21 Key Contacts
APEC Outcomes and Outlook presents a concise overview of the structure, work processes and important milestones of the Asia-Pacific Economic Cooperation grouping, now entering its fourteenth year of existence. Also featured are the key outcomes of the just completed 2002 APEC year hosted by Mexico and a preview of the themes and focus of activity for the coming year to be hosted by Thailand.

The start of the 2002 year presented the Asia-Pacific region with a number of tough challenges. The global economy was in the midst of an economic slowdown caused by the cyclical downturn and external shocks and the resulting fall in levels of demand of the major developed economies had led to a reduction in overall world trade volume. By the end of 2002 the world economy had shown evidence of bottoming out of the cyclical downturn. Significantly, the strong growth potential of the APEC region is now expected to lead the global recovery over the coming year.

The APEC economy as a whole is predicted to grow by 4% in 2003. It will nevertheless be necessary for APEC to remain on guard against potential short-run risk factors. Continued commitment to structural reforms together with improved transparency of corporate management and governance within APEC economies remains critical to ensuring sustained economic growth of the region over the medium term.

The past year has been an especially active one for APEC. Over 230 APEC-funded projects were completed and over 130 meetings/events were convened, reflecting the intense level of information exchange and cooperative policy development within APEC across all sectors. In line with Mexico’s theme for the year of “Expanding the Benefits of Cooperation for Economic Growth and Development – Implementing the Vision”, the emphasis of APEC’s work during 2002 was on effecting the implementation of past commitments and further extending the direct benefits of APEC’s work to the people within our communities. This goal was strengthened through the introduction of new processes promoting assessment and accountability particularly in the management and evaluation of APEC projects and through a strengthened peer review process for economies’ Individual Action Plans (IAPs) for achieving APEC’s liberalization goals.

The 2003 APEC year, hosted by Thailand, will have as its focus the deepening of existing partnerships between APEC’s 21 member economies. Under the theme of “A World of Differences: Partnership for the Future,” APEC will continue to pursue the Bogor Goals of free and open trade and investment in developed economies by 2010 and developing economies by 2020, with emphasis on expanding the opportunities for cooperation and promoting complementarities between all APEC economies regardless of level of economic development. Participation in the knowledge-based economy, promoting human security through economic empowerment, financial reform and corporate governance, support for small, medium and micro enterprise development and fulfilling development pledges are some of the key APEC topics for 2003.

Further detailed information on APEC’s programs and activities can be found on the APEC Secretariat website, www.apecsec.org.sg.

Alejandro de la Peña
Executive Director, 2002
APEC Secretariat
APEC is the premier economic forum in the Asia-Pacific region. Comprising 21 member economies*, APEC spans four continents, represents more than one third of the world’s population (2.5 billion people), over 50% of world GDP (US$19,293 billion) and in excess of 47% of world trade.

Since its inception in 1989, APEC has helped to reduce tariffs and other barriers to trade across the Asia-Pacific region. APEC has worked to create an environment to ensure the safe and efficient movement of goods, services and people across borders in the region through policy decisions and economic and technical cooperation. During this period, APEC member economies have grown and developing economies, in particular, have experienced increases in GDP and standards of living.

APEC is a unique forum operating on the basis of open dialogue and equal respect for the views of all participants. Decision making within APEC is reached by consensus. There are no binding commitments; compliance is promoted through peer pressure and, when appropriate, supported by economic and technical cooperation. Through APEC, developing economies have as much say in setting APEC’s agenda as some of the largest economies in the world.

APEC’s priorities and goals are set at annual meetings of APEC Economic Leaders and Ministers. Officials and experts in member economies carry out projects and other work to meet these goals. This work is supported by a secretariat based in Singapore.

* The word ‘economies’ is used to describe APEC members because the APEC cooperative process is predominantly concerned with trade and economic issues, with members engaging with one another as economic entities.
APEC works in three broad areas to meet its goals of free and open trade and investment in the Asia-Pacific by 2010 for developed economies and 2020 for developing economies (These goals are often referred to as the ‘Bogor Goals’). The three areas in which APEC works are:

- **Trade and Investment Liberalization** — reducing and eliminating tariff and non-tariff barriers to trade and investment, and opening markets.
- **Business Facilitation** — reducing the costs of business transactions, improving access to trade information and bringing into line policy and business strategies to facilitate growth, and free and open trade.
- **Economic and Technical Cooperation (ECOTECH)** — assisting member economies build the necessary capacities to take advantage of global trade and the New Economy.

Together, the outcomes of these three areas of work assist APEC economies to continue to grow and prosper. Tangible benefits are also delivered to the people of the region, through increased choices in the marketplace, cheaper goods and services and improved access to international markets.

A set of general principles is applied to APEC’s liberalization and facilitation process to assist APEC member economies to meet the free and open trade goals. These principles include:

- **Comprehensiveness** — addressing all impediments to achieving the long-term goal of free and open trade.
- **WTO-consistency** — measures undertaken in the context of the APEC Action Agenda are consistent with the principles of the World Trade Organization (WTO).
- **Comparability** — APEC economies endeavor to have comparable trade and investment liberalization and facilitation, taking into account the general levels achieved by each APEC economy.
- **Non-discrimination** — reductions in barriers to trade achieved through APEC are available to all APEC economies and non-APEC economies.
• **Transparency** — the laws, regulations and administrative procedures in all APEC economies which affect the flow of goods, services and capital among APEC economies are transparent.

• **Standstill** — APEC economies do not take measures which have the effect of increasing levels of protection.

• **Simultaneous start, continuous process and differentiated timetables** — APEC economies began simultaneously the process of liberalization, facilitation and cooperation and continuously contribute to the long-term goal of free and open trade and investment.

• **Flexibility** — APEC economies deal with the liberalization and facilitation process in a flexible manner, taking into account differing levels of economic development.

• **Cooperation** — Economic and technical cooperation contributing to liberalization and facilitation is actively pursued.

APEC member economies also work within a framework to meet the free and open trade goals. This framework comprises:

• Actions by individual APEC economies;

• Actions by APEC fora; and

• APEC actions related to multilateral fora.
APEC actively involves the business and private sector, academic and research institutions in its work.

APEC member economies recognize that business drives the economies of the region and involves business at all levels of the APEC process. At the highest level, APEC Economic Leaders communicate through annual meetings with the APEC Business Advisory Council (ABAC). ABAC comprises high-level business people from all 21 economies.

Through the APEC Study Centers (ASC) Consortium, APEC member economies actively engage academic and research institutions in the APEC process. Amongst a range of key activities, the ASC Consortium facilitates cultural and intellectual exchanges in the Asia-Pacific region and assists the APEC process by undertaking advanced, collaborative interdisciplinary and policy-relevant research from an independent and long-term perspective. There are ASCs in 19 member economies, comprising 100 universities, research centers and centers of academic excellence across the APEC region.

At the working level, representatives from the business and private sector, as well as academic and research institutions are invited to join APEC working groups and expert groups.

This process provides an important opportunity for these stakeholders to provide input into various areas of APEC’s day to day work.
1989  Canberra, Australia  APEC begins as an informal Ministerial-level dialogue group with 12 members.

1993  Blake Island, United States  APEC Economic Leaders meet for the first time and outline APEC’s vision, “stability, security and prosperity for our peoples.”

1994  Bogor, Indonesia  APEC sets the Bogor Goals of, “free and open trade and investment in the Asia-Pacific by 2010 for developed economies and 2020 for developing economies.”

1995  Osaka, Japan  APEC adopts the Osaka Action Agenda (OAA) which provides a framework for meeting the Bogor Goals through trade and investment liberalization, business facilitation and sectoral activities, underpinned by policy dialogues, economic and technical cooperation.

1996  Manila, The Philippines  The Manila Action Plan for APEC (MAPA) is adopted, outlining the trade and investment liberalization and facilitation measures to reach the Bogor Goals and the first Collective and Individual Action Plans are compiled, outlining how economies will achieve the free trade goals.

1997  Vancouver, Canada  APEC endorses a proposal for early voluntary sectoral liberalization (EVSL) in 15 sectors and decides that Individual Action Plans should be updated annually.

1998  Kuala Lumpur, Malaysia  APEC agrees on the first nine sectors for EVSL and seeks an EVSL agreement with non-APEC members at the World Trade Organization.
1999  Auckland, New Zealand  APEC commits to paperless trading by 2005 in developed economies and 2010 in developing economies. APEC Business Travel Card scheme is approved and a Mutual Recognition Arrangement on Electrical Equipment and a Framework for the Integration of Women in APEC is endorsed.

2000  Bandar Seri Begawan, Brunei Darussalam  APEC establishes an electronic Individual Action Plan (e-IAP) system, providing IAPs online and commits to the Action Plan for the New Economy, which, amongst other objectives, aims to triple Internet access throughout the APEC region by 2005.

2001  Shanghai, People’s Republic of China  APEC adopts the Shanghai Accord, which focuses on Broadening the APEC Vision, Clarifying the Roadmap to Bogor and Strengthening the Implementation Mechanism. The e-APEC Strategy is adopted, which sets out an agenda to strengthen market structures and institutions, facilitate infrastructure investment and technology for on-line transactions and promote entrepreneurship and human capacity building. APEC’s first Counter-Terrorism Statement is issued.

2002  Los Cabos, Mexico  APEC adopts a Trade Facilitation Action Plan, Policies on Trade and the Digital Economy and Transparency Standards. APEC’s second Counter-Terrorism Statement is delivered, along with the adoption of the Secure Trade in the APEC Region (STAR) Initiative.
APEC works at the policy and working level -

i. Policy Level

Policy Development

Economic Leaders’ Meeting
Economic Leaders’ Meetings are held once a year in the APEC host economy. Declarations from these meetings set the policy agenda for APEC.

APEC Ministerial Meeting
Annual APEC Ministerial Meetings of foreign and economic/trade ministers are held immediately prior to Economic Leaders’ Meetings. Ministers take stock of the year’s activities and provide recommendations for Economic Leaders’ consideration.

Sectoral Ministerial Meetings
Sectoral Ministerial Meetings are held regularly covering areas such as education, energy, environment and sustainable development, finance, human resource development, regional science and technology cooperation, small and medium enterprises, telecommunications and information industry, tourism, trade, transportation and women’s affairs.

APEC Business Advisory Council (ABAC)
ABAC provides APEC Economic Leaders with a business perspective on APEC issues through an annual meeting and report to Leaders. The annual report contains recommendations to improve the business and investment environment in the APEC region. ABAC also meets four times per year and a representative attends Ministerial Meetings.

ii. Working Level

Senior Officials’ Meeting (SOM)
Working under direction from Ministers, the Senior Officials guide the activities of the committees, working groups and task forces. Senior Officials develop recommendations for Ministers and Economic Leaders. SOM meetings are held three to four times a year with the chair from the host economy.
**Committee on Trade and Investment (CTI)**
The CTI coordinates APEC’s work on the liberalization and facilitation of trade and investment. CTI also works to reduce impediments to business activity through its Sub-Committees and Experts’ Groups:
- Market Access Group;
- Group on Services;
- Investment Experts’ Group;
- Sub-committee on Standards and Conformance;
- Sub-committee on Customs Procedures;
- Intellectual Property Rights Experts’ Group;
- Competition Policy and Deregulation Group;
- Government Procurement Experts’ Group;
- Informal Experts’ Group on Mobility of Business People; and
- WTO Capacity Building Group.

**SOM Committee on ECOTECH**
The SOM Committee on ECOTECH assists APEC Senior Officials in coordinating and managing APEC’s ECOTECH agenda, as well as identifying value-added initiatives for cooperative action.

**Economic Committee (EC)**
The EC conducts research on economic trends and issues in the APEC region in support of APEC’s trade and investment liberalization and facilitation and economic and technical cooperation agendas. It also serves as a forum for members to exchange information and views on economic trends and issues.

**Budget and Management Committee (BMC)**
The BMC advises the SOM on budgetary, administrative and managerial issues. It also monitors and evaluates project management aspects of the operations of working groups/committees and makes recommendations to SOM for improved efficiency and effectiveness.

**Working Groups**
Working Groups carry out APEC’s work in specific sectors as directed by Leaders, Ministers, Sectoral Ministers and Senior Officials. These groups include:
- Agricultural Technical Cooperation;
- Energy;
- Fisheries;
- Human Resources Development;
- Industrial Science and Technology;
- Marine Resources Conservation;
- Small and Medium Enterprises
- Telecommunications and Information;
- Tourism;
- Trade Promotion; and
- Transportation.

**SOM Special Task Groups**
The SOM has set up two Special Task Groups to identify issues and make recommendations about important areas for APEC’s consideration. These groups are:
- Gender Focal Point Network; and
- Electronic Commerce Steering Group.
iii. APEC Secretariat

The APEC Secretariat is based in Singapore and operates as the core support mechanism for the APEC process, providing coordination, technical and advisory support as well as information management, communications and public outreach services. The APEC Secretariat also performs a centralized project management role, assisting economies and fora with oversight of over 230 APEC-funded projects. APEC’s annual budget is also administered by the APEC Secretariat.

In 2002, the APEC Secretariat obtained ISO 9001:2000 Quality Management Certification. This recognizes the continuous efforts made by the APEC Secretariat to provide improved administrative and support activities. The APEC Secretariat is the first international trade-related secretariat to attain ISO certification.

The APEC Secretariat is staffed by a small team of approximately 20 program directors seconded from APEC member economies with a similar number of permanent administrative staff. The Executive Director and Deputy Executive Director positions both rotate annually and are filled by officers of Ambassador rank from the current and next incoming host economy, respectively.

APEC STRUCTURE

The APEC Secretariat is based in Singapore and operates as the core support mechanism for the APEC process, providing coordination, technical and advisory support as well as information management, communications and public outreach services. The Executive Director and Deputy Executive Director positions both rotate annually and are filled by officers of Ambassador rank from the current and next incoming host economy, respectively.
Theme
The theme for APEC 2002 is “Expanding the Benefits of Economic Cooperation for Growth and Development. Implementing the Vision”, with the following priorities:

- Promote the implementation of appropriate trade, investment and financial policies that foster growth and take advantage of the new economy;
- Continue building capacities to reap the benefits of development, placing special emphasis on the promotion of small and medium enterprises and micro-enterprises; and
- Continue making APEC a relevant forum for people by fostering greater participation from youth and women, by stepping up our efforts in communicating the benefits of globalization and by continuing the improvement of the functioning of APEC.

Achievements

Policies for Sustained Growth and the New Economy

Policies on Trade and the Digital Economy
The New Economy which is based on knowledge, associated with non-inflationary sustained growth, and investment in information and communications technology, is central to economic growth and development.

To help member economies benefit from the New Economy, APEC agreed to implement APEC Policies on Trade and the Digital Economy. These policies draw together a set of objectives and target actions that most APEC economies agreed to implement to liberalize trade in information and communications technology goods and services, produce an effective environment for services delivered through digital means and protect intellectual property rights in cyberspace.

APEC’s policies and measures in the areas of trade and the digital economy will assist the market to provide consumers with cheaper goods such as computers and digital cameras. It should also result in cheaper digital services, particularly telecommunications services.

Trade Facilitation Action Plan
Trade facilitation is an essential component of APEC’s goals to create free and open trade and investment in the Asia-Pacific region.

APEC developed the Trade Facilitation Action Plan which aims to meet the trade facilitation objective of reducing transaction costs by five percent across the APEC region over the next five years. This will result in reducing the costs to businesses of bringing goods to market and will benefit consumers by providing greater choices in the marketplace, lower prices and better quality goods and services. The economies of the region will also benefit from an increase in trade of US$280 billion.
Transparency Standards
Transparency is an important element in promoting economic growth and financial stability. APEC agreed to implement APEC Transparency Standards, which will provide business and investors comprehensive and clear information on the rules and regulations of each member economy. Greater certainty to conduct business across borders and more investment confidence will be the outcome of this initiative.

Pathfinder Initiatives
APEC uses an approach known as Pathfinder to allow groups of member economies to pilot the implementation of cooperative initiatives prior to their application by all member economies. Member economies which are not ready to participate in the Pathfinder initiatives can participate in initiatives when they are ready.

APEC endorsed Pathfinder initiatives on: Advance Passenger Information Systems; the revised Kyoto Convention on the Simplification and Harmonization of Customs Procedures; Electronic Sanitary and Phytosanitary Certification; Electronic Certificates of Origin; Mutual Recognition of Arrangement of Conformity Assessment on Electrical and Electronic Equipment parts II and III; and Corporate Governance.

Amongst other benefits to travelers, the Advance Passenger Information System will enable information about passengers to be sent in advance to destinations to facilitate faster entry into economies on arrival. The revised Kyoto Convention Pathfinder initiative will also assist in making trade in the APEC region more efficient.

Individual Action Plans
To report their progress towards achieving APEC’s free trade and investment goals, member economies annually update and submit Individual Action Plans (IAPs). IAPs were strengthened this year through the introduction of an objective peer review process. The new process involves formal teams for peer review exercises, experts conducting independent on-site research and analysis and the involvement of the APEC Business Advisory Council (ABAC).

IAPs are very useful documents to the public because they provide an effective annual report of each economy’s actions to promote free trade and investment.

A central focus of the APEC Mexico Year 2002 has been turning ideas into actions and implementing the vision of the APEC community.
APEC and the Multilateral Trading System
APEC supports an open, rules-based multilateral trading system, which benefits both developing and developed economies, enabling them to trade more effectively. APEC has worked hard to assist in the successful launch and timely conclusion of the negotiations on the World Trade Organization (WTO) Doha Development Agenda (DDA). Key achievements in 2002 include:

• Implementation of APEC’s Strategic Plan on WTO-Related Capacity Building, which includes funding of 19 projects to assist APEC economies to be prepared for participation in the WTO process.

• Delivery of the WTO Capacity Building Website which provides information about all projects under the plan.

• Delivery of a series of Trade Policy Dialogues to build the confidence of member economies by developing a deeper understanding of the issues involved with the DDA.

• A call by Economic Leaders for progress across all DDA areas in the lead-up to the 2003 WTO Fifth Ministerial Conference in Cancun, Mexico.

Counter Terrorism and Economic Growth
Terrorism is a threat to economic stability, regional peace and security, and is a direct challenge to APEC’s vision of free, open and prosperous trade. To achieve APEC’s twin goals of enhanced security against terrorist threats and continued facilitation of the movement of goods, capital and people, this year APEC economies:

• Took action to enhance air and maritime security, strengthen energy security, strengthen critical sector protection and enhance security-related cooperation on customs and border security.

• Adopted the Secure Trade in the APEC Region (STAR) Initiative, designed to assure the security of trade and travel, while improving the efficient flow of legitimate goods and travelers.

• Approved the APEC Action Plan on Combating and Financing Terrorism which aims to deny terrorists access to the world’s financial system, by improving international cooperation and monitoring of alternative remittance systems more effectively.

• Approved the APEC Cybersecurity Strategy, to protect the integrity of APEC’s communications and information systems while allowing the free flow of information.
Building Capacities to Reap the Benefits of Globalization

**Economic and Technical Cooperation (ECOTECH)**

ECOTECH is the pursuit of APEC’s common objectives and goals through cooperative activities to attain sustainable growth and equitable development, while reducing economic disparities among APEC economies and improving economic and social well being. A key component of APEC’s ECOTECH agenda is capacity building to help economies and their people compete more effectively in the global marketplace. APEC delivered a number of outcomes in 2002 as part of its ECOTECH capacity building agenda, including:

- Continued implementation of the Human Capacity Building Promotion Program designed to assist IT professionals and the public to enhance IT skills through free online training, a virtual classroom and a cyber forum.

- Progression of the implementation of the Infectious Disease Strategy, broadened the current APEC “infectious disease” priority to “health and sustainable development” and approved the establishment of a Life Science Innovation Forum.

- Conduct of a Workshop on ECOTECH and Capacity-Building: Assisting Integration into the Global Economy, which raised important issues for APEC including the need to develop measurable capacity building results which provide benefits to people in real time.

- Continuation of the Financial Regulators’ Training Initiative, which included a training seminar in credit risk analysis for APEC bank supervisors. This training is one of a number of initiatives developed in the wake of the Asian Financial Crisis.

**Micro, Small and Medium-Sized Enterprises**

A report on Small Business and Trade in APEC demonstrated that small and micro businesses make up over 98% of all enterprises, account for 30% of direct exports, 10% of foreign direct investment by value and 60% of private employment.

This year, APEC updated and expanded the Integrated Plan of Action for SME Development (SPAN). The updated SPAN incorporates relevant issues for micro enterprises development and provides an evaluation framework to assess progress. APEC also agreed to strengthen the policy environment and foster entrepreneurship through closer cooperation and exchange of information among economies on the appropriate policy environment conducive to the development of micro, small and medium size enterprises in the region.
In order to assist SMEs function effectively in an environment of trade and investment liberalization, APEC began implementing the APEC Training and Certification Program for Small Business Counselors this year. The program aims to train and certify small business counselors to help improve their capacity to support and provide guidance to SMEs.

APEC also launched an SME portal on www.bizapec.com, providing essential information through the Internet about member economies to SMEs which export goods and services.

By providing tools and eliminating obstacles to micro, small and medium size enterprises, APEC is providing the foundations for these enterprises to flourish, thereby creating jobs and business opportunities.

Making APEC More Relevant to Our Communities

Dialogue on Globalization and Shared Prosperity
It is important to consider the social aspects of globalization and to develop strategies to help people adjust to the changes that can sometimes result. The Dialogue on Globalization and Shared Prosperity focused on the importance of the social dimension of globalization and on the need for appropriate measures to help people adjust to new circumstances and acquire the learning and skills needed to thrive in the New Economy. The need for social safety nets to cushion the impact on those displaced by economic change and that facilitate resumption of employment, were also stressed.

Youth
Young people make a very important contribution to sustainable economic growth and development. In recognition of this, APEC conducted a Young Leaders and Entrepreneurs Forum this year. Outcomes from the meeting included networking and sharing information and best practices, which enhanced the skills and knowledge of the young people involved. The forum also made a series of proposals on business incubation, financing young businesses and education, development and business culture.

Women
APEC is working to eliminate gender inequalities in social and economic life. Recognizing the significant contribution women make to economies, this year APEC continued its proactive agenda for the integration of women into APEC by completing a study on gender specific economic data and established the Gender Focal Point Network (GFPN). The GFPN will act as a mechanism for the integration and participation by women in the APEC process and in economic and social life in the Asia-Pacific region as a whole.
The Theme for the APEC 2003 year is “A World of Differences: Partnership for the Future.”

Bringing together the greatest potential of all APEC economies to confront the challenges of the future is the overarching goal of the 2003 APEC Year hosted by Thailand.

This central theme is further explained and supported by a series of five sub-themes that are designed to guide APEC’s Working Groups and Forums in achieving their goals for the year:

Knowledge-Based Economy (KBE) for All
KBE is the foundation of economic growth in the APEC region. Thailand is calling for APEC to redouble implementation of its KBE Strategy in support of the knowledge-based economy, maximizing the combined potential of information and communications technology, human resource development and a conducive legal and regulatory framework. APEC’s work in this area will enhance economies’ abilities to engage in broader trade and investment liberalization towards the Bogor Goals.

Promoting Human Security
Empowering people to become active and self-reliant in the regional economy is the essence of promoting Human Security. Through capacity building programs and providing opportunities for human resource development, the strengths and potential of all people in the APEC region can be better realized. As the region moves towards the Bogor Goals, the process of economic change must be properly coordinated and social safety nets strengthened to ensure that economic and social opportunities are accessible to all stakeholders.
Financial Architecture for a World of Differences
Reducing vulnerabilities while enhancing investment and trade between the differing social systems and economies requires sound international financial infrastructure. APEC is in a position to play a substantial role in reforming the global financial system. Attention to best practices of financial regulations and corporate governance is applicable to all economies regardless of the level of economic development. A financial infrastructure that recognizes the differences between APEC's members will also generate more options for investment and trade. An option Thailand would like APEC to focus on is the creation of an Asian bond market.

New Growth Enterprises: SMEs and Micro-Businesses
There is an abundance of untapped entrepreneurial capacity in the APEC region. Reducing red-tape to make it less complicated and less costly for small to medium businesses to trade across borders will make local economies stronger and create jobs. Extending resources for the creation of micro-businesses in both developed and developing economies strengthens the foundations for a broader distribution of income, enhanced economic stability and greater community development. Thailand will build upon the work initiated in the 2002 APEC Year.

Act on Development Pledge
The future prosperity of the APEC region depends on the dedication of APEC economies to set strategy and implement plans of action to meet regional and global pledges. It is crucial for economies to implement commitments made to the global economy through forums such as the United Nations, World Trade Organization and the United Nations Conference on Trade and Development.

On the Web

The APEC Secretariat – www.apecsec.org.sg contains information about APEC developments, issues and work programs and an APEC event calendar and links to key APEC websites.

Mexico 2002 Website – www.apec2002.org provides information about the meetings and outcomes of Mexico year as well as the schedule of meetings for 2002.

BizAPEC – www.bizapc.com is specifically designed for business and contains information, advice and tools to assist business to identify opportunities and uncover the rules, regulations and requirements needed to get goods and services to market in the Asia-Pacific region.

Economic and Technical Cooperation (ECOTECH) Clearing Housing – www.apec-ecotech.org supplies information about APEC’s ECOTECH work through publications, projects and websites, and provides an information exchange on economic and technical cooperation issues.

Electronic Individual Action Plans - www.apec-iap.org contains the Individual Action Plans of all 21 member economies, which detail the individual actions taken to meet APEC’s free trade and investment goals.

Publications

APEC publications can be downloaded free of charge from the APEC Secretariat website, www.apecsec.org.sg.

Key APEC Documents 2002 outlines the key policy decisions and initiatives endorsed by Leaders and Ministers, which provide the direction for on-going APEC work. Also available in this publication are the 2002 APEC Leaders’ Declaration and Statements from Ministerial Meetings.

Update of APEC Activities provides a concise summary of activities across the full spectrum of APEC’s work program. This publication is updated two to three times per year.

2002 APEC Economic Outlook updates and summarizes recent economic developments and short-term prospects for all APEC member economies. Also provided are the results of a study, “Microbanking Development, Regulation and Supervision”, which looks at the state of microbanking in the APEC region.
2002 Annual Report to Ministers – APEC Committee on Trade and Investment outlines the accomplishments of the CTI over the last 12 months and recommendations in the key priority areas of APEC’s trade and investment liberalisation and facilitation agenda.

2002 APEC SOM Report on Economic and Technical Cooperation contains an assessment of the number and types of ECOTECH projects being conducted by APEC and summarizes the ECOTECH activities of individual APEC fora. Information on progress in the implementation of key initiatives such as human capacity building, small and medium sized enterprises, sustainable development and strengthening markets is presented, as well as a review of the ECOTECH Action Plans of member economies.

2002 The New Economy in APEC: Innovations, Digital Divide and Policy outlines the key issues surrounding the New Economy and the Knowledge-Based Economy. The role of services in the New Economy, the contribution of information and communications technology to productivity growth in the services industry, the importance of entrepreneurship in the New Economy and the implications of the “digital divide” between economies and within economies are considered in this publication.

2002 The Benefits of Trade and Investment Liberalization and Facilitation in APEC contains the findings of a project to analyze the effects of APEC trade facilitation and investment liberalization and facilitation on APEC economies.

Ordering Publications
