee on Trade and Investment (CTI). In 1996, the Osaka Action Agenda work programs for Competition Policy and Law, and for deregulation were combined, in view of the linkages between the two issues. (See Competition Policy update)

Business and Private Sector Participation

Business and academia provide important input to APEC’s work on deregulation, particularly through seminars and the analytical work done by PECC. Promoting dialogue with the business community on deregulation is a key focus for the future.

Achievements

The focus of the group remained on the promotion of information sharing and dialogue on deregulation issues through the annual Competition Policy and Deregulation Workshop. The group has also agreed to a Co-operative Initiative on Regulatory Reform with the OECD. The implementation of this joint program with the development of seminars will help enforce the Road Map initiative on “Strengthening Markets” through continued dialogue and sharing of experiences among economies from both fora dealing with the challenges of regulatory reform.

Next Steps

Apart from fulfilling the on-going objectives of promoting information sharing and dialogue and increasing transparency in regulatory regimes, work will continue to focus primarily on the implementation of the APEC Principles to Enhance Competition Policy and Regulatory Reform and specific projects arising from it.

Rules of Origin

The Rules of Origin (ROO) issue is covered by the CTI plenary. APEC member economies, through the CTI, will:

• gather information on APEC economies’ respective rules of origin and develop a compendium of rules of origin for the use of the business/private sector;
• facilitate, complement and accelerate, in the short-term, World Trade Organization/World Customs Organization (WTO/WCO) work on harmonization of non-preferential rules of origin; and
• study the implication of rules of origin on the free flow of trade and investment.

Achievements

Members agreed to use the more detailed format guidelines for ROO approved in 1997 to report on implementation of the procedural obligations of the WTO agreement on ROO in a manner aimed at establishing a more transparent and predictable ROO regime.

APEC Secretariat
Special Assistant to CTI Chair
Ms Catherine Wong
Director (Program)
E-mail: cw@mail.apecsec.org.sg

Next Steps

The CTI will continue its information exchange among member economies on rules of origin requirements, and assess APEC member economies’ compliance with the procedural obligations in the WTO Agreement on Rules of Origin.
Dispute Mediation

Trade and other economic disputes have negative implications for the cooperation that APEC is designed to promote. APEC’s CTI’s work on Dispute Mediation is to explore ways of cooperative dispute-solving. It focuses on government and private disputes, and on promoting transparency in laws and regulations as a means of dispute avoidance.

APEC regards WTO dispute settlement as the primary channel for solving disputes. APEC can have a role in helping to avoid disputes or resolve them through non-adversarial and voluntary approaches. At its meeting in May 1999, the CTI decided to realign work to enable the substantive work on dispute mediation to be carried out under the direct responsibility of the CTI Chair.

Business and Private Sector Participation

Academics, lawyers, arbitration experts, mediators, and business leaders provide valued input to APEC’s work on dispute mediation.

Achievements

- Agreement to maintain the Guide to Arbitration and Dispute Resolution in APEC Member Economies on the Internet.

Next Steps

- Consider extending the Australia-Indonesia Alternative Dispute Resolution Pilot Project to other APEC economies over the period of July 2000-June 2005.

Mobility of Business People

The Osaka Action Agenda of November 1995 commits APEC members to enhance business mobility by exchanging information on regulatory regimes, streamlining the processing of short-term business visitor visas and procedures for temporary residence of business people, and maintaining a dialogue on these issues with the business community. Australia is the Convenor for business mobility.

Business and Private Sector Participation

The APEC Business Advisory Council (ABAC) has made facilitation of business travel a priority. The CTI’s agenda on business mobility has been guided by ABAC’s recommendations, and the Informal Experts Group on Business Mobility has informed ABAC of its progress. Business has also been closely consulted in development of the APEC Business Travel Card scheme and introduction of other APEC initiatives. The IEGBM Chair met with the ABAC Business Facilitation working group at the February 2000 ABAC meeting in Bangkok, Thailand and ABAC has been invited to attend IEGBM meetings.

Achievements

APEC members:
- Agreed in principle to adopt improved service standards for processing applications for and extensions of, temporary residence permits for executives, managers and specialists transferred within their companies to other APEC economies.
- Collectively agreed to issue multiple-entry visas to frequent business travelers from other APEC economies and have acted individually to facilitate business travel, for example by expanding visa-waiver programs or extending the validity of multiple-entry visas.
- Launched a technical cooperation program to help members implement advanced border management techniques.
- Maintained up-to-date information on their requirements for short-term business visas and temporary business residency permits in the Internet version of the APEC Business Travel Handbook at www.apecsec.org.sg. The Handbook also includes contact information on offices that issue visas across the APEC region.

Australia; Chile; Hong Kong, China; Korea; and the Philippines began implementing a trial of the APEC Business Travel Card scheme, which offers accredited business travelers visa-free travel and expedited airport processing when visiting participating economies. Malaysia and New Zealand joined the Business Travel Card scheme in 1999, while Thailand joined in February 2000 and Peru in August 2000. This brings the current number of participants in the ABTC to nine. ABAC has called on APEC to increase the number of participants to 12 by year-end and this goal is looking increasingly achievable.

Next Steps

Members will begin implementation of their agreement to streamline processing of temporary business residency permits. Technical cooperation in 1999 focused on raising members’ capacity to detect document fraud as a means to streamline entry for legitimate business travelers and a number of training sessions were undertaken in this regard by Australia; Canada; Hong Kong, China; and the US. Economies participating in these and

Continued on page 12
other sessions included Brunei Darussalam, China, Chile, Indonesia, Korea, Malaysia, Mexico, Papua New Guinea, Peru, the Philippines, Russia, Singapore, Chinese Taipei and Viet Nam. Similar training is being offered this year, most recently in the U.S., at a session held in August 2000 to discuss the standards essential for transparent and open immigration systems as well as the capacity building needed to implement them.

Implementation of WTO Outcomes

Since its creation in 1989, APEC has taken the position that it should build on the open multilateral trading system. Thus APEC Ministers and Leaders committed themselves to an early and successful conclusion of the Uruguay Round (UR), and agreed after its conclusion to carry out UR commitments fully and without delay.

The task in this area is to promote opportunities for training and exchange of views on and experiences of challenges and solutions related to implementation of the UR outcomes. The goal is full and effective implementation of UR outcomes within the agreed time frame, in a manner fully consistent with the letter and spirit of the WTO Agreement.

At its meeting in Christchurch in May 1999, the CTI decided to realign work to enable the substantive work on UR implementation to be carried out under the direct responsibility of the CTI Chair. Given the time which has lapsed since the conclusion of the Uruguay Round, the CTI further agreed to explore how work in this area could be further streamlined and re-organized for the mid to long term. In this regard, the CTI also agreed to rename the issue area as “Implementation of WTO Obligations” instead of “Implementation of UR Outcomes”.

Next Steps

CTI will consider developing a mechanism to implement and follow-up on the strategic plan to build capacity in APEC to implement WTO agreements.

Business and Private Sector Participation

The business/private sector has not been very active in the UR Implementation seminars and workshops. Member economies will consider further whether to hold periodic seminars with the business and private sector on UR Implementation.

Achievements

- Development of a strategic plan to build capacity to implement WTO Agreements
- APEC Seminar on New Areas (Investment and Competition) was held on 23 August 2000 in Lima, Peru and the second seminar is scheduled in November 2000 in the Philippines.

E-mail: jdamond@ustr.gov

APEC Secretariat
Mr. Sun Yuanjiang
Director (Program)
E-mail: sy@mail.apecsec.org.sg
In Vancouver, APEC Leaders agreed to early voluntary sectoral liberalization (that is, liberalization before the agreed goal of 2010 for industrialized economies and 2020 for developing economies) in 15 areas. They are environmental goods and services; fish and fish products; forest products; medical equipment and instruments; telecommunications mutual recognition arrangement (MRA); energy sector; toys; gems and jewelry; chemicals; oilseeds and oilseed products; food sector; natural and synthetic rubber; fertilizers; automotive; and civil aircraft.

The EVSL initiative is unique in that it envisages a three-track approach to liberalization—including market opening measures, trade facilitation activities and economic and technical cooperation initiatives. APEC participating member economies decided that the tariff elements of the EVSL exercise should be negotiated within the WTO. With the decision to transfer the tariff element of EVSL to the WTO, work focused on the non-tariff measures, facilitation, and economic and technical cooperation components of the sectoral initiatives.

Business and Private Sector Participation

Since the early stages of the EVSL exercise, Ministers have emphasised the importance of taking into account private sector interests. Member economies have consulted business in developing the liberalization initiatives for each sector. In some sectors it is envisaged that the private sector would be directly involved in implementation, for example, in economic and technical cooperation activities.

In the automotive sector, an APEC Automotive Dialogue was established to serve as a forum for government officials and senior industry representatives to work together to map out strategies for increasing integration and development of the automotive sector within the region. The Dialogue met in Manila on 6-8 April 2000 for the second time to address a comprehensive range of issues affecting the automotive industry. Participants reaffirmed that seeking a sustained recovery of the auto industry in the economies, seriously affected by the financial crisis, should remain the first priority for the Dialogue. It emphasised the need to develop practical measures to assist the industry achieve global benchmarks of quality, reliability and price competitiveness. A substantive work programme has been set in train, which will require close consultation with other APEC fora, particularly in the areas of customs, standards and intellectual property rights. The next meeting is scheduled to take place in Bangkok Thailand on 3-5 April 2001.

Achievements

- APEC has agreed to a proposal by the Asia-Pacific Chemical Industry Coalition (APCIC) to set up a Chemical Dialogue, in which senior government and industry representatives would meet regularly to discuss trends and challenges facing the industry, opportunities for expanding trade, non-tariff measures, facilitation and ECOTECH. The terms of reference for the Dialogue will be developed for CTI’s review in 2001.
- The process of notification and cross-notification to identify non-tariff measures affecting the product sectors has been completed. A list of generic non-tariff measures has been compiled. A follow-up work mechanism to progress the EVSL NTMs is being undertaken by the Market Access Group, the designated focal point for organizing the work on NTMs.
- Further progress was made in the implementation of non-tariff, facilitation and ECOTECH work programs of the EVSL. Several projects were completed. These include the APEC Seminar of the ISP Global Safety Standard, IS 8124; Seminar for Government Regulators/Harmonization of Medical Equipment Regulation; APEC Gem and Jewelry Trade; Technology Seminar; APEC 2000 International Jewelry Conference; and Seminar on public health issue in Animal Production/Animal Products.

Next Steps

- The Committee on Trade and Investment to continue playing a coordinating role in carrying forward the work on the non-tariff measures, facilitation and ECOTECH elements in the 15 EVSL sectors.

Trade Facilitation

An ad hoc Task Force on Trade Facilitation was established under the auspices of CTI to pursue work in developing a set of APEC non-binding principles on trade facilitation in response to a Ministerial directive. Such principles are intended to assist policymakers of APEC economies in formulating and implementing pro-business trade and investment measures.

Achievements.

The Task Force met twice this year on 29 May and 18 September. It reviewed work by member economies and relevant sub-fora in advancing the trade facilitation agenda. The Task Force has drawn up a list of core elements of the trade facilitation principles that would form the basis for further development of the set of non-binding principles itself.

Next Steps

The task force will expedite its work with a view to making further substantive progress by mid 2001, including on implementation and technical assistance issues relating to the trade facilitation principles.

Economic Committee

The Economic Committee (EC) was established at the 6th APEC Ministerial Meeting in Jakarta in November 1994, when the Ministers agreed to transform the Ad Hoc Group on Economic Trends and Issues into a formal policy committee. The Committee is responsible for research on economic trends and issues in the APEC region, and serves as a forum for member economies to exchange information and views. The Committee currently operates under the two guiding principles for its activities, as set out at the beginning of 1999. First, the Committee focuses on demand-driven work in support of APEC Ministers’ and Leaders’ meetings and policy-oriented work of other fora. The Committee’s work addresses central economic issues of priority concern for Leaders and Ministers, and provides the analytical basis useful for advancing TILF and ECOTECH agendas. Second, the Committee aims at delivering high-quality research outputs by tightening its work program, in order to fulfill its core role as APEC’s analytical body.

Business and Private Sector Participation

The Committee makes efforts to reach out to the research community and businesses. Scholars, researchers, and businesspersons participate in the symposiums and seminars held under the auspices of the Committee as part of the implementation of its research projects.

Linkage with the APEC Study Centers is also important in fostering links with the academic/research community in member economies. The EC Chair was invited for the first time to the annual APEC Study Center Consortium Conference held in Auckland in May 1999 as a keynote speaker, and he was also invited to participate in its directors’ meeting.

Achievements

The Economic Committee’s activities for 2000 are focused on addressing core issues of interest and concern to Leaders and Ministers. They include the following three major research projects, all of which will be undertaken collaboratively by member economies and will be published in time for the Ministers and Leaders’ meetings in November. They are:

- 2000 APEC Economic Outlook
- APEC Economies beyond the Asian Crisis
- Towards Knowledge-based Economies in APEC

Another major EC activity is the follow-up work on the EC’s report on Impact of Expanding Population and Economic Growth on Food, Energy and the Environment (IEEEEP). The EC’s plenary meeting is used as an information sharing mechanism on the studies of agricultural trade liberalization and reform policies.

(1) APEC Economic Outlook

The Economic Outlook has been tailored to serve APEC policy priorities. It is time to be tabled annually at the Ministerial meeting. Its first part updates and summarizes recent developments and short-term prospects of all APEC member economies, and its second part addresses topical structural issues bearing on priority themes of TILF and ECOTECH agendas. The Philippines is coordinating the preparation of the 2000 Economic Outlook. The 2000 Outlook aims to pursue the new thinking on regional trading agreements (RTAs), and focus on how the new regionalism can best serve the goal of multilateralism. It will review the evolution of analytical thinking on RTAs, with a view towards a framework that highlights the positive outcomes from the new regionalism, and explore policy measures and new areas of cooperation within APEC that can be taken under this new regionalism framework.

The 2000 APEC Economic Outlook Symposium was held in Manila in July 2000 as part of project implementation. It served as a forum for

Continued on page 15
gathering views and inputs from academia, government officials, and international organizations.

(2) APEC Economies beyond the Asian Crisis (the “beyond-the-crisis” project)

The beyond-the-crisis project is a two-year project started from the beginning of 1999. This project focuses on long-term prospects of the APEC economies beyond the Asian crisis, highlighting key issues awaiting the APEC economies in the next few decades. Its value added for APEC is twofold. First, the project provides a vehicle for the APEC community to foster a sense of direction on the prospects of APEC economies and necessary policy actions. Second, it provides the analytical basis for refocusing and strengthening APEC cooperation activities.

This project is being carried out as a collaborative task led by four lead economies: Japan (growth potentials and project coordination), Korea (trade and investment), Chinese Taipei (SMEs), and the Philippines (social policy).

The report emphasizes the importance of capacity building in APEC economies to meet the challenges of future growth posed by the Asian crisis and the new economy. Priority areas of cooperation that APEC needs to focus on include: strengthening markets, e-commerce and technology cooperation, entrepreneurship and SME development, education and lifelong learning, and social safety nets.

(3) Promotion of Knowledge-based Economies (KBE) in the APEC Region

In their Declarations in both Kuala Lumpur in 1998 and Auckland in 1999, Leaders underscored the importance of knowledge as a key driver of future economic growth, and pledged to ensure that APEC economies be at the forefront of efforts at building and sharing expertise in this vital area. The KBE project takes on this challenge put forth by the Leaders. It aims to provide the analytical basis useful for promoting effective use of knowledge, and to accelerate the creation and dissemination of knowledge among APEC economies.

The work, which is being carried forward by Korea (coordinator), Australia and Canada, addresses following areas:

- Assessment of knowledge infrastructure
- Policy environment conducive to expanding the knowledge base
- Possible areas of APEC cooperation for promoting knowledge-based economies

The report identifies potential areas for cooperation in promoting KBEs in APEC. Key areas include business environment, innovation systems, human resource development, and information and communication technology.

Korea hosted the APEC Symposium on Knowledge-based economies in Seoul in June 2000, which served as an occasion to review the draft reports and also to solicit views from the scholars, academics, and government officials who participated.

The results of the three major research studies will be valuable in terms of providing policy makers in APEC with policy options and direction on key macroeconomic issues directly affecting the region. The projects also offer recommendations on possible areas for strengthening economic cooperation among APEC member economies towards long-term and sustainable growth in the region.

Furthermore, the task of undertaking research studies and the collaborative nature of these projects, and the holding of symposiums in conjunction with the three research projects are in themselves good exercises in human resource development and capacity building.

Next Steps

The EC held its second plenary meeting in year 2000 in Brunei Darussalam on 19-20 September. The Committee elected a new Chair and discussed its future work aiming at sharing thoughts and ideas on possible future projects. A new work program will be developed under the new leadership. Regarding the 2001 APEC Economic Outlook, Hong Kong, China is the coordinator for the preparation of the report. It will address financial development and its relation to economic growth in APEC economies.
Budget and Management Committee

The Senior Officials’ Meeting (SOM) in September 1993 agreed to establish the Budget and Administrative Committee (BAC) to advise APEC Senior Officials on budgetary, administrative and managerial issues. The BAC assesses and makes recommendations on the overall budget structure, considers budget requests, drafts the annual APEC budget, and examines all questions relating to the APEC budget and budgetary processes. The BAC also monitors and evaluates the operations and overall performance of Working Groups/Committees and makes recommendations to the SOM for improved efficiency and effectiveness. Ministers in November 1998 redesignated the Committee as the Budget and Management Committee (BMC) with a view to strengthening the management of APEC projects.

TILF Special Account

At the Economic Leaders’ Meeting in Osaka in 1995, the members adopted an Action Agenda for the implementation of the Bogor commitment to achieve free and open trade and investment in the Asia-Pacific region no later than 2010 in the case of industrialized economies; and 2020 in the case of developing economies. As the member economies proceed to meet their trade and investment liberalization and facilitation commitments, their efforts are enhanced through cooperative projects supported by APEC.

While respecting the individual efforts of member economies, Japan proposed at the Osaka Leaders’ Meeting in 1995 to contribute, where necessary, up to 10 billion yen to the APEC Central Fund over the coming several years for use in appropriate cooperative projects formulated in support of trade and investment liberalization and facilitation.

Business and Private Sector Participation

As an internal administrative forum, the BMC does not have any direct participation of the business and private sector at its sessions.

Achievements

The BMC has performed the functions set out above. The BMC usually holds two regular meetings each year. These are supplemented, if necessary, by ad hoc meetings and decisions are taken intersessionally by circulation.

From January to September 2000, the BMC:

- received the auditor’s report on the 1999 accounts of the APEC Central Fund;
- approved a number of urgent 2001 projects and welcome mid-year savings to the 2000 Administrative Account;
- examined the progress reports and evaluation reports of ongoing and completed projects;
- reviewed both Operational Account and TILF Special Account procedures and adopted measures to facilitate the consideration and implementation of urgent projects;
- recommended lists of Operational Account and TILF Special Account projects for 2001;
- noted the forecast of the Operational Account for the coming four years and in view of the bleak outlook especially for year 2004, adopted a prudent approach for 2001, capping the total amount to be allocated to 2001 projects at US$2 million, of which US$0.5 million being set aside for urgent 2001 projects;
- recommended that members’ contributions to the Operational and Administrative Accounts of the APEC Central Fund for 2001 should remain at the same levels as for 2000;
- invited Senior Officials’ to note that without increasing members’ contribution, a 2-million Operational Account budget may not be sustainable in the long run, especially during the years when the host economies are far from the Secretariat (for example, Mexico in 2002 and Chile in 2004);
- approved the issue of a revised edition of Guidebook on APEC Projects;
- made use of an access-controlled website to distribute the papers of the BMC meetings electronically, and for BMC members to exchange views on various issues before the meeting; and
- noted the variables which may affect the 2001 and 2002 Administrative Account budgets.

Next Steps

The BMC will continue to perform its budgetary and management functions.

Sub-committee on ECOTECH

The ECOTECH Sub-Committee (ESC) was established in 1998 to assist the SOM in coordinating and managing APEC’s economic and technical cooperation (ECOTECH) agenda, and in identifying value-added initiatives for cooperative action. It seeks to advance The ECOTECH Sub-Committee (ESC) was established in 1998 to assist the SOM in coordinating and managing APEC’s economic and technical cooperation (ECOTECH) agenda, and in identifying value-added initiatives for cooperative action. It seeks to advance the ECOTECH Weightings Matrix, that was designed to provide APEC fora with a better appreciation of the overall ECOTECH priorities, including desired project outcomes; and

- launched the ECOTECH Clearing House - a website that indexes all relevant information on APEC economic and technical cooperation activities. The Clearing House also facilitates the exchange of information between potential partners in ECOTECH activity, in particular the identification of ECOTECH requirements and the capacity to provide appropriate expertise to meet those needs.

Next Steps

The ESC will continue to oversee the activities of the Group on Economic Infrastructure. It will also contribute to APEC’s outreach programs by highlighting how ECOTECH activities are benefiting governments, business and the community. In its deliberations, the ESC will take into account the application of the Framework for the Integration of Women.

Achievements

The ESC:

- examined and reported on the 220 ECOTECH projects that were ongoing or completed in 2000 with assistance from the APEC Secretariat;
- evaluated completed HRD ECOTECH projects;
- reviewed the implementation of Part II of the 1995 Osaka Action Agenda and the 1996 Manila Framework for Strengthening Economic Cooperation and Development through consultation with APEC fora and the development of policy management tools and guidelines for projects.

APEC’s work on strengthening economic and technical cooperation in infrastructure is mainly carried out by the Group on Economic Infrastructure (GEI) – previously known as the Infrastructure Workshop (IWS), a forum that had been operating under the auspices of the Economic Committee. However, following recommendations arising from the 1999 Management Review, Ministers at the Auckland, New Zealand, meeting in September 1999, agreed that the IWS should be re-constituted as an ad hoc forum under the ECOTECH Sub-Committee.

Achievements

• The joint APEC-PECC-private/public sector initiative *Regional Integration for Sustainable Economies* (RISE), which aims to develop an approach to rural development based on integrating rural economies into the broader marketplace. It supports rural-urban linkages, development of secondary urban economic hubs and integrated infrastructure investment. Pilot scale work with regional growth centres (RGCs) in Jiangmen, China and Manado-Bitung, Indonesia has commenced. Further information on the RISE initiative can be obtained from its website (http://www.riselinke.net/)

• *Economic Regulation and Creditworthiness Enhancement*, which is being conducted by Indonesia with support from Canada, the United States, the World Bank and the Asian Development Bank. The work takes into account best practice approaches identified in previous Infrastructure Dialogues involving stakeholders and experts. Although the initiative has a domestic focus, the aim is to provide a blueprint for wider application.

• *Public-Private/Business Sector Dialogue on Infrastructure* which is an annual event that draws participants from government, international financial institutions, business and academia. The 1999 Infrastructure Dialogue was held in Kuala Terengganu, Malaysia, where *Sustainable Urbanization for the 21st Century and Preparing Investment for the Information Age and Beyond* were discussed. The proceedings of the Infrastructure Dialogue have been published and copies may be purchased from the APEC Secretariat. This year’s Infrastructure Dialogue will be held on 12-14 December, in Melbourne, Australia, where infrastructure regulatory and policy frameworks and other creditworthiness enhancing measures for investment and the further development of the RISE initiative, will be discussed.

Next Steps

The GEI will continue to utilize the Public-Private/Business Sector Dialogue process, the “Economic Regulation and Creditworthiness Enhancement” work and the RISE initiative to make available to member economies the lessons learnt and best practices in support of policies and frameworks for the provision of infrastructure services. It will also review infrastructure support work undertaken in other fora relating to sustainable urban development, in order to assess APEC’s future role in this field. In its activities, the GEI will take into account the application of the *Framework for the Integration of Women*.

Energy

The Energy Working Group (EWG), launched in 1990, seeks to maximize the energy sector’s contribution to the region’s economic and social well-being, while mitigating the environmental effects of energy supply and use. The efficient and reliable supply of energy and energy services to meet the needs of APEC member economies provides the focus for the EWG’s activities. The EWG contributes to decision-making through: frank and open discussion of members’ energy policies and planning priorities; sharing basic resource demand and supply outlook data and considering the regional energy policy implications; and responses to wide-reaching energy-related issues.

Business and Private Sector Participation

The business/private sector is involved in the work of the EWG through the EWG’s five Expert Groups and is represented at EWG meetings by the PECC Energy Forum. Business participates in, and supports, EWG events such as seminars, training programs and technology demonstrations. A business sector/Ministerial dialogue has been held in conjunction with the four Energy Ministers’ meetings held to date.

In March 1998, the EWG established the EWG Business Network (EBN) as an interface between the private/business sector and the EWG. The Network comprises two business representatives from each economy. The fourth meeting of the Network took place in August 2000 in Phuket, Thailand. Recommendations from the EBN focus on raising the awareness of the importance of the energy sector to the growth in the Asia Pacific region, particularly in relation to initiatives and activities that strengthen dialogue, build capacity and encourage market reforms to attract private sector investment in energy infrastructure development. This matter was also reflected in the deliberations of APEC Energy Ministers at their latest meeting.

Fourth Energy Ministers Meeting

APEC Energy Ministers met for the fourth time in San Diego, California, USA on 12 May 2000 to discuss regional energy cooperation and the role of energy in meeting APEC’s goals in the 21st century, under the theme “Turning Vision into Reality”. In their Declaration following the meeting, Energy Ministers committed to the implementation of priority energy initiatives on a voluntary basis, taking into consideration the different stages of development of APEC member economies. They also endorsed a new implementation strategy; agreed to send a message to APEC Economic Leaders on the contribution energy market reform can make to sustain economic growth in the region; and issued a Joint Statement on Clean Energy and Sustainable Development.

The Ministerial Declaration notes the central role of energy in the region’s future prosperity, energy security and environmental protection and highlights the work done in the EWG on initiatives to sustain energy market reform and facilitate economic and technical cooperation. The message to APEC Economic Leaders commits to implementation of these initiatives, especially through a new Implementation Strategy. These initiatives include strategies to enhance energy efficiency and conservation; and disseminate new and renewable energy technologies that will facilitate energy security and regional economic stability.

Achievements

The EWG has:

- Regularly published APEC Energy Statistics, consisting of annual and quarterly data covering: energy balances, final energy consumption, supply and demand by energy sources and electricity, and stock changes for APEC member economies. The data for 1998 was published in October 2000.
- Developed and obtained the agreement of Energy Ministers to implement 14 Rational Energy Policy Principles which give impetus to the reform of energy policies in member economies. In May 2000, Ministers reviewed further progress in implementing the non-binding principles.
- Held four Energy Ministers’ Meetings (Sydney, Australia, August 1996; Edmonton, Canada, August 1997; Okinawa, Japan, October 1998; San Diego, USA, May 2000).
- Obtained endorsement from Energy Ministers to an APEC Ministers’ Implementation Strategy (2000), which has two components:
  - An Implementation Facilitation Assistance Team (IFAT) program, where experts (including representatives from Expert Groups, the EBN, Energy Regulators Forum and other designated experts) share their experiences on implementing policy initiatives endorsed by Energy Ministers with economies wishing to receive practical, non-prescriptive advice on energy market reform.
  - A reporting mechanism to measure progress in implementing energy market reform which takes the form of a voluntary, annual self reports by member economies that will be forwarded to Economic Leaders through the Energy Working Group and the APEC system.
- Gained endorsement by Energy Ministers (1997) of the non-binding principles contained in the Manual of Best Practice Principles for Independent Power Producers (IPPs), aimed at mobilizing capital for private sector investment in power infrastructure. A number of economies are using the Principles as a guide in the reform of their power sectors.
- Secured endorsement by Ministers of a set of non-binding principles for good environmental practice aimed at ensuring new power infrastructure additions in APEC economies are environmentally sound.
- Conducted a program of seminars, training courses and information exchange activities aimed at promoting new and renewable

Continued on page 20
energy technologies, more efficient energy production and use, and the mitigation of the environmental impact of energy production and use, e.g. through the application of clean fossil energy technologies.

- Completed and published a comprehensive *Regional Energy Supply and Demand Outlook* to the year 2010.
- Conducted IFAT visits to Thailand in November 1999 and August 2000 to maintain the momentum on the gas reform process and developed recommendations specific to the needs of Thailand’s energy market reform process. Peru and the Philippines have also invited an IFAT visit.
- Commenced implementation of the voluntary pledge and review system aimed at improving energy efficiency.
- Commenced implementation of the Energy Efficiency Standards Notification Procedure.

**Next Steps**

The EWG will continue its work program based on the *Osaka Action Program for Energy* and the priorities established by Ministers and Economic Leaders. During 2001 the EWG will:

- Develop further its energy database and enhance its website to enable policy makers and business to be better informed on supply and demand related issues.
- Facilitate implementation of the Best Practice Principles for Independent Power Producers and promote private sector investment in the natural gas chain in line with the recommendations of the Natural Gas Initiative.
- Assist APEC member economies to implement agreed energy initiatives, including energy market reform, by conducting Implementation Facilitation Assistance Team visits at the invitation of economies.
- Implement the work program on environmentally sound power infrastructure.
- Continue its efforts to promote energy efficiency and conservation through the exchange of information on technologies, policies and practices and implementing the Voluntary Pledge and Review Program to foster improvements in the production, delivery and use of energy.
- Implement the standards notification procedures.
- Strengthen the operational aspects of APEC micro-economic reform within the power sector to achieve economic and environmental gains.
- Encourage the uptake of new and renewable energy technologies through the development of the 21st Century Renewable Energy Development Initiative.
- Conduct a 5th meeting of the EBN in Mexico (February 2001).
- Conduct EWG21 in Malaysia (May 2001) and EWG22 in Papua New Guinea (October 2001).
- Consider what additional measures might be taken to further enhance regional energy security including in respect of oil and alternative energy services.

**Fisheries**

The Fisheries Working Group (FWG) was created by the SOM in 1991. It aims to promote:

- the conservation and sustainable use of fisheries resources;
- sustainable development of aquaculture and habitat preservation;
- development of solutions to common resource management problems;
- the enhancement of food safety and quality of fish and fisheries products; and
- sector specific work relating to trade and investment liberalisation and facilitation.

**Business and Private Sector Participation**

The FWG had its 11th annual meeting in Seattle USA from 17-21 July 2000. This meeting included for the first time a Business Forum hosted by the USA and sessions on gender issues, fisheries management and aquaculture along with the normal business of the meeting.

This forum provided an opportunity for APEC economies to discuss issues of common interest with the US industry and the International Coalition of Fisheries Associations (ICFA) and from Universities. Industry interests included: harmonisation of trade information and documentation schemes; support for IUU fishing through the FAO; support for strong Regional Fisheries Management Organisations (RFMO’s); and reduction in non-tariff measures and the implementation of the UN Fish Stocks Agreement. These are issues that industry felt APEC could develop in cooperation with the FAO. Other suggestions included support of HACCP and technologies to mitigate seabird by-catch.

Continued on page 21
Fisheries Management
The meeting took reports from a number of key conferences on Fisheries Management that had been held in APEC member economies and from the FAO. A number of suggestions were made for agenda items on Fisheries Management for FWG12 and they included algal blooms, differences between the US and EU HACCP systems, and joint issues for the FWG and MRWCG. It was agreed that fisheries management in terms of the role described above was an important aspect of the FWG work program.

Aquaculture
There were a number of reports in this session including a report on the recommendations from the conference Aquaculture in the 3rd Millennium held in Bangkok in February 2000, the Medan Grouper Workshop and the Expert Consultation on Aquaculture Education held in Hanoi.

Discussion on future work areas included presentations from the nature Conservancy and the World Resources Institute on farming the Komodo National Park in Indonesia and developing a pilot aquaculture project in the same area. However, while the Grouper Network was supported a number of economies expressed concern that there was too much focus on aquaculture and grouper and that we needed to consider freshwater and alternative species for aquaculture.

New Projects
FWG projects for commencement in 2000/01 were ratified at the BMC meeting held from 26-28 July 2000 and included:

- Collaborative APEC Grouper Research and Development Network (FWG 01/2001); Management of Marine Algal Toxins in Seafood Products in the APEC Region (FWG 02/2001);
- Farming the Reef: A State of the Art review of Aquaculture of Coral Reef Organisms in Tropical Nearshore Environments (FWG 04/2001);
- APEC Seafood Information Systems (SIS) Phase 2 (FWG 01/2001T); and
- APEC Project for the Conservation and Management of Sharks (FWG 03/2001T).

Achievements
The FWG reinforced its role in fisheries management to “promote cooperation, conservation, management, sustainable utilisation of fisheries resources and encourage mitigation of the effects of pollution on the marine environment”. The Kesen-Numa Workshop report was adopted with inter-sectional work needed to try to progress the suggested actions prior to the FWG 12 meeting.

During 2000, the FWG has been working towards completing Part II, on non-tariff measures, of the project “Trade and Investment Liberalization in Fisheries.” This project was originally designed in 1996 as a self-funded four-part study to include tariff, non-tariff measures (NTMs) and subsidies, including investment liberalization.

The FWG also has been assuming responsibility for two projects arising from the Early Voluntary Sectoral Liberalization (EVSL) initiative in the fisheries sector. One of the projects is “Study into the Nature and Extent of Subsidies in the Fisheries Sector in APEC Member Economies”, which will identify government progress and policies, which might lead to dispute under the WTO Subsidies and Countervailing Measures Agreement. The other project is “A study to Reduce Impediments to Early Voluntary Sectoral Liberalization in the Fisheries Sector,” which is a three-part project to develop a policy model to eliminate barriers to EVSL.

The FWG is continuing to undertake a two-year TILF-related project, which started in mid-1999, “APEC Seafood Information System”. This project tests the feasibility of improving and expanding the market and industry information service provided by GLOBEFISH and the FAO Regional Marketing Information and Advisory Services for Fishery Products. By the end of this year 2000, it is aimed to have a website up and running.

In addition, the FWG completed the project “Free Trade and Investment in the Fisheries Sector of the Asia-Pacific Region: Economic Analysis of Tariffs” in 1999. This project fairly assesses the qualitative and quantitative economic impacts of tariff removal in the fisheries sector in the Asia-Pacific Region. The outcome is available at APEC’s website.

It’s worth mentioning that in early 1999, the FWG produced a publication on Air Shipment of Live and Fresh Seafood Guidelines: A Manual on Preparing Packaging Live and Fresh Fish & Seafood Air Shipments along with the Customs and Inspection Guidelines for Six APEC Member Economies. The manual aims to inform APEC fish and seafood traders of the technical requirements and public health regulations associated with trade in air shipped live and fresh fish and shellfish. The manual is available from the APEC Secretariat. An electronic version is on the APEC Secretariat’s website.
Human Resources Development

The Human Resources Development Working Group (HRDWG) was established in 1990 and conducts work programmes on developing human resources, touching on issues ranging from education to labour to capacity building. The WG also furthers the ECOTEC objectives of developing human capital, which is one of the Brunei priorities for APEC2000.

In 2000, the HRDWG underwent a restructuring to better reflect the current priorities of Leaders and Ministers in the area of HRD and also to ensure more effective management, by reducing its size from having five to three networks: the Capacity Building Network (CBN); the Education Network (EDNET); and the Labour and Social Protection Network (LSP).

Through the year, one Ministerial and two WG meetings were held. The 2nd APEC Education Ministerial Meeting was held in Singapore on 6-7 April 2000 with the theme ‘Education for Learning Societies in the 21st Century’. Education Ministers identified four strategic areas essential for transformation into learning societies of the future: usage of IT as a core competency; enhanced quality of teaching and teacher development; sound management practices in policy-making; and active engagement by economies in education.

The 21st and 22nd HRDWG meetings were held in Sapporo, Japan and Bandar Seri Begawan, Brunei Darussalam on 24-28 January and 26-29 May 2000 respectively. One of the outcomes of the meetings is the setting up of a planning committee in preparation for the 4th APEC HRD Ministerial meeting to be held in Japan in September 2001. The WG’s newly reconstructed three networks met for the first time in May.

The HRDGW also contributed towards Brunei Darussalam’s theme of “Delivering to the community” by participating in a special Dialogue on HRD titled “Delivering to People on Training and Education” on 29 May 2000. In addition, the HRDWG was also invited to contribute to the development of the Human Capacity Building initiative.

Projects currently being developed or implemented include:
- Application of Total Productive Maintenance (TPM) in Small and Medium Industry,
- Skill Shortages, Training Needs and HRD Strategies of Multinational Enterprise (MNEs) in APEC Economies,
- Achieving High Performance Schools: Using Measurement to Manage Improvement,
- KDI School as an APEC Education Hub,
- Corporate and Non-profit Governance and the Restoration of Prosperity in the APEC region: Perspectives and Principles,
- Alternative Dispute Resolution - Executive Education Project 2000 (ADR-EEP 2000),
- Seminar on the Best Practices for Professional Development of Vocational Teachers in Teaching Competencies among APEC Economies,
- The Use of Information Technology in a Learning Society,
- APEC Cyber Education Cooperation,
- Helping Business Respond to Change: Innovations in Labour-Management-Government Cooperation,
- APEC Forum on Cross-Cultural Understanding of Implementation of Standards and Accreditation in Supply Chain Management,
- Capacity-Building Program for Trade and Investment Insurance Practitioners,
- APEC Site for Kids.

Business and Private Sector Participation

Enhanced participation by the private/business sector in the HRWG’s activities continued to be considered and implemented throughout 2000. The business/private sector also benefits directly from HRD activities in APEC, especially for the SMEs where several programmes to upgrade the capacity of SMEs are conducted. Apart from participation, co-sponsorship from the business/private sector is present not only in financial terms but also in the context of enhancing linkages between industry and the various target groups of HRD activities such as youths and SMEs.

Achievements

The HRDWG’s achievements of the year include successful holding of these events:
- The project “APEC Youth Networking: Youth Preparation for APEC Society in the Next Millennium” was held in Bangkok on 12-20 July 2000. The event brought together APEC youth to learn about APEC, promote cross-cultural mutual understanding and build a youth network across the region. Over 150 participants from 13 economies participated in a series of lectures and panel discussions, cross-cultural simulation exercises, exhibitions and home stays.
- A symposium on “IT Enablement for Trainers in the New Millennium” was held on 18-20 July 2000 in Brunei Darussalam with over 700 participants, addressing the issue of equipping the modern workforce with IT skills. There were exchanges of information on the latest teaching methods, knowledge and strategy in IT for both public and private sectors with each other as educators and trainers in the region.
- A symposium was held on “Capacity-Building of APEC Executives on International Business Management” in Yantai, China on 2-3 August 2000 to build the capacity of executives on international business management, especially from the developing economies and SMEs. Participants were able to exchange experience and best practices in international business management.

As part of an information exchange exercise and to avoid duplication of

Continued on page 23
efforts, at the invitation of the OECD the EDNET Coordinator briefed the General Assembly on Indicators of Education held in Japan in September on similar work being undertaken in the HRDWG.

Several self-funded projects were completed and events held throughout the year, including the publication of the APEC Engineers Manual, APEC Forum on HRD in the Manufacturing Industry in Japan and APEC Youth Skill Camp in Korea.

Next Steps
The HRDWG will continue to implement its work programme towards developing human capital and in response to Leaders’ and Ministerial priorities. Preparations are underway for the 23rd HRDWG Meeting in Mexico on 10-13 April 2001 and for the 4th APEC HRD Ministerial Meeting scheduled on 29-30 September 2001 in Kumamoto City, Japan.

Industrial Science and Technology

The Industrial Science and Technology Working Group (ISTWG) was formed at the APEC Ministerial Meeting in Singapore in 1990 as the Working Group on Expansion of Investment and Technology Transfer. It has changed its name several times since then. The ISTWG operates within the formal framework of APEC and the policy directions set by Leaders and is guided by APEC Ministers responsible for Science and Technology.

The ISTWG’s program is based on the working group’s vision for the 21st century of a dynamic and prosperous Asia-Pacific region built on the development and application of industrial science and technology that improves the quality of life while safeguarding the natural environment and achieving sustainable development.

The ISTWG’s mandates were established as part of the Osaka Action Agenda. In 1997 at their Vancouver meeting, the Leaders called for APEC fora to review their mandates and at the 14th ISTWG meeting a new version of ISTWG action agenda was finalized, which reworded the six key priorities and adopted them formally. The six key priorities are improved availability of information; improved human resources development; improved business climate; contribution to sustainable development; enhanced policy dialogue and review; and facilitation of networks and partnership.

The ISTWG activities are focussed in light of three major Leaders’ and Ministers’ initiatives which are closely related to the Group: the APEC Agenda for S&T Industry Cooperation for the 21st Century, the Mexico Declaration and the Cleaner Production Strategy.

Business and Private Sector Participation
The ISTWG has underscored a close cooperation between the group and business/private sector in many activities such as the ‘Technomart’ and the APEC Science and Technology Industrial Parks Network. The business/private sector is encouraged to participate in the ISTWG activities. The group held a business conference biotechnology/health and environmental issues in conjunction with its 17th meeting in August 1999. The 4th Technomart to be held in Sept 2001 will serve another major occasion for private sector to participate in the IST’s project.

Achievements
The ISTWG issued the ISTWG Handbook for Members to ensure that its members are well briefed and that the group is effectively organized. The Handbook describes the current aims, policies, procedures and practices of the group. To support the integration of women into the APEC process, the IST had a gender information session.

In addition to conducting a series of seminars, symposia, workshops, surveys and researches, the ISTWG has completed 11 projects this year. Some of the projects completed in the recent years include:

- Technomart I, II and III
- The Establishment of the APEC Virtual Center for Environmental Technology Exchange
- Improved Flows of Technological Information and Technology: The Role of S&T Industrial Parks
- Gender Stocktaking of ISTWG projects
- Symposium on High Performance Metal Matrix Composites for Manufacturing Technology of Advanced Materials
- Study on R&D internationalization in Industrial Sector among APEC Economies
- NGO Conference on Enhancing the Contribution of Science, Engineering and Technology to Sustainable Economic Growth
- The 1st and 2nd Asia-Pacific Youth Science Festival
- The Establishment of the APEC Center for Technology Foresight
- The Establishment of the APEC Coordinating Center for Good Clinical Practice
- Held an APEC Symposium concerning Public Understanding of Science and Technology (S&T)
The ISTWG is operating the ‘APEC Science and Technology Web’ (AST Web) to help expedite information flow among member economies. The website (http://www.apecst.org) includes ‘Discussion Forum for the Lead Shepherd/Chair of APEC WGs and Committees’ to avoid duplication of APEC activities and enhance synergy effect. ISTWG’s project proposals, which are open to feedback from other APEC fora, will be posted on the website from the conceptualization phase.

Next Steps

11 ISTWG projects delivered outcomes in 2000 but most are ongoing. The continuing projects include Workshop on Business Incubation and Information Flow Improvement for Business Incubators; APEC Wide Studies of Megacities and Technology and Learning in 2010 by the APEC Center for Technology Foresight; APEC Technomart IV; A Feasibility Study for the Development of a Post Harvest Network for the APEC Region; APEC Digital Museum Initiative; Dissemination of Earthquake Disaster Mitigation Technologies for Humanistic Concerns; APEC Training Program for Radiation Oncologists; Networking of APEC R&D Leaders and Researchers; The Development of Life Cycle Assessment Network in APEC Region; Cleaner Production Strategy/Clean Technology Strategy; Gender and Science and Technology; and Emergency Preparedness, and health issues.

The ISTWG continues to hold a policy dialogue session at their meeting to facilitate learning, share best practice and build a network in areas of mutual policy interests among the member economies. The ISTWG is discussing the 4th S&T Ministerial to be scheduled in 2001. Ministers responsible for Science and Technology have recently met in China, Korea and Mexico.

The ISTWG will provide a midterm work plan in 2001 in addition to preparing an annual operational plan. The IST has submitted the second report on the APEC Agenda for Science and Technology Industry Cooperation into the 21st Century, the first being endorsed by the Ministers in September 1999 in New Zealand. The recommendations in the second report include that:

- The ESC develop and coordinate an approach across all relevant APEC fora to provide a clearer picture of the nature and depth of private sector involvement in APEC ECOTECH projects, and of the impact of projects and intended beneficiaries.
- All the relevant APEC fora, especially the working groups, should strengthen science and technology policy dialogue to enhance their work on the strategic level;
- All APEC fora should strengthen communication and collaboration in the technology areas identified in the Agenda, particularly in broad enabling technologies, such as advanced materials;
- The APEC Secretariat, ESC and all the relevant APEC fora should make joint efforts in further strengthening ECOTECH project coordination; and in this connection the ASTWeb of ISTWG could be utilized as a discussion forum or Clearing House for future activities and projects addressing implementation of the Agenda;
- In view of the advantageous position of ESC, it should assume more responsibility in coordinating the Progress Reports of the Agenda in collecting necessary data and soliciting facilitation from other APEC fora.

Marine Resource Conservation

Recognizing that marine resources are crucial to the economic and social well-being of the people in the region, APEC established the Marine Resource Conservation Working Group (MRC) in 1990. The MRC working group is continuing its efforts to implement the Action Plan on Sustainability of the Marine Environment to protect this collective resource, and to making dramatic progress toward a sustainable marine environment to ensure continuing socio-economic and environmental benefits. Chinese Taipei is currently serving as the lead shepherd of the group for a two-year term until June 2000, and other shepherds of the group are Canada, China, Indonesia, and Thailand. As called for by BMC, Australia, Canada, Chile and Thailand formed a MRC project evaluation team to strengthen management of MRC projects. The last working group meeting (MRC13) was held in June 2000, in Lima, Peru and the 14th Working Group meeting (MRC14) will be held in Hong Kong, China.

Business and Private Sector Participation

The APEC Action Plan for Sustainability of the Marine Environment, which was endorsed by the APEC Environment Ministers in June 1997, relies on significant participation from business and the private sector in meeting its objectives. To encourage the participation by business and private sector and to build a long-term partnership relationship, a set of guidelines of “Involvement of the Business/Private Sector in MRC WG Activities” was discussed and endorsed at the MRC12 in May 1999. To take concrete action to involve the private sector, “Action Strategies and Work Programs: Engaging the Private Sector in Sustainable Management of Marine Resources in the APEC Region” was discussed and endorsed at the MRC13 in June 2000. Member economies will consider taking responsibility for undertaking activities outlined in specific sections.

Achievements

The MRC Working Group has accomplished the Ministers’ directives of “Environmentally Sustainable Growth, Developing Human Resources and Harnessing Technologies for the Future” in the following activities in 2000:

- APEC Round Table on Action Strategies and Work Programs for Private-Public Sector Partnership on Sustainability of Marine Environment, Chinese Taipei, 11-12 April
- Task Team and Program Steering Committee Meetings on Management of Red Tides and Harmful Algal Blooms in the APEC Region, Haikou, P. R. China, 15-18 April
- APEC Workshop on the Establishment of APEC Marine Environmental Training and Education Center, Cheju Island, Korea, 20-21 April
- The 4th Steering Committee Meeting on Ocean Models and Information Systems for APEC Region, Bangkok, Thailand, 27-28 April
- The 13th MRC WG Meeting, Lima, Peru, 7-10 June
- APEC Workshop on Marine Ecosystem Analysis and Modeling, Taipei, Chinese Taipei, 8-10 August
- APEC OMISAR Workshop on the Validation of Wave Models, Tainan, Chinese Taipei, 19-20 September
- APEC Workshop on the Development of APEC Mechanism for Integrated Coastal Management, Seoul, Korea, 21-22 September
- APEC Workshop on Assessing and Maintaining the Integrity of Existing Offshore Oil and Gas Infrastructure, Beijing, China, 9-11 October
- APEC Workshop on Integrated Ocean Management, Vancouver, Canada, 12-15 December

Next Steps

Into the 21st Century, the MRC WG will adopt more strategic approaches to conserve marine resources and safeguard the marine environment to support the sustainability of economic growth and social welfare in the APEC region.

- To strengthen the economic and technical cooperation, to facilitate expertise and information exchange, to develop human capital, as well as to encourage gender consideration and business and private sectors involvement, the WG plans to implement and undertake the following projects and activities:
  1. Management of Red Tides and Harmful Algal Blooms.
  2. Ocean Models and Information System for the APEC Region.
  5. APEC Marine Environmental Training and Education Center (AMETEC).
  6. APEC Workshop on Assessing and Maintaining the Integrity of Existing Offshore Oil and Gas Infrastructure.
  8. Workshop on Integrated Oceans Management in the APEC Region.

   - To explore closer coordination and cooperation with other APEC fora to implement the Action Plan for Sustainability of the Marine Environment.

Continued on page 26
ment the Action Plan on Sustainability of the Marine Environment and developing collaborative action identified in the Declaration of the APEC Oceans Conference and its recommendations within four general areas: Balancing Coastal Development and Resource Protection, Ensuring Sustainable Fisheries and Aquaculture, Understanding and Observing the Oceans and Seas, and Economic and Technical Cooperation related to oceans management.

2. Establishing a small task group to work by correspondence on developing a strategic approach that the MRC and Fisheries Working Groups can take in establishing a joint work program for those areas of common interest. The MRC WG will work on the strategy for a Virtual Task Force on Destructive Fishing Practices to:

- ensure that reef fish are caught without the use of destructive fishing practices;
- ensure that the harvest is sustainable; and
- implement partnerships between local fishers and fishing communities to protect their resources and ensure that they receive a fair return on their product.

3. Promoting coordinated development of APEC’s marine-related networks (OMISAR, the Sustainable Development Training and Information Network, and the EduNet Integrated Coastal Management network) to facilitate the exchange of information to support decision-makers, and the implementation of joint research and monitoring programs to sustain and conserve marine resources.

4. Holding a Partnership Market Meeting to bring together potential assistance recipients, donors (multilateral and domestic), the business/private sector and others, to facilitate partnerships in implementation of domestic plans of action for land-based sources of pollution.

5. To take concrete action to involve the business/private sector in Assessing and Maintaining the Integrity of Existing Offshore Oil and Gas Infrastructure, promoting and implementing the Global Programme of Action for the Protection of the Marine Environment from Land Based Sources of Pollution (GPA), marine ecotourism, sustainable marine aquaculture and coastal engineering, and pollution control.

The APEC Telecommunications Working Group (TEL) was formed in 1990. Under its first Chair, the United States, TEL was charged to address human resource development; technology transfer and regional cooperation; opportunities for on-site visits, observerships and fellowships; and telecommunications standardization.

TEL’s activities support the goals set out by APEC economic leaders in the 1994 Bogor Declaration and are consistent with the work programme in the 1995 Osaka Action Agenda. The work of the TEL is accomplished by four steering groups, which propose, implement and monitor projects and activities to advance the overall goals of APEC. Each steering group addresses a specific priority area: liberalization; business facilitation; development cooperation; and human resource development.

APEC Ministers responsible for the Telecommunications and Information Industry have met four times to review the work of the TEL, and to provide direction for the development of the Asia-Pacific Information Infrastructure (APII). At their 1st meeting in Seoul, Korea, in 1995, Ministers agreed on the objectives and 10 core principles for the APII which are contained in the Seoul Declaration. At the 2nd Ministerial Meeting, held in Queensland, Australia, in 1996, Ministers issued the Gold Coast Declaration which contained a Program for Action for the Telecommunications and Information sector in APEC economies. The Program for Action focuses on continuing liberalisation efforts, including endorsement of a Reference List of a Fully Liberalized Telecommunications Sector.

At the 3rd Ministerial Meeting, the Singapore Declaration was issued. A highlight of the meeting was the Ministers’ endorsement of the Mutual Recognition Arrangement for Conformity Assessment of Telecommunications Equipment, marking the first success of APEC’s Early Voluntary Sectoral Liberalization initiative. Ministers also approved a Reference Framework for Action on Electronic Commerce and a set of principles for use by economies wishing to provide universal access to telecommunications services.

The 4th Ministerial Meeting held in Cancun, Mexico in May 2000 focused on the theme of “Convergence”. The Ministers issued the Cancun Declaration which sets out a number of goals for the TEL, including placing emphasis on bridging the digital divide at the domestic, regional and international level, and the need to engage the private sector in this effort, through cooperation and collaboration. Ministers agreed to promote collaboration with the private sector to expand their participation in infrastructure investment to upgrade access to networks, especially in rural and under-served areas. Ministers also agreed to continue to encourage the development of APEC’s human resources in the digital economy, with emphasis on lifelong learning and giving priority to development of skills required to assist APEC members to establish a more pro-competitive policy and regulatory environment. APEC would focus on cooperative efforts that encourage competition in communications services, and address non-tariff barriers to trade and continue work to ensure that policy and regulatory environments better foster the uptake of e-commerce.

The cited documents from the Ministerial Meetings can be accessed through the APEC Secretariat website.

Business and Private Sector Participation

The business and private sector from many APEC member economies are actively involved in TEL activities, including all four TEL Steering Groups. Many projects are both initiated and driven solely by the private sector or in cooperation with the public sector. For example, the drive to complete the Mutual Recognition Arrangement (MRA) for telecommunications equipment has attracted significant business participation and support.

Since TEL’s 13th meeting (TEL 13) in March 1996, each meeting of the working group has included a Business-Government Dialogue, organized jointly with the Pacific Economic Cooperation Council (PECC), which provides an opportunity for the two sectors to engage in informal discussion on topics of mutual interest.

Business and private sector participation in TEL meetings and activities is strongly encouraged and welcomed. Individuals wishing to take part should approach the APEC TEL Point of Contact in their particular economy or the Chair’s Office to discuss arrangements (see page 51 for a list of APEC offices in member economies).

Achievements

In 1999, TEL finalized the APEC Framework for Telecommunications Interconnection. The Framework is a resource for use by businesses and policy-makers and aims to support secure and competitive supplies of services to users in an environment of certainty which gives investors confidence in the ongoing development of existing networks as well as the development of new networks. APEC began implementing the Mutual Recognition Arrangement on Conformity Assessment for Telecommunications Equipment in July 1999. To date, nine economies are participating in Phase I (Mutual Recognition of Test Reports) and four economies are participating in Phase II (Mutual Recognition of Equipment Certification).

In 2000, TEL completed the APEC Principles of Interconnection with 10 economies indicating their time frame for implementing each principle. Interconnection in this set of Principles refers to linking with all suppliers providing public telecommunications transport networks or services in order to establish effective any-to-any connectivity and to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier.

The TEL also completed a number of projects in 2000, including:

Continued on page 28
• A study on International Charging Arrangements for Internet Services (ICAIS).
• A Symposium for Collaborative Strategies for Multimedia and World Wide Web Production Skills Development.
• A project to support the implementation of the MRA.

Next Steps

At Cancun, Ministers directed the TEL to carry out a number of new tasks including:

• A review of its functions, structure and activities in light of a converged information communications environment.
• Encouragement of the participation of the private sector on its work.
• Accelerating the realization of the Asia Pacific Information Society (APIS), by expanding cooperative development projects.
• Continuing discussions on the “APEC Principles of Interconnection.”
• Continuing to foster discussion between private and government parties on International Charging Arrangements for Internet Services.
• Encouraging information sharing on electronic government initiatives, spectrum access issues, Internet services and critical information protection.

TEL will continue to carry out a number of on-going projects, including:

• Design and delivery of training courses to facilitate timely implementation of the Mutual Recognition Arrangement on Conformity Assessment for Telecommunications Equipment.
• Distance Learning Training Courses project and APEC Distance Learning project on Basic Telecommunication Technology.
• Interconnection Resources project to give business and governments practical information and a simple methodology to make negotiations and interconnection policy faster and easier.
• A Techno-economic Modeling project which aims to integrate decision-making tools to help regulators, management teams and network engineers make sound decisions.

Tourism

The Tourism Working Group (TWG) was formed in 1991 based on the recognition that the tourism industry is of growing importance in promoting economic growth and social development in the Asia-Pacific region. The TWG brings together tourism administrators to share information, exchange views and develop areas of cooperation on trade and policies. The current Chair is Brunei Darussalam.

Business and Private Sector Participation

Participation by the business and private sector has been channeled through the active involvement of representative travel organizations such as the Pacific Asia Travel Association (PATA), the World Travel and Tourism Council (WTTC), and the World Tourism Organization (WTO). On 29 April 2000, Hong Kong, China hosted the 1st APEC Tourism Forum, “A Charter for the New Millennium.” The proceedings provided an occasion for fruitful dialogue on the draft APEC Tourism Charter between APEC member economies’ government representatives and key players from the region’s tourism business/private sector.

The importance of cooperation with the business/private sector was reiterated at the Senior Officials’ Meeting held prior to the First APEC Tourism Ministerial Meeting, as well as during the last Tourism Working Group Meeting. Both events acknowledged the pivotal role of public-private partnership in promoting tourism and enhancing regional exchange in this field. In this context, the President of the WTTC and the Chief Executive of PATA were invited to the First Tourism Ministerial Meeting for an informal dialogue on the matter of public-private partnership. WTTC and PATA made presentations respectively on the critical role of close public-private partnership for the sustainable development of tourism in the APEC Region in the 21st Century. The Meeting valued the informal dialogue as a useful vehicle for developing new links between the governmental and private sectors. Moreover, it was agreed that the dialogue and cooperation between both sectors should be continued, expanded and deepened for the development of tourism in the APEC Region.

Achievements

The TWG has made significant strides in further defining its agenda and identifying priority issues during last year and will pursue the accomplishment of more tasks during 2000. The TWG has compiled a comprehensive inventory of barriers to travel in the APEC region and agreed to a series of collective actions to address impediments to tourism growth. Its work program includes activities in the areas of Trade and Investment Liberalization and Facilitation, and Economic and Technical Cooperation.

One major outcome of the TWG has been the publication of The Economic Impact of Travel and Tourism Development in the APEC Region. This report was the product of a jointly funded project between the APEC Tourism Working Group and the WTTC to examine the economic impact and potential of travel and tourism in the APEC region. The report provides the first comprehensive analysis of the economic impact of travel and tourism in the APEC region, together with projections to the year 2010. It highlights the enormous importance of the sector to the region’s economy and the exciting potential for continuing economic and employment growth, which this industry offers. Also, this report represents a significant example of cooperation between APEC and the private sector as represented through the WTTC. An update, with revised figures and statistics will be produced, incorporating the data that becomes available after the Asian financial crisis.

In 2000, the TWG produced two new publications with a focus on tourism, the community and human resource development. These are the Best Cases on Tourism and Cultural Festivals in APEC Member Economies and the Tourism Occupational Skill Standards Development in the APEC Region – Bridging Project. In 2001, the TWG will produce a Report on Best Practices in Sports and Recreation for Tourism Development within APEC Economies.

The APEC Secretariat website contains all relevant TWG documents and publications for public viewing and downloading.

THE SEOUL DECLARATION ON AN APEC TOURISM CHARTER

During its two meetings held in 1999 (Manzanillo, Mexico and Lima, Peru), and in Hong Kong, China in April 2000, the TWG was active in the development of an APEC Tourism Charter.

The Seoul Declaration on an APEC Tourism Charter was adopted by APEC Tourism Ministers during their 1st Ministerial Meeting scheduled for 5-7 July 2000 in Seoul, Korea. The document reflects a collective commitment to improve the economic, cultural, social and environmental well being of APEC member economies through tourism.

The Charter recognizes the significant contribution tourism makes to APEC economies and the overall goals of APEC. It serves as a Statement of Ministerial Purposes and Intent to further develop this contribution and acknowledge tourism as a key vehicle for achieving positive outcomes. The policy goals and processes adopted in the Charter are consistent with the goals for free and open trade and investment established in the Bogor Declaration and the general principles for trade liberalization and economic and technical cooperation established in the Osaka Action Agenda. Furthermore, the Charter responds to the Auckland Challenge in order to maintain momentum and deliver on the commitment of APEC and take into account the “Framework for the Integration of Women in APEC.”

The Seoul Declaration on an APEC Tourism Charter includes measures that: (1) will remove impediments to tourism business and investment; (2) will increase mobility of visitors and demand for tourism goods and services in the APEC Region; (3) sustainably manage tourism outcomes and impacts; and (4) enhance recognition and understanding of tourism as a vehicle for economic and social development.

Commitment to the policy goals

Continued on page 30
in the Charter will be demonstrated by submitting and implementing individual and collective action plans and by identifying issues for consideration by other relevant APEC fora. Ministers directed the TWG to enhance working relationships with other APEC fora, in particular, on issues regarding human resources development; mobility of people; services; transportation; customs procedures and other relevant issues, for the purpose of the implementation of the APEC Tourism Charter.

Ministers adopted the following Deliverables for the Tourism Sector in APEC: “Sustainable Management of Tourism Outcomes”; “Establishment of a Tourism Information Network” and the “Tourism Satellite Accounts”. Ministers agreed to take immediate actions for their implementation as of the next TWG Meeting scheduled for October 2000 in Morelia, Mexico.

Mexico will host the Second Meeting for APEC Tourism Ministers in 2002.

Next Steps

The TWG’s work program will focus on:

• Delivering on the Four Policy Goals agreed to by APEC Tourism Ministers

• Submitting and implementing individual and collective action plans:
  - Actions on the three deliverables agreed to by APEC Tourism Ministers
  - Preparation for the 2nd APEC Tourism Forum, Malaysia 2001

• Facilitating of tourism movements and removal of travel barriers, including the identification of all impediments to travel movements; identification and selection of manageable impediments for possible elimination or facilitation; and promotion of the economic importance of tourism in APEC economies.

• Promoting of tourism as a means to achieve sustainable economic development focusing on best business practices.

• Developing human resources in the tourism industry through standardization of skills, identification of training needs over a projected period, and promotion of best business practices.

• Exchanging tourism information which focuses on: enhancing cooperation between the public sector and the business/private sector; establishment of effective means to exchange relevant information; support to cooperative programs; and access to communication networks.

• Promoting further dialogue and information sharing exercises with other APEC fora, such as the Group on Services (GOS) and the Transportation Working Group (TPT), amongst others.
Trade Promotion

The Working Group on Trade Promotion (WGTP) first met in Seoul in June 1990. Its objective is to contribute to sustained economic development and improved standard of living of the people of the Asia-Pacific region by promoting the dynamism of intra-regional trade through a range of activities. The WGTP’s work centers on trade promotion activities, trade financing, trade skills and training, trade information, and facilitating business cooperation between the private sector and public agencies including trade promotion organizations.

The WGTP has noticed the rapid development of e-commerce and increasing importance of logistic management in contemporary trade. These issues were discussed at the 12th WGTP Meeting held in Lima, Peru, 6-8 March 2000. Development of e-commerce projects, promotion of technology trade and the implementation of a concrete project on logistic management were also discussed.

Business and Private Sector Participation

The business/private sector participates in trade promotion activities such as “APEC International Trade Fairs”, building up homepages on APECNet and other trade promotion related training programs.

The fairs provide new business opportunities and generate sales for the products and services of the business/private sector as well as networking opportunities among themselves and government officials of member economies. The 4th APEC International Trade Fair was held in Indonesia in October 2000.

The WGTP encouragement to business groups to establish a network among themselves helped launch the APECNet, which contains information on the WGTP and its activities, and allows the business community to search for business opportunities (including business matching services) in member economies, by posting inquiries and accessing member economies’ homepages.

In WGTP trade promotion related training programs, there is always great private/business participation.

Achievements

Major achievements in 2000 include:

- Logistics Management Seminar, April 2000, Chinese Taipei
- Training for Building Skills on Marketing Strategies, June 2000, Indonesia

Next Steps

The WGTP will continue to develop, support and facilitate intra-regional trade in goods and services by actively encouraging the participation of the business/private sector and trade promotion organization in the working group’s activities, as well as improving trade promotion activities through the sharing of information and knowledge on trade development activities and techniques.

For 2000, the WGTP will organize “The Seminar on Product Packaging by Japan” and “4th APEC Trade Fair with Business Consultation Forum by Indonesia”.

Transportation

The Transportation Working Group (TPT-WG) fosters economic development in the Asia-Pacific region through recommendations to increase the efficiency, sustainability and safety of the regional transportation system. The vast distances that characterize the Asia-Pacific region and the dynamic growth of its economies highlight the importance of an efficient transportation system to guarantee further development.

The TPT-WG is organised into three 'steering committees' covering its areas of focus: (1) more competitive transportation industry (including infrastructure); (2) safe and environment-friendly transportation systems (including new technologies); and (3) human resources development. Reporting to each of the steering committees are expert and project groups, which undertake much of the detailed work on individual projects and activities.

Business and Private Sector Participation

Member economies regularly include business representatives as part of their delegations. TPT-WG meetings often include one-day seminars on transportation topics, to which business representatives are invited. For example, a 1999 seminar on electronic commerce attracted considerable private sector participation. In October 2000, seminars on earthquake preparedness at ports, and road vehicle safety were held.

The following organisations are approved guests of the TPT-WG:

- International Civil Aviation Organisation (ICAO);
- International Motorcycle Manufacturers Association (IMMA);
- International Maritime Organisation (IMO);
- Intermodal Transport Association (IMTA);
- International Organisation of Motor Vehicle Manufacturers (OICA);
- Federation International de l’Automobile (FIA); and
- Pacific Region Airports Council International (ACI).

Individual economies consult regularly with their private sector and the TPT-WG has a standing contact point with PECC’s Transport Committee.

Achievements

Major achievements in 1999 and 2000 include:

- An interactive web-based Port Database to which all economies are encouraged to contribute data.
- Establishment of a “Virtual Centre for Transportation Research, Development and Education” website.
- Completion of a compendium of success stories on the increased participation of women in the transportation sector.
- Selection and hiring of a consultant to ascertain the existing standards of training facilities, instructors, examiners and curriculum for seafarers throughout the APEC region’s existing maritime training institutions; and training equipment in each member economy in order to improve the quality of seafarers in the region.
- The development and dissemination of a Best Practices Manual to address Urban Transport Problems in the APEC region.
- A Forum on Intermodalism and Satellite-Based Technologies.
- Since its inception in 1994, the Road Transport Harmonisation Project (RTHP) has led to many concrete actions with respect to the harmonisation of vehicle standards. Many economies have decided to adopt United Nations Economic Commission for Europe (UN-ECE) regulations regarding automotive product. In 1998 the United States signed the UN/ECE 1998 Agreement on Global Technical Regulations and Japan signed the UN/ECE 1958 Agreement (concerning the adoption of Uniform Conditions of Approval for Motor Vehicle Equipment and Parts). Other APEC economies have advised of their intentions to sign one or both of these agreements.
- Establishment of a “Transportation Security Initiative,” to provide for a mechanism for increased cooperation and communication on transportation security within the APEC region. An aviation security working meeting was held in June 2000.
- Completion of a project “Safer Shipping in the Asia Pacific Region,” which will form the basis for future work in the Maritime Safety Experts Group.

Next Steps

- 13 APEC economies either currently participate or have indicated their intention to participate in the activities of UN/ECE WP29 thus demonstrating their commitment towards road vehicle safety standards harmonisation. A seminar on Road Transport Harmonisation was held in Miyazaki, Japan, 18 October 2000.
- Developing examples and case studies of the benefits of regulatory and other institutional changes directed to maritime trade liberalisation and facilitation to demonstrate how this can be achieved and the benefits which will flow from trade liberalisation and facilitation.
- A symposium on the “Role of New Technologies and Intermodal Transportation Management in Facilitating Asia-Pacific Trade” will be held in 2001.
- Consideration of measures to promote the mutual recognition of transport professional qualifications.
- Development of a regional action plan for Global Navigation Satellite Systems implementation, in consultation with relevant international bodies such as ICAO and IMO.
- A project on the identification of needed intermodal skills and development of required training programmes will suggest methods to ensure how these skills can be supplied to the workforces of

Continued on page 33
APEC economies. 
- A review of the implementation of each of the TPT-WG’s eight recommendations for more competitive air services, taking account of the benefits and difficulties of implementation; and work to identify further steps to liberalize air services on a voluntary basis. Two possible options are the exploration of a plurilateral arrangement by like-minded APEC economies, and the widening of the eight existing recommendations for more competitive air services.
- The 18th meeting of the TPT-WG took place at Miyazaki, Japan from 16-20 October 2000, with the 19th meeting to be hosted by Brunei Darussalam in April 2001. The TPT WG is preparing the 3rd Transportation Ministerial Meeting to be held in Lima, Peru in June 2001 (following previous meetings in 1995 and 1997).

Group on Small and Medium Enterprises

The Ad Hoc Policy Level Group on SMEs (PLGSME) was established in February 1995 following a recommendation of the 1st SME Ministers Meeting held in Osaka in October 1994. Its original mandate was for two years. However, it has been extended twice: the first time, in 1996 and the second, just recently, in August 1998, thereby extending its mandate up to the year 2001. The PLGSME last met in Bandar Seri Begawan, Brunei Darussalam, on 20 June 2000. It discussed, among other things, the ongoing PLGSME projects, the self-review of the group, and the implementation of the Five-Year Action Plan for SMEs (SPAN). It likewise discussed preparations for the 7th SME Ministerial Meeting.

The 4th SME Ministers Meeting in Ottawa, September 1997 had committed their economies to create business environments that will address the special needs of SMEs. The Ministers endorsed the Framework for APEC SME Activities developed by the PLGSME for consideration by all APEC fora in designing and implementing SME-related activities. Building on the 1997 Framework, the 5th SME Ministers Meeting in Kuala Lumpur, Malaysia, 7-8 September 1998, endorsed an Integrated Plan of Action for SME Development (SPAN) which serves as a set of broad guidelines for SME development as well as plan for future action at the individual economy level and collaborative efforts at the APEC level.

The 6th SME Ministerial Meeting was held in Christchurch, New Zealand, 27-28 April 1999. The Ministerial Meeting was held parallel to the Business Forum. The two meetings discussed four similar key policy issues, namely: Education, Capital Markets, Trade Barriers/Compliance Costs and Responding to the Regional Financial Crisis, while the Business Forum also discussed the theme of Enhancing the Business Linkages.

Next Steps

The PLGSME will continue as a policy-level group but will focus more on policy-related issues and long-term strategic plans and activities. In this regard, it will collaborate with other APEC fora to ensure that the
perspectives of the SPAN are developed in a coordinated and efficient manner. It will also work closely with other APEC fora in the area of addressing the impact of financial instability on SMEs and in electronic commerce. It will further encourage private/business sector participation in its work.

Agricultural Technical Cooperation Experts Group

In recognition of the importance of work on agricultural technical cooperation, the Agricultural Technical Cooperation Experts’ Group (ATCEG) was established in November 1996 as a formal APEC body with a continuing role. Prior to that decision, two meetings of experts had been held. The meetings (in Chinese Taipei, 1995; and Australia, 1996) agreed on a work program of joint activities to enhance agriculture’s contribution to the region’s economic growth and social well-being and developed a framework for undertaking those cooperative activities.

In accordance with the directions from New Zealand SOM I in 1999, the ATC has expanded the scope of its priority areas incorporating part of FEEEP joint actions: (a) food and agricultural related research and development; (b) trade and other matters; and (c) food and agricultural related environmental issues. Accordingly, the ATC’s seven sub-groups were renamed to reflect these developments at the 3rd ATC meeting held in June 1999 in Japan. The sub-groups are: Conservation and Utilization of Plant and Animal Genetic Resources; Research, Development and Extension of Agricultural Biotechnology; Production, Processing, Marketing, Distribution and Consumption of Agricultural Products; Plant and Animal Quarantine and Pest Management; Cooperative Development of Agricultural Finance System; Agricultural Technology Transfer and Training; Sustainable Agriculture and Related Environmental Issues.

SOM III in 2001 agreed on the renaming of the ATCEG to ATC Working Group in an attempt to rationalize various names of APEC fora, which awaits a Ministers’ endorsement.

Achievements

Highlights of the ATC’s accomplishments in 2000 include:

- **Implementation of APEC Food System.** The ATC serves as a main body of APEC in undertaking recommendations in APEC food system report. In accordance with the Leaders’ instruction, the ATC submitted a report on progress in the implementation of relevant recommendations.

- **The ATCEG’s Biotechnology Report.** In response to Ministers’ request in Auckland in 1999, the ATC prepared and submitted a report on biotechnology to SOM II and Trade Ministers meeting in Darwin. The report deals with the past performance, current state and recommendations for future action in biotechnology in agriculture. The recommendations, which were endorsed by Trade Ministers, include:
  - Note the ATCEG past and present work in the area of biotechnology and endorse the ATCEG Report on Biotechnology.
  - Support the ATCEG work program on biotechnology for year 2000 and the medium-term, as
listed in part III of this report, including initiatives such as:

- a. capacity building;
- b. facilitation of improved regional coordination and efficient use of risk assessment resources;
- c. completion of a Best Practices Guide to communicating agricultural biotechnology;
- d. updating the APEC internet site related to agricultural biotechnology;
- e. discussion of key international activities such as the implementation of the Cartagena Protocol on Biosafety;
- f. development of case studies on the release of crops in centers of origin and diversity; and
- g. addressing issues related to intellectual property rights for transgenic crops and livestock of specific regional interests in collaboration with the Intellectual Property Rights Experts Group.

- Underscore the importance of public awareness and understanding of biotechnology.

- Urge APEC member economies to:
  - a. ensure a transparent, science-based approach to the safe introduction and use of biotechnology products, recognizing the important contribution that biotechnology can make to the society;
  - b. enhance their efforts to address public information needs with a view to increasing public awareness and understanding of agricultural biotechnology; and
  - c. actively participate in discussions at relevant international fora where international rules, standards, guidelines or recommendations, or research, are being contemplated.

- Support Canada’s proposal for year 2001 funding of the workshop to address these topics under the Trade and Investment Liberalization Facilitation (TLF) special account. This funding would provide a focus for the outcomes of the Vancouver 2000 meeting on agricultural biotechnology, including initiatives related to technical cooperation and capacity building.

- Workshop on Agricultural Biotechnology (Vancouver, Canada, October 2000) As a concrete step to implement the biotechnology report, the ATCEG organized the workshop in biotechnology. The workshop consisted of two sessions: managing technical capacity, safety and communications into the 21st century and environmental safety and food safety. It aimed to exchange information and develop scientifically sound national process and procedures for evaluating biotechnology products. Its major outcomes include Best Practice Guide to communicating agricultural biotechnology, review of different approaches to risk management and recommendations for a comprehensive communication strategy.

- Workshop on Conservation and Utilization of Plant and Animal Genetic Resources (Taichung, Chinese Taipei, October 2000) This workshop focussed on analysis of the current status of conservation and utilization of aquatic genetic resources in the APEC region and sharing expertise on conventional and innovative technologies (confined to biotechnology and cryopreservation) for the conservation and utilization of plant, animal and aquatic resources among member economies.

- Training on Agricultural Finance (Tokyo, Japan, September 2000) The training aims at enhancing the understanding of the role of agricultural finance, constitution of agricultural cooperative systems and their saving and loan system and policy in Japan.

- Workshop on Alternative Quarantine Treatments and Post-Harvest Handling Methods (Hawaii, USA, May 2000) The objectives of the Workshop are to exchange information on alternative quarantine treatments and post-harvest handling methods and to exchange information to explore scientific issues related to processing of agricultural products.

- Workshop on Animal Health Risk Analysis (Brisbane, Australia, April 2000) The objectives of the workshop are to enhance the knowledge of and understanding within member economies of the process involved in developing health import risk analysis as well as of principles the SPS agreement and other standards and guidelines used in import risk analysis.

- Symposium on Rural Issues in the APEC region (Tokyo, Japan, March 2000) The symposium was held to implement the FEEEP joint action. In this symposium, the importance of rural areas in national socio-economy and sustainable agriculture in rural revitalization was reconfirmed, and the necessity for continuing discussion on rural revitalization in the ATCEG was recognized.

- Workshop on Agricultural Technology Transfer (Jakarta, Indonesia, January 2000) The workshop aimed to enhance the understanding of the current status of agricultural technology transfer and training activities in terms of respective strengths, weakness, opportunities and threats.

**Next Steps**

The ATC will take follow-ups to implement the recommendations in the biotechnology report. Another workshop in biotechnology is planned in 2001, based on the outcomes of the 2000 workshop. The group will continue to undertake programs responding to the tasks of the recommendations of APEC food system.

In the area of conservation and utilization of plant and animal genetic resources, the ATC will hold a workshop on genetic information management systems in October 2001. This workshop aims to identify possible...
The APEC Study Centers (ASC) were established as part of the APEC Leaders’ Education Initiative in 1993. Currently, there are ASCs in 18 member economies, comprising of some 100 of the best universities, research centres and centres of academic excellence across the APEC region. A full contact list is available from the APEC website. APEC member economies participate in the Annual ASC Consortium meetings (usually held in the economy chairing APEC in that particular year) and other bilateral or multilateral research activities in accordance with their areas of interests. The mission of the ASC Consortium is to:

- Promote cooperation in higher education and advanced research, and facilitate cultural and intellectual exchanges in the Asia Pacific region, recognizing the importance of educational links in developing a sense of community and fostering understanding of the diversity of the region.
- Assist the APEC process by undertaking advanced, collaborative, interdisciplinary and policy-relevant research on issues important to APEC from an independent and longer-term perspective.
- Encourage student, faculty and research exchanges among APEC economies and promote training and other educational programs that address regional needs.
- Encourage the informed participation of other sectors of society, especially youth, the private sector, NGOs, and the media, in dialogues and study relating to APEC cooperation.

## Business and Private Sector Participation

The ASCs represent important academic communities in respective APEC economies and as such the consortium is almost entirely composed of scholars. The business/private sector is not directly involved in the activities of the ASC Consortium.

## Achievements

The APEC 2000 Study Centre Consortium (ASCC) was held at the International Conference Centre, Brunei Darussalam on 26-28 May 2000. Delegates were present from all member APEC economies, except Papua New Guinea. The APEC Secretariat and PECC were also represented at the Meeting. The attendance of so many delegates, given the growth in APEC membership in recent years, marks a milestone in the history of the ASCC as new members appreciate the importance of study and research to the APEC process.

The Brunei ASCC was unique in that it was a combined conference with the PECC Trade Policy Forum, and held in conjunction the APEC Human Resources Development Working Group. The Conference culminated in a Joint Dialogue on Human Resources Development on 29 May 2000.

The joint ASCC-TPF Conference as an experiment in joint dialogue, was an outstanding success. With over 140 delegates combined with vibrant and engaging sessions, delegate participation and interest remained high. Issues included The Emergence of Regional Trading Arrangements, The New Economy and the Asia Pacific, Challenges to the Trading System and the Implications for the Asia Pacific.

The aim of the ASC-TPF Conference was to maximize the synergy between the two groups bringing together their experience and knowledge to make a strong impact into the APEC process. The forum opened discussion between academics, policy makers and the private sector on how the region should best respond to the challenges of regional trade and the changes in the trading mechanisms.

The conference began with a brief review of regional growth in the aftermath of the financial crisis. While the macro-economic and development figures have improved, recovery was seen to be generally slow but with continuing financial and investment risk while restructuring is taking place. As trade issues dominated this year’s Conference, so Regional Trade Agreements in particular received focused attention...
attention. Issues of open regionalism, APEC targets of free trade and the ambiguity that arises from WTO Article 24 were discussed. There was a general feeling that there is a need for the development of guiding principles for sub-regional initiatives. In this context, the recent developments in the Japan-Korean Trade Agreement were discussed. While Japan and Korea have developed free trade agreements with other economies; this new Japan-Korea initiative has been met with quite some enthusiasm. Full presentation of these issues is available from the Conference proceedings and can be found through the APEC Secretariat website.

**APIAN**

The Asia Pacific International Assessment Network (APIAN) was initiated by the APEC Study Centre, University of California San Diego, and launched at the ASC in Auckland in 1999. The idea of incorporating the APEC Study Centres in international research collaboration came to fruition at this year’s Conference with all Study Centres agreeing in principle to participate or support the distribution and collation of survey material on trade management and related issues. The aim is to survey and assess how well APEC economies are at transforming and implementing ideas arising from the APEC resolutions. While there is a questionnaire template made available to study coordinators, there is some degree of flexibility in the detail and even the issues to be addressed in the survey. It is the intention of the Issue Coordinators to meet in Singapore in October 2000 and to draft a report to be made available by the end of 2000.

The APIAN effort to coordinate this broad and international survey is seen as a major step forward in collaboration and a unifying approach to APEC research of macro-socioeconomic issues of particular concern to the APEC process.

**New Study Centres Consortiums**

The Brunei ASCC attracted delegates from nearly all member APEC economies, comprising more than 100 different universities and research centres. While the activities of the Study Centres continue to be numerous, the growth of several new Study Centres Consortiums deserves mention.

i. **The Malaysian APEC Study Centres**

The Malaysian ASCs function as a consortium of seven universities, related institutions, and research institutions. Its secretariat is located at the Institute of Malaysia. While the Malaysian ASC was established during the Asian financial crisis, and received no direct funding from the Malaysian Government, the APEC related activities have been numerous. Research projects include “Globalization of the Malaysian Economy,” “Technology Transfer and Income Distribution in Malaysia,” and “Democratization in Southeast Asia”.

ii. **The Mexico APEC Study Centre**

The Mexico ASC at El Colegio de Mexico is a founding member of a domestic and regional Latin American research network of APEC Study Centres. Mexico already accounts for a second ASC in the University of Colima and with the coming hosting of the 2002 APEC meetings in Mexico, it is expected that activities will increase. With the El Colegio de Mexico’s leadership in Asian Studies since 1964, the ASC, located in the Centre for Asian and African Studies, is the first point of contact in Latin America for Asia and APEC related issues in the academic field. Indeed, the activities of the El Colegio de Mexico in consultancy for private and government bodies in seminars and publications has made them the leading institution in Mexico on APEC affairs.

iii. **The Peruvian APEC Study Centres**

In 1997, eight academic institutions jointly established a Peruvian Network for Asia Pacific Studies (REDAP). The main objective of REDAP was to support Peru’s effort to become an active member of APEC. At the end of 1999, the Peruvian SOM invited the network institutions to become APEC Study Centres.

Peru has only recently joined APEC and its authorities have shown much interest in active participation of the academic sector not only in PECC activities but also in APEC fora. It is expected that the output of the Peruvian ASCs will increase in the near future as they become better organized and engage in task groups as well as APEC related research.

Other ASCs continue to be very active, for examples, with Australia, Japan, Korea, New Zealand, Chinese Taipei and the US, continuing to manage the research programs and develop APEC activities. Of particular interest, the Australian Study Centre is involved in providing assistance and training to China as it prepares for APEC 2001. Two Chinese officials have visited the Monash University, home of the Australian Study Centre, attending a special program of preparation.

**Highlights of APEC 2000 ASCC**

In the context of the joint ASC-TPF Conference, the management of regional trading arrangements, and the ongoing development of trading arrangements, were principle concerns. Some of the themes developed included:

- Building consensus for a new round of trade negotiations comprising a balance of agenda items and complimentary activities in the WTO as well as APEC.
- The importance of the development dimension of trade and the need to find compatibility between openness, growth and accountability. While openness promises to bring the most benefit to member economies, a comprehensive approach is needed that incorporates and considers institutional, human and other resources as part of the liberalization package.
- The role of regional trading arrangements in the trading system for the region. As new RTAs come into play, there is a need to consider again the nature of open liberalization and the consistency between RTAs and liberalization policies.

Further to these discussions, the Special Dialogue between the ASC, TPF and HRD Working Group proved to be of particular significance as the idea of champion issues for APEC focus
on and develop was tabled. Since APEC’s conception, many issues have been discussed and much progress has been made, but it was suggested that it is perhaps time to identify several issues to be championed to bring APEC resources to bear on achieving a number of desired outcomes.

Certainly, the collaborative effort to conduct surveys of APEC implementation in member economies by the ASCC is an adventurous undertaking. But the ASCC continues to look for ways to contribute by way of its research and deliberations into the APEC process.

Next Steps

• The Consortium is to continue to provide a forum for the reporting and peer review among the consortium members of ongoing research on a wide range of APEC issues.

• The present status of the ASC provides the most realistic basis for fulfillment by the ASC of their function of providing an independent source of ideas, research and analysis on APEC-related issues.

• First APIAN Network Report will be produced in time of the APEC Leaders Meeting in November 2000.

• China will host the ASC Consortium meeting in 2001.

The APEC Leaders’ Economic Vision Statement at Blake Island, Seattle, USA in November 1993 stated, “Our environment is improved as we protect the quality of our air, water and green spaces and manage our energy resources and renewable resources to ensure sustainable growth and provide a more secure future for our people”. This statement provides the mandate for APEC’s work on sustainable development.

Ministers of the Environment met in Canada in March 1994 and adopted an Environmental Vision Statement and a Framework of Principles for integrating economic and environment issues. The APEC Economic Leaders’ Declaration for Action issued during the Leaders’ Meeting in Osaka in November 1995 reaffirmed the integration of environment and sustainable development into APEC activities. The APEC Economic Leaders’ Declaration in Vancouver in November 1997 stated that “Achieving sustainable development at the heart of APEC’s mandate”, and reiterated their commitment at their 1998 Meeting in Kuala Lumpur: “... to advance sustainable development across the entire spectrum of our workplan ...”.

Business and Private Sector Participation

At the Environment Ministers’ Meeting for Sustainable Development in Toronto, Canada (June 1997), an APEC Business and Municipal Leaders’ Forum on Sustainable Cities was held. The meeting attracted participants from all APEC economies and provided an opportunity for APEC business and municipal leaders to give input into the deliberations of the Environment Ministers’ Meeting. The three-day forum on Sustainable Cities incorporated eight workshops: air pollution, water and wastewater management; waste management; cleaner production; public-private partnerships; privatization of environmental services; policy and regulatory reform; and financing strategies.

Achievements

The APEC Ministers in 1996 decided that the APEC Senior Officials were to prepare an annual review of activities of sustainable development in APEC, to monitor the development and implementation of sustainable development initiatives as well as to coordinate and provide guidance to APEC fora. There have been three annual reviews, 1997, 1998 and 1999 reviews. Through the reviews, it was found that the number, scope and significance of the APEC activities in sustainable development being undertaken are considerable, indicating that the issue is being addressed fairly broadly across APEC. Almost all the APEC fora have demonstrated responsiveness to sustainable development concern, and in several cases, fora were working together to jointly implement sustainable development activities.

Next Steps

The Senior Officials will review the APEC activities in sustainable development regularly in consultation with Chairs and Lead Shepherds of other APEC fora as well as the APEC Senior Economic and Environment officials.

In addition, as one of the six priorities of the Manila Framework is “Safeguarding the Quality of Life through Environmentally Sound Growth,” the ECOTECH Sub-Committee will review the progress of this cross-cutting ECOTECH theme and report its implementation across APEC fora to the Ministers this year.

Gender Integration

The SOM, in strengthening the institutional capacity of the implementation of the Framework, established the SOM Ad Hoc Advisory Group on Gender Integration (AGGI). The role of the AGGI is to provide gender advice and expertise to SOM, and other APEC fora on the implementation of the Framework. The Group will complement the responsibility and accountability of individual APEC fora for the implementation of the Framework.

The Ad Hoc Advisory Group was tasked by the Framework with four critical tasks:

- The publication, dissemination and distribution of the Framework for the Integration of Women in APEC;
- Holding Gender Information Sessions (GIS): the AGGI has developed gender information sessions for the APEC fora on the Framework and process of implementation of its elements. GIS have been undertaken by 12 APEC fora, including SOM and the APEC Secretariat;
- Gender Criteria for use in APEC project proposals, approval and evaluation report had been developed for incorporation into APEC project proposals, approvals and evaluation forms. These Gender Criteria have been incorporated into the revised APEC Project Proposals and Evaluations Forms;
- Gender Mainstreaming Good Practices Book: AGGI is overseeing the compilation of good practices of gender integration in APEC fora and economies. These good practices link the work of various fora and provide a practical source of case studies on gender analyses and mainstreaming.

To complement the four critical tasks, AGGI is also undertaking a sex-disaggregated data project. A two-week workshop entitled “Analysis and Evaluation of Gender Statistics” will provide training on methods and procedures to evaluate the quality and relevance of sex-disaggregated data and how to produce a brief report using these data which can then be used to assist policy makers in decision making.

Next Steps

AGGI is to provide GIS to the other APEC fora who have not had one as well as to provide advice to all APEC fora on further implementation of the Framework for the Integration of Women in APEC.

Sustainable Economic Recovery

Throughout the APEC region, signs of economic recovery from the 1997-98 financial crisis continue to spread. Most economies are well on their way to recovery and many are returning to substantial levels of economic growth. The main focus of APEC members in the year 2000 has been to ensure that this recovery continues and strengthens. There is a concern by some that the recovery may lead to complacency and that needed reforms may not be undertaken. APEC members hope to guard against that possibility and instead implement the changes in economic and financial infrastructure to make a new crisis less likely. The recent high oil prices have reminded economic policy-makers that their economies are still very much reliant on imported oil and susceptible to external economic shocks. Should oil prices be sustained at these levels, there is growing concern about the impact on economic growth and stability. This concern was reflected in the communiqué which the APEC Finance Ministers issued at the end of their 9-10 September meeting in Brunei Darussalam, which is summarized below.

THE APEC LEADERS

However, it is best first to step back and recall the outcome of the September 1999 Auckland meeting of Economic Leaders. At that meeting, Leaders resolved to work together to support a sustained recovery in the region and agreed to strengthen their markets by:

- providing greater transparency and predictability in corporate and public sector governance;
- enhancing the role of competition to improve efficiency and broaden participation by enterprises;
- improving the quality of regulation and the capacity of regulators to design and implement policies for sustainable growth;
- reducing compliance costs and facilitating business growth; and
- building a favorable regional and international environment for free and fair competition.

Leaders also welcomed the work undertaken in several fora to strengthen the international financial system and supported continuing it in a process involving both industrialized and emerging market economies. Leaders encouraged the efforts of Finance Ministers to strengthen domestic markets and secure the foundation for the return of capital to the region by:

- enhanced supervision of financial markets, including through improved training of supervisors and regulators;
- developing domestic bond markets based on the “Compendium of Sound Practices;” and
- developing and applying agreed corporate governance principles.

Leaders also welcomed the recommendations from the APEC Business Advisory Council and thanked the members of ABAC for their contribution in areas such as capacity building, finance, food, e-commerce, and air services.

THE APEC LEADERS

MEET IN BRUNEI DARUSSALAM

The APEC Finance Ministers process continues to advance its work on collaborative initiatives to promote development of regional financial and capital markets, and to support freer and stable capital flows in Asia-Pacific.

Reflecting closer coordination with the rest of APEC, Finance Ministers now meet in the APEC host economy during the same year as that economy holds the APEC Chair. At their September 2000 meeting in Bandar Seri Begawan, Brunei Darussalam, Finance Ministers welcomed the significant progress the cooperative growth strategy has yielded in stabilizing financial markets and improving the economic outlook. However, they also stressed that continued strengthening of macroeconomic fundamentals and the pursuit of structural reforms are needed to secure financial stability and sustainable economic growth in the region. Finance Ministers also:

- welcomed the progress made in developing international stan-
dards, codes and best practice guidelines in a wide range of areas, including regulation and supervision of banking, securities, and insurance; corporate governance; economic data dissemination; and transparency of monetary, financial and fiscal policies;
- called on all International Financial Institutions to continue their efforts to strengthen their own governance and accountability, and to improve transparency; and
- asserted that private sector participation in the prevention and resolution of crises remains a major challenge. In that regard, the Finance Ministers tasked their Deputies to work with business/private sector groups such as the APEC Financiers Group, ABAC and the Pacific Economic Cooperation Council (PECC) to study business recommendations for strengthening financial markets and institutions and implementing them in on-going work.

Finance Ministers also reviewed progress on their various collaborative initiatives to strengthen regional financial and capital markets and to support freer and more stable capital flows in the Asia-Pacific region. Work has proceeded on a range of initiatives, as described below:

- Promoting freer and more stable capital flows. The Finance Ministers resolved to continue policy reforms that enable economies to take advantage of the opportunities available in international capital markets. They resolved to establish within APEC a voluntary policy dialogue on strengthening financial markets, particularly focusing on issues related to the implementation of international financial standards and codes.
- Strengthening financial systems. Ministers instructed their Deputies to undertake a study of APEC economies’ experience in managing bank failures, with the goal of developing a set of recommendations based on case studies that illustrate the various lessons drawn from the management of Continued on page 42
bank failures in the APEC region. The Ministers welcomed the progress made in strengthening financial systems through the development of training programs for banking supervisors and securities regulators. They resolved to extend this initiative for a further two years, focusing on more intensive work to assist national regulatory organizations to implement model curricula, and continued provision of regional courses. Ministers also welcomed Australia’s offer to lead a three-year project on managing regulatory change in life insurance and pensions.

- **Strengthening economic and corporate governance.** Ministers welcomed the efforts of the OECD and the World Bank to raise awareness of and the commitment to corporate governance reforms in the region through Roundtable discussions. They announced that APEC will undertake a policy dialogue on strengthening corporate governance in the APEC region, starting in early 2001. The Ministers have also formed a taskforce on company accounting and financial reporting to improve the quality of financial disclosure and auditing practices in APEC economies. Ministers also recognized the importance of strengthening transparency and disclosure standards for all market participants and look forward to the report on the results of the survey on Credit Rating Agencies that has been undertaken.

- **Fighting financial crimes.** Ministers welcomed the agreement to establish an APEC working group that would conduct a survey of the domestic legal and regulatory frameworks for fighting financial crime, building on work already completed by APEC members of the Asia-Pacific Group on Money Laundering. Ministers also encouraged the International Financial Institutions to work further with their members in developing sound financial and capital markets and good governance.

- **Improving social safety nets.** The on-going review of administration of social safety nets in the APEC region has developed three main themes: (1) the need for adequate pre-crisis safety net planning; (2) the importance of accurate and timely information on poor and vulnerable groups; and (3) the need to have a range of instruments to ensure adequate targeting and coverage. The Ministers undertook to develop a set of guidelines for responsive and fiscally manageable social safety nets to present to APEC Leaders.

- **Creating new opportunities with information technology.** Ministers called on economies to formulate and implement appropriate policies and arrangements to facilitate electronic financial transactions and supported efforts by APEC member economies and the International Financial Institutions to ensure that the benefits of information technology are as widely shared as possible. They agreed to establish a working group on electronic financial transactions systems to develop and implement programs to foster paperless trading in collaboration with the E-Commerce Steering Group. Ministers also urged APEC Customs to enhance harmonization of customs data elements, taking into account the outcomes of the G-7 Experts’ work. The Finance Ministers will meet next in Suzhou, China on 6-9 September 2001.

**OTHER APEC FORUMS**

- **Korea sponsored the APEC Forum on Shared Prosperity and Harmony** that was held in Seoul, 30 March to 1 April. At this meeting, member economies shared experiences in the course of overcoming the economic, discussed how best to coordinate policies to prevent the recurrence of such crises, and explored ways of redressing the disparities generated between economies and within societies. Korean President Kim Dae Jung at the Forum proposed that a “Hedge Fund Monitoring Channel” be established to contribute to the stability of financial markets. He also urged that APEC economies develop a “Foreign Exchange Crisis Forecast Model” to provide advance warning of the risk of economic crisis. Finally, in addition to asking that North Korea be allowed to participate in APEC activities, the Korean President called for an “APEC Cyber Education Network” to help address the digital divide. These and other proposals presented at the Forum will be taken up by several APEC fora during the year.

- **APEC’s Ministers for Small and Medium Enterprises (SME)**

  SME Ministers met in Bandar Seri Begawan, 21-23 June 2000, capping off a week during which there were concurrent meetings of the SME Business Forum, the Women Leaders’ Network, the E-Commerce Workshop, as well as the Ad Hoc Policy Level Group on SMEs. Some of the key results of these meetings include:

  - **Capitalizing on E-Commerce:** There was broad consensus that governments could help SMEs overcome the high costs of investment in information and communication technology by creating an environment more favorable to E-commerce. Ministers instructed relevant APEC bodies to expedite on-going work on reducing the cost of access to the Internet.

  - **Financing for SMEs:** In addition to urging economies to promote the development of capital markets in the region, Ministers instructed the Policy Level Group to work with other APEC fora to establish an APEC database on start-up companies and venture capital.

  - **Capacity Building:** Ministers instructed their Policy Level Group to develop cooperation programs for submission to the APEC Economic Leaders in November.
SME Ministers will meet next 26-31 August in Shanghai, China.

- **Energy Ministers** met in May 2000 in San Diego, USA. The Ministers stated their conviction to make their best efforts to pursue simultaneously economic growth, energy security, and environmental protection. In addition, Ministers:
  - Endorsed technology cooperation initiatives to diversify the energy mix, improve energy efficiency, deploy new and renewable energy technology, reduce costs, facilitate energy business and trade, and mitigate damages to energy infrastructure after natural disasters.
  - Agreed to work on a strategy to implement a number of earlier initiatives including non-binding energy policy principles, strengthening the policy dialogue among member economies, a voluntary pledge and energy efficiency initiative, cooperation with the Energy Working Group Business Network and the Energy Regulators’ Forum, and a program to identify best practices for energy services.
  - Agreed that the implementation initiative would include a system of voluntary, annual self-reports on implementation by member economies.
  - A year earlier, the Energy Investment Workshop held 19-20 April 1999 in the United States, stressed, *inter alia*, the need for transparency, predictability and non-discrimination in energy policy and regulatory regimes.

- **APEC HRD Ministers** met in Washington, DC, USA, in July 1999 and adopted an action plan for the economic crisis incorporating policies and programs on the functioning of labor markets, social safety nets and enhancing productivity through better workplace practices.

- **Tourism Ministers** met 5-7 July 2000 and endorsed the APEC Tourism Charter, which reflects a collective commitment to improve the economic, cultural, social and environmental well being of APEC member economies through tourism.

  - The **Economic Committee** will publish and deliver the following three reports to Ministers in November 2000. Their core messages will all be relevant to sustainable recovery issues and will be useful inputs for Leaders’ meeting as well. The EC will also prepare a brief “Economic Committee’s Annual Report to Ministers,” highlighting key findings of the three published reports.
    1. **2000 APEC Economic Outlook**
    2. **APEC Economies beyond the Asian Crisis** (Beyond-the-Crisis project)
    3. **Towards Knowledge-Based Economies in APEC** (KBE project)

  All reports address central economic issues of interest for Leaders, Ministers, and the APEC community. Major issues taken up this year include:
  - Economic conditions (Recent development and short-run prospects in the APEC region)
  - Trade (Growing interest in forging regional trade arrangements (RTAs))
  - Challenges for future growth (Implications of the Asian crisis, information technology, and entrepreneurship)
  - Long-term projection (Projection of growth and trades over the next decade)
  - Knowledge-based economy (KBE) (Full analysis on the emerging trend towards KBEs; Specific actions to promote KBEs in the APEC region)

The following are some highlights of the three reports.

- **2000 Economic Outlook**: Examining developments in APEC economies to date, the Outlook confirms that the Asian crisis has been contained, and economic recovery is now more prevalent in the APEC region as a whole. The prospects over the next 12 months or so remain generally positive. Yet, there are some significant downside risks including the recent surge in oil prices. The Outlook revisits the Asian crisis, giving final assessments that the crisis was exacerbated by a combination of several factors including structural weakness and the lack of transparency in the financial and corporate sectors, and that economic reforms must squarely address these factors. Finally, the Outlook looks at the structural issue of the emerging trend towards regional trade arrangements (RTAs), bearing in mind its implications to the multilateral trading system.

- **The Beyond-the-Crisis Report** focuses on long-term prospects of APEC economies beyond the Asian crisis, highlighting key issues for building the future of APEC economies. The report identifies two major challenges for future growth; the remaining challenges from the Asian crisis and the emerging challenges of the new economy. The Asian crisis has had important long-term implications on APEC economies that future growth would be hindered unless structural weaknesses revealed by the crisis are redressed. The new economy driven by information technology presents both opportunities to promote higher living standards and huge challenges in taking advantage of new technologies. Fostering entrepreneurship has become an effective way to promote growth and employment. The well-developed SME sector is the hotbed for new businesses. A case study on Chinese Taipei’s economy underlines the dynamic role of SMEs in economic development. Finally, APEC must also muster efforts to build future growth through strengthening markets; E-commerce and technology cooperation; entrepreneurship and SME development; education and life-long learning; and social safety nets.

- **Towards Knowledge-Based Economies in APEC** aims to provide the analytical basis useful for promoting KBEs in the APEC region. A survey of the status of KBE of various APEC economies

Continued on page 44
suggests that certain characteristics are preconditions for moving toward a KBE. They include: high quality education services both widely available and widely used; advanced communications network and policy/regulatory framework that encourages competition and supports the development and use of information hardware and applications; cultural background being open to new ideas, especially those from outside; social, political, economic and legal framework conducive to the development of the characteristics above. APEC economies can learn the policies that have been adopted to build the infrastructure of a KBE from other APEC members both at the same stage of development and at different stages of development. Much scope exists for cooperation within APEC in four key dimensions related to promoting KBEs: business environment, innovation systems, human resource development, and information and communication technology. The report recommends three specific actions for APEC cooperation: establish a “Knowledge Clearing House”, which aims to exchange various types of knowledge; generate “Igniting Policies” for triggering the transition to KBEs; include “KBE Status Indicators” in the APEC Economic Outlook, which provide information regarding how APEC is progressing towards KBEs.

- The 1999 Infrastructure Workshop undertook analytical work on the impact of the economic crisis on infrastructure demand, supply and government policies. Its main project, on regional integration for sustainable economies, highlighted the importance of having the right infrastructure in place to support economic development – a key issue for economies emerging from the crisis.

- Australia has made available to other economies the results of a survey it commissioned on economic governance capacity building needs, programs underway to meet those needs, and gaps that could be filled by APEC economies and international agencies. The initiative, welcomed by APEC Economic Leaders and Ministers, suggests ECOTECH activities to build capacity in economic governance that individual economies could undertake.

- At the 2000 APEC Study Centers Consortium Conference in Bandar Seri Begawan, the Study Centers continued their post-crisis work in the areas of managing finance, managing e-commerce, managing regional relationships, and managing HRD. In addition, the Centers helped create the Asia Pacific International Assessment Network (APIAN) which will conduct regular independent assessments of key APEC activities in both trade and investment liberalization and facilitation and economic and technical cooperation.

- An APEC Forum on Human Resources Development was held in July 1999 in Japan. It focused on the short-term vocational training needs of workers affected by the crisis, as well as longer-term policies on vocational training to cope with globalization.

- The 4th APEC Investment Symposium in September 1998 in Kuala Lumpur, Malaysia, included a session on the impact of the crisis on investment trends and government policy responses, including changes to investment regimes. The discussion addressed changing business perceptions of investing in the region in the wake of the financial turmoil and concluded that economies need to work toward policies that reduce risk and create a conducive environment for investment. The 5th APEC Investment Symposium will be held in China in March 2000.

- To facilitate access to information and analysis on social and economic impacts of the crisis and the subsequent economic recovery in the region:
  - the United States has created a Virtual Task Force on the Social Impact of the Financial Crisis; and
  - Australia has established the Asia Recovery Information Center (ARIC), a resource housed at the ADB.

APEC is developing, using these institutions, mechanisms to exchange information on social safety net issues for crisis-affected economies, drawing on APEC and other initiatives in this area.
Management Review

Since its formation in 1989, APEC has evolved rapidly and has grown in substance and purpose. The ambitious goals—to establish the largest free trade and investment area in the Asia-Pacific—affect APEC resources too. Ministers and officials have developed a comprehensive work program to achieve these objectives and an extensive structure of activities to carry them forward. To ensure that the limited resources of member economies are deployed to the best possible cost-effectiveness and to produce practical results in line with APEC’s objectives, in 1998 APEC embarked upon a three-year (1998-2000) management review program. It aims to examine the structures within which APEC business is done by examining the mandates, roles and interrelationships of the various committees, working groups and other parts of the APEC network.

Achievements

Further to the achievements in 1998, additional measures to increase the efficiency and effectiveness of the APEC process were endorsed and taken by both the Senior Officials and the Ministers in 1999. The major measures are:

- the Chair of the annual Leaders/ Ministers Meetings will also chair the APEC Finance Ministers process starting from 2000, to make the meetings mutually supportive and reinforcing;
- all APEC fora are requested to prepare annual operational plans to ensure that their activities are contributing to the achievement of the goals of APEC; and
- all APEC fora are requested to implement the measures designed to strengthen the processes of project design, preparation of funding proposals and project approval/implementation/evaluation.

Next Steps

During the final year of the process, common criteria for the establishment of new APEC fora will be prepared which will form an important part of the concluding report of the process to be presented to the 12th APEC Ministerial Meeting scheduled for November 2000.

Since its formation in 1989, APEC has evolved rapidly and has grown in substance and purpose. The ambitious goals—to establish the largest free trade and investment area in the Asia-Pacific—affect APEC resources too. Ministers and officials have developed a comprehensive work program to achieve these objectives and an extensive structure of activities to carry them forward. To ensure that the limited resources of member economies are deployed to the best possible cost-effectiveness and to produce practical results in line with APEC’s objectives, in 1998 APEC embarked upon a three-year (1998-2000) management review program. It aims to examine the structures within which APEC business is done by examining the mandates, roles and interrelationships of the various committees, working groups and other parts of the APEC network.

Achievements

Further to the achievements in 1998, additional measures to increase the efficiency and effectiveness of the APEC process were endorsed and taken by both the Senior Officials and the Ministers in 1999. The major measures are:

• the Chair of the annual Leaders/ Ministers Meetings will also chair the APEC Finance Ministers process starting from 2000, to make the meetings mutually supportive and reinforcing;
• all APEC fora are requested to prepare annual operational plans to ensure that their activities are contributing to the achievement of the goals of APEC; and
The APEC Electronic Commerce Steering Group (ECSG) was established by the SOM in February 1999. The role of the Steering Group is to ensure continued coordination of APEC e-commerce activities and to pursue the work programme set out in the APEC Blueprint for Action on Electronic Commerce. The ECSG meets once a year but continues to conduct its business throughout the year as a ’virtual’ group using electronic means of communications. The 1st ECSG meeting was held on 27-28 June 1999 in Auckland, New Zealand and the second meeting held in Bangkok, Thailand in July 2000. The ECSG's two-year term will expire in 2001 and it will be to reviewing its mandate and reporting its recommendations to SOM I in Beijing in February 2001.

Business and Private Sector Participation

It is generally recognized that the private sector is taking the lead in the development and application of electronic commerce. The role of government is to provide an environment, particularly the legal/regulatory framework that is conducive to the development of e-commerce. Therefore it is essential for government and the private sector to working closely together. The private sector has been active participants in all ECSG meetings. APEC e-commerce activities such as the APEC E-commerce Convention in Tokyo in May 2000, the APEC 2000 SME E-commerce Workshop in Brunei Darussalam in June 2000 and the Consumer Protection Workshop in Bangkok in July 2000 all had extensive private sector participation.

Achievements

The E-Commerce Steering Group met 20-22 July 2000 in Bangkok. A one-day workshop on electronic commerce and consumer protection was held followed by a day and one-half meeting of the Steering Group. The Workshop and ECSG meeting addressed three objectives: (1) carry out the mandates of the 1999 Ministerial Meeting, specifically on Consumer Protection; (2) follow-up on the guidance on paperless trading from Ministers Responsible for Trade (MRT) and results of the Tokyo E-Commerce Convention; and (3) review progress in carrying out APEC e-commerce Blueprint. Some of the ECSG’s activities in 2000 are as follows:

- **Consumer protection:** The workshop identified a clear need for information sharing and a need for compatible consumer protection frameworks in APEC economies in order to promote consumer trust and ensure effective enforcement of consumer protection laws.
- **Legal Framework:** The ECSG has undertaken a survey to be completed prior to the November Ministerial on progress towards the adoption and/or modification of laws in a manner consistent with the UNCTRAL Model law.
- **Authentication:** The ECSG reviewed the ongoing work by the TEL experts group which includes a regular series of workshops and a series of information papers and concluded that both public and private sector leaders need to be familiar with emerging authentication technologies and business practices.
- **Paperless Trading:** The ECSG followed up on the MRT and SOM by reviewing a proposed questionnaire for the paperless trading matrix. Some potential overlap was identified between the work of the Sub-Committee on Customs Cooperation (SCCP) and the Transportation Working Group (TPT WG). The ECSG co-chairs agreed to help coordinate among the various APEC fora involved, especially the SCCP and the TPT. A final questionnaire will be completed in time to provide a report to SOM I in 2001.
- **Tokyo E-Commerce Convention:** As directed by the MRT the ECSG examined key outcomes of the Convention with respect to the APEC action, namely, the need for a seamless and compatible legal and regulatory framework; E-government; and training and education.
- **Training and Human Resources:** The ECSG identified a large number of proposals and initiatives, both within APEC, the private sector and other international fora such as the ITU. The ECSG concluded that the scope and content of this issue requires a coordinated approach involving all key players. The PECC has agreed to bring together all interested parties including APEC fora, other international organization active in the region and private sector groups.

E-Government: Both the Tokyo Convention and the Brunei workshop identified e-government as an important element in promotion the development of e-commerce and especially SME use of e-commerce. The ECSG supports the idea of a conference to promote exchange of information and best practices.

Readiness: The ECSG noted the number of assessments completed and relevance of this work to other e-commerce activities such as paperless trading, establishing compatible legal frameworks, developing infrastructure.

APEC E-Commerce Work Programme: The ECSG took note of the emerging focus in electronic commerce of so-called end-to-end solutions that encompass areas outside the purview of the Blueprint such as logistics. It also noted that the Blueprint Work Programme references to achieving a seamless legal/regulatory environment, the promotion of e-government and the need to address education and training requirements do not fully reflect the increasing attention and priority being given to them in APEC.

Next Steps

Activities to be undertaken by the ECSG include:

- A work programme on consumer protection including the development of an information sharing database system and analysis of consumer protection frameworks to assess the level of compatibility and the need for
In November 1998, APEC Economic Leaders renewed their resolve towards creating a prosperous Asia-Pacific community. Part of this resolve included Leaders endorsement of joint actions to be launched in the area of food in relation to economic and population growth in the region and an instruction to implement those joint actions. Leaders instructed APEC Ministers to study the APEC Business Advisory Council’s APEC Food System proposal. Following this instruction, at SOM I in February 1999, APEC Senior Officials established an ad-hoc task force to study ABAC’s proposal for an APEC Food System. The report on APEC Food System was submitted to and endorsed by the Ministers and Leaders meeting in Auckland in 1999.

### Business and Private Sector Participation

The Task Force was established to study the ABAC’s proposals. The Task Force also examined input from and research conducted by the APEC Study Center.

### Achievements

The Leaders’ Meeting and Ministers’ Meeting held in September in New Zealand endorsed the Task Force’s study and recommendations. This is the first comprehensive report and recommendations which covers various areas and diverse issues of food.

The Task Force’s study is based upon ABAC’s proposals in food sector, which:

- efficiently link together food producers, processors and consumers;
- harness the resources of the region to more securely meet consumers’ food needs; and
- maximize the contribution of the food sector to the wealth and prosperity of all economies.

The report focuses on the three main areas of cooperation identified in the ABAC’s proposals: rural infrastructure development; dissemination of technological advances; and promotion of trade in food products.

The Task Force recommendations to SOM include:

(i) SOM recommends to Ministers that they note that achieving the objectives of ABAC APEC Food System proposal is an essential part of achieving sustainable growth, equitable development and national stability in the APEC region and of reaching the specific goals and objectives agreed at Bogor in line with the Osaka Action Agenda;

(ii) The Human Resources Development Working Group places high priority on addressing the issue of rural education, and member economies undertake cooperative measures with non-government, non-profit organizations to improve the availability of rural education;

(iii) The Infrastructure Workshop’s joint initiatives in infrastructure development be actively encouraged by, and the benefits of these initiatives communicated to, member economies;

(iv) The APEC Investment Experts’ Group, in conjunction with the World Bank, Inter-American Development Bank, Asian Development Bank and the Food and the Agriculture Organization of the United Nations and other bodies as appropriate, investigates new and innovative ways to attract the investment necessary to build facilities and rehabilitate existing rural infrastructure;

(v) The Small and Medium Enterprises Policy Level Group could undertake and intensify work on the three areas of cooperation identified by ABAC’s APEC Food System proposal;

(vi) Relevant APEC fora, including the Committee on Trade and Investment, Economic and Technical Sub-Committee and the ATC EG continue to undertake and intensify their work on trade facilitation, economic and technical cooperation and capacity building on food-related issues including:

- Provision of clear, predictable
and easily understood food regulatory frameworks and standards;
- According priority to those projects that assist with the facilitation and growth of regional trade in food products and improve the technical infrastructure for developing economies;
- Provision of progress reports to SOM on endorsement of existing initiatives, such as the Food Mutual Recognition Arrangement;
- Furthering cooperation in research and development and dissemination of food-related technology;
- Building partnerships between the public and business/private sectors in food technical cooperation to further technology transfer, training facilities and training programs;
- Fostering environmentally sound agricultural practices; and
- Maintaining an awareness of and contributing to international developments in research and policies related to genetically modified foods, and intensifying science-based approaches to the introduction and use of biotechnology products.

(vii) APEC member economies continue to ensure full and faithful implementation of the commitments on food arising from the Uruguay Round of multilateral trade negotiations;

(viii) APEC member economies, in line with the Osaka Action Agenda and noting ABAC’s call for the elimination of unnecessary impediments to trade in food products ahead of the Bogor goals:
- Provide greater specificity in their Individual Action Plans on how they are going to meet the long-term Bogor goals in the food sector;
- Actively and constructively participate in the forthcoming WTO negotiations on agriculture to consider tariffs and non-tariff measures further in the context of Article 20 of the WTO’s Agreement on Agriculture; and
- In the forthcoming negotiations on agriculture, convey to the WTO membership APEC’s support for the abolition of agriculture export subsidies and unjustifiable export prohibitions and restrictions.

(ix) SOM, through relevant fora, provides annual reports to Ministers on what progress is being made by APEC member economies towards building a robust APEC Food System.

SOM tasked member economies and relevant fora/sub-fora to submit a report on progress in implementation of the APEC Food System recommendations to SOM III. A summary of the compiled reports includes:

On the whole, the AFS recommendations are being implemented by most of the tasked fora indirectly and in broader terms. CTI and its sub-fora, with the exception of SCSC, have not implemented AFS recommendations in a direct sense but the progress achieved in advancing APEC’s agenda on trade and investment facilitation and liberalization indirectly support AFS. The SCSC’s project on food and drug interface aims to seek specific guidelines for good regulatory practice for food and drug interface and principles of certification of such products (exploration of APEC agreed form of certification).

ESC reports that it does not have mechanism to influence the prioritization of projects by APEC fora that assist with the facilitation and growth of regional trade in food products and improve the technical infrastructure for developing economies. However, with the development of appropriate food regulatory frameworks and standards by the SCCP and SCSC, the ESC will consulting with the TP WG to see if it could assist in the promotion of trade in food products including through trade fairs.

ATC has actively implemented the AFS recommendations. A key outcome for the group this year is the Biotechnology Report endorsed by Trade Ministers meeting in their Darwin meeting. Further concrete steps to be taken by the ATC include two workshops in biotechnology to be organized in 2000 and 2001. The workshops will focus on how to enhance the general public’s understanding of biotechnology by exchanging information on best practices in member economies and addressing environmental issues.

HRD’s task on accessibility to and quality of rural education focuses on utilization of Internet education in remote areas. PLGSME has taken a broad approach with their programs, which focus on further developing APEC’s business outreach with respect to SMEs and interaction between government and private sector. Infrastructure Workshop has, in collaboration with PECC, the ADB and the World Bank, made tremendous progress in developing a strategy to improve rural infrastructure and implementing it through the Regional Integration for Sustainable Economies (RISE) project.

Among the fora which were not tasked to report, IST is identified as having some activities contributing to implementation of AFS. The working group’s post harvest project aims to establish an Internet based network along with a virtual post harvest R & D center.

Members report that they are faithfully implementing the recommendations that SOM task them to report on. Member economies abide by the WTO agreements in agriculture and food, fully support APEC’s position in WTO negotiations on agriculture, and have made progress towards achieving Bogor goals in the food sector through such efforts as restructuring import tariffs, eliminating unnecessary impediments to trade in food and strengthening cooperation on capacity building and information sharing in agricultural technology. The reporting economies continue to take steps to upgrade educational infrastructure and facilities to provide training in rural areas to implement the recommendations on improving the availability of rural education. SOM
will report to Ministers and through which to Leaders, based on compiled economies’ reports, CTI and ESC reports.

Next Steps

SOM III agreed that SOM I in 2001 will review the need for the re-establishment of Ad-hoc Task Force on AFS to enable closer monitoring of AFS implementation and maintain an effective overview of progress. Members and tasked fora are also expected to continue to submit to the Ministers and Leaders meeting next year a report on progress made in implementation of AFS during 2001.

III. THE APEC SECRETARIAT

The APEC Secretariat, located in Singapore, was established in 1993 to serve as the core support mechanism for the APEC process. It currently comprises 23 officials seconded by member economies for fixed terms and a similar number of locally recruited support staff.

The Secretariat’s operational plan comprises six outputs (and four services) based on the following Statement of Business, approved by member economies.

Statement of Business

- The Secretariat is the core support mechanism for the APEC process.
- The Secretariat provides advisory, operational and logistic/technical services to member economies and APEC fora to coordinate and facilitate conduct of the business of the organization.
- On behalf of member economies, it provides preparatory advice on formulation of APEC projects, manages project funding and evaluates projects funded from the APEC Operational and TILF Accounts.
- The Secretariat provides information and public affairs support to promote APEC’s role and activities through its publications, media, business and outreach programmes and through the maintenance of a website. It also performs public affairs functions on behalf of APEC members when required.
- The Secretariat maintains a capacity to support research and analysis in collaboration with APEC Study Centres and PECC as required by APEC fora.
- The Executive Director is responsible to APEC Senior Officials through the SOM Chair and manages the Secretariat in line with priorities set by SOM on behalf of Ministers.

Public Affairs

The APEC Secretariat is responsible for media and public relations for APEC and provides assistance in disseminating information on APEC to targeted audiences and the public at large through a variety of means including an extensive publishing programme, websites and other electronic media, audio visual material, presentations, visitor briefings and outreach visits to APEC member economies.

The Secretariat also plays an important role in providing public affairs and media support to the host economy and APEC fora throughout the year.

Achievements

- Presentations delivered during the year to a wide variety of business, government and student groups.
- Visits with an outreach focus made to Chile; China; Hong Kong, China; Indonesia; Korea; Mexico; Peru; Russia; Chinese Taipei; USA; and Viet Nam. Successful outcomes were achieved in educating the public and related institutions on the mechanics of APEC and effective involvement in the APEC process.
- On-the-ground media liaison support provided to Brunei Darussalam and other hosts for major APEC meetings throughout the year and assistance in advance of and during key events to support coverage by international, regional and local media outlets.
- Media releases and advisories issued and disseminated regularly via email gateway and posted on the APEC website. Regular contact maintained with journalists to encourage media coverage of key APEC events and activities.
- A wide range of general information resources on APEC produced including scheduled publications for 2000 as part of the Secretariat’s publishing programme and production of

Continued from page 48
Communications and Database System

One of the mandates given by the APEC Ministers to the Secretariat is to establish direct and regular communications between the APEC Secretariat and APEC members, Lead Shepherds of Working Groups, and Committees. There is also a need to create an information repository at the APEC Secretariat to facilitate the movement and storage of APEC-related information. This information needs to be accessible to users in each member economy either in hard copy form or in electronic format.

The APEC website is one of the key management vehicles to fulfill the Secretariat’s mandate. Users can access a wide range of information including the APEC calendar of events and documents from meetings on the APEC website at http://www.apecsec.org.sg.

Business and Private Sector Participation

The business and private sector is not involved with the communications and database system. The system is now maintained by the APEC Secretariat.

Achievements

- All APEC member economies, working groups, committees and the private sector can easily communicate with the Secretariat by e-mail. Users can access selected APEC documents through the APEC Secretariat’s homepage.
- The new database (APEC Projects Database) was officially launched in August 1999. This database contains summary information of the APEC projects and will be a good management tool for working groups and committees.

Next Steps

The Secretariat will continue to maintain the communication system and to update the related databases to keep the data current. This will be an on-going process.
