Introduction

We recently celebrated APEC’s 25th Anniversary since its establishment in 1989. For the last quarter of a century, APEC’s 21 member economies have been working to improve prosperity in the Asia-Pacific by promoting trade and economic ties while addressing sustainability and social equity. Bringing the region closer together, reducing trade barriers, and smoothing out differences in regulations have boosted trade which, in turn, has led to a dramatic increase in prosperity.

However, APEC members recognize the region is at an important crossroads. Sustaining new growth will require capturing higher value-added economic activity—fueled by innovation and human resource capacity. Key structural reforms, such as improving local business climates and transparency in regulatory systems also play an important role in helping economies overcome the middle income trap and reap the benefits of higher income jobs.

APEC 2014, under China’s stewardship, launched a number of ground-breaking initiatives to help members transform their economies towards higher value-added growth. In particular, the rise of global supply chains—complex networks of suppliers, manufacturers and services that span the entire region—has provided impetus to further integrate Asia-Pacific economies. In 2014, APEC members committed to taking a concrete step towards greater regional economic integration by endorsing a roadmap to translate the vision of a Free Trade Area of the Asia-Pacific (FTAAP) into reality. As a first step, APEC will implement a collective strategic study on issues related to the realization of the FTAAP. To further bring the region closer together, APEC members agreed to implement the first APEC Connectivity Blueprint to connect the Asia-Pacific through better physical linkages, institutional ties and people mobility. The Blueprint maps out specific initiatives and targets to be achieved by 2025 from improving information technology infrastructure to making it easier for students, business people, and tourists to travel around the region.

Recognizing that sustaining growth will require accelerating the pace of reform and innovation, APEC members in 2014 endorsed the new APEC Accord on Innovative Development, Economic Reform and Growth. Under this accord, APEC will continue to implement key structural reforms to improve institutional frameworks, regulations and government policymaking processes so markets function efficiently and behind-the-border barriers are reduced. On tackling anti-corruption, APEC made great strides in 2014 by adopting new measures to fight corruption in the region, including the launch of the APEC Network of Anti-Corruption and Law Enforcement Agencies (ACT-NET) to fight corruption in the region, including the launch of the APEC Network of Anti-Corruption and Law Enforcement Agencies (ACT-NET) for cross-border cooperation on extradition of corrupt officials and recovery of assets.

To stimulate innovation, APEC members are carrying out initiatives to strengthen science capacity in the region, improve digital skills across all levels of society, and invest in early stage technology start-ups through the APEC Accelerator Network. In 2014, APEC economies also continued their work to build skilled and adaptable human resources. APEC 2015 will continue to build and improve human resources.

Finally, recognizing the changing global environment and increasing risks of disasters to the region, APEC 2015 will also prioritize building sustainable and resilient communities across all levels of society, and invest in early stage technology start-ups through the APEC Accelerator Network. In 2014, APEC economies also continued their work to build skilled and adaptable human resources.

APEC China 2014, under China’s stewardship, launched a number of ground-breaking initiatives to help members transform their economies towards higher value-added growth. China hosted APEC this year, marking 25 years of prosperity in the region since its establishment in 1989. Leaders gathered at Yanqi Lake, Beijing for the 22nd APEC Economic Leaders’ Meeting in November 2014.

After a quarter of a century of rapid growth, the Asia-Pacific has become the most dynamic region of the world and an important force in the global economic landscape. However, APEC economies are at critical juncture. Sustaining growth will require new efforts by members including consolidating regional economic integration, promoting economic reform and innovation, and strengthening connectivity and infrastructure development.

In 2014, APEC's work focused on the following priorities:

• Advancing regional economic integration
• Promoting innovative development, economic reform and growth
• Strengthening comprehensive connectivity and infrastructure development

I. Advancing Regional Economic Integration

Over the past 25 years, APEC’s role in facilitating regional integration has proven essential to promoting trade and economic growth in the Asia-Pacific. For example, reducing trade barriers between members, harmonizing standards and regulations, and streamlining customs procedures enable goods, services, investment and people to move easily across borders. Today, the region has reached an important point in its economic evolution. The rise of global supply chains—complex networks of suppliers, manufacturers and services that span the entire region—has provided impetus to further integrate the economies of the Asia-Pacific.

Realizing the Free Trade Area of the Asia-Pacific (FTAAP): APEC members committed to taking a concrete step towards greater regional economic integration by endorsing a roadmap to translate this vision into reality. By building on ongoing regional undertakings such as ASEAN+3, ASEAN+6 and the Trans-Pacific Partnership, APEC intends to play a role as an incubator for the FTAAP and help drive the vision forward. As a first step, APEC will implement a strategic study on issues related to the realization of the FTAAP. The study will provide an analysis of potential economic and social benefits and costs, analyze the various pathways towards FTAAP, and identify challenges economies may face in realizing the FTAAP.

APEC Information Sharing Mechanism on RTAs/FTAs: The proliferation of Regional Trade Agreements (RTAs)/Free Trade Agreements (FTAs) has resulted in a confusing “spaghetti bowl” of different agreements, posing new challenges to businesses and regional economic integration. By establishing an APEC Information Sharing Mechanism on RTAs/FTAs, members plan to increase transparency of existing trade agreements. This will enhance understanding among economies of possible pathways and build stakeholder support, contributing to the eventual realization of the FTAAP. Targeted capacity building projects are also being carried out to assist APEC economies realize the FTAAP.

Promoting Trade in Environmental Goods: APEC members reaffirmed their commitment to reduce applied tariffs to five per cent or less by the end of 2015 on a list of environmental goods and are pursuing ongoing capacity building work to help economies implement the Environmental Goods List and lower tariffs. The list of 54 environmental goods includes products such as solar panels, wind turbines or solar water heaters.
Outcomes

Support for the Multilateral Trading System: APEC members will continue to work together to strengthen the multilateral trading system by advancing the Doha Development Agenda (DDA) negotiations. APEC supports negotiations to expand the product coverage of the Information Technology Agreement (ITA). A final ITA expansion outcome should be commercially significant, credible, pragmatic, balanced, and reflective of the dynamic technological developments in the information technology sector over the last 17 years and contribute to the multilateral trading system. APEC members also reaffirmed pledges against all forms of protectionism and extended the standstill commitment through the end of 2019 and reaffirmed APEC’s commitment to roll back protectionist and trade-distorting measures. Regarding the impasse in the implementation of the World Trade Organization’s (WTO) Trade Facilitation Agreement (ITAE), APEC exerted creative leadership and energy together with all WTO members in addressing this impasse, so as to achieve the successful adoption of the Protocol amending the WTO Agreement, and putting the WTO back on track.

Global Value Chain Development

Supporting the complex cross-border trade involved in adding components to final products along the regional supply chain has become a key element to realizing a more effective policy along the regional supply chain. Initiatives include enhancing the investment climate for these networks to operate efficiently and competitively, assisting SMEs and developing economies to better participate in global value chains, and improving statistics on cross-border trade related to these networks such as value-added services.

II. Promoting Innovative Development, Economic Reform and Growth

The Asia-Pacific is at a crucial stage of economic transformation. Sustaining growth and enabling developing economies to capture higher value-added growth and income will require accelerating the pace of reform and innovation. Economic Reform, New Economy, Innovative Growth, Inclusive Support and Urbanization are the five pillars of the APEC Accord on Innovative Development, Economic Reform and Growth.

Economic Reform: Structural reforms and providing transparent regulatory systems are considered key elements for developing economies to overcome the Middle Income Trap and transform their economies to higher income status—a key focus for APEC this year. Members agreed to convene a Ministerial Meeting on Structural Reform in 2015. Members continued to advance structural reform and encourage wasteful consumption. Recognizing the importance of promoting diversified energy supplies and market-based competition, the APEC Sustainable Energy Center was created in China. APEC is also working to promote blue economy, sustainable marine development, forest management and rehabilitation as well as combating illegal logging and wildlife trade.

New Economy: Economies launched an initiative to promote the internet economy by facilitating technological and policy exchanges between members and by bridging the digital divide in the region. APEC economies agreed to work toward doubling the share of renewables by 2030 in APEC’s energy mix, including in power generation. Members also reaffirmed their commitment to rationalize and phase out inefficient fossil fuels subsidies that encourage wasteful consumption. Recognizing the importance of promoting diversified energy supplies and market-based competition, the APEC Sustainable Energy Center was created in China. APEC is also working to promote blue economy, sustainable marine development, forest management and rehabilitation as well as combating illegal logging and wildlife trade.

Innovative Growth: To build critical science capacity in the region, APEC members endorsed an initiative on innovative-driven development to strengthen collaboration between government, academia and the private sector. In order to promote an enabling environment for innovation, training centers for the commercialization of research were established. APEC continued its work to enhance SME participation in the global supply chain, promote ethical business practices as well as invest in early stage development of technology start-ups through the APEC Accelerator Network.

Inclusive Support: Member economies will implement measures under the “Healthy Asia-Pacific 2020” initiative. APEC members commit to undertake concrete policies and innovative measures to further enhance women’s economic empowerment and their access to markets and ICT technology, eliminate all barriers that hinder global trade, in these regional production networks and allow enterprises to source less expensive inputs globally, which in turn lowers costs, increases efficiency and enhances competitiveness.

Promoting Global Value Chain Development: Recognizing the importance of these producing networks across the region, APEC members agreed to a strategic blueprint to support global value chain development. Initiatives include enhancing the investment climate for these networks to operate efficiently and competitively, assisting SMEs and developing economies to better participate in global value chains, and improving statistics on cross-border trade related to these networks such as value-added services.

Improving Customs Procedures: APEC members adopted the APEC Customs 3M (mutual recognition of control, enforcement and information sharing) among customs agencies in the region to further simplify and coordinate procedures at borders. In order to streamline electronic processing at ports, the Asia-Pacific Model E-port Network (APMEN) was formed to help promote the state-of-the-art in cargo e-processing. Moreover, the use of standardized codes will enable information about goods to be shared across all economies, permitting APEC customs agencies to address safety recalls and illegal trade. To promote the implementation of global data standards and their wider use through pilot projects, APEC economies are working closely with the private sector.

APEC Supply Chain Alliance: To continue to achieve an APEC-wide target of a ten per cent improvement in supply-chain performance by 2015 in terms of time, cost and uncertainty of moving goods and services, members established the APEC Alliance for Supply Chain Connectivity. APEC will continue targeted capacity building projects to help APEC economies improve supply chain performance.

During its design, APEC economies continued to make it easier to do business and strengthened the role of international law organizations to settle disputes.

Economies launched an initiative to promote the internet economy by facilitating technological and policy exchanges between members and by bridging the digital divide in the region. APEC economies agreed to work toward doubling the share of renewables by 2030 in APEC’s energy mix, including in power generation. Members also reaffirmed their commitment to rationalize and phase out inefficient fossil fuels subsidies that encourage wasteful consumption. Recognizing the importance of promoting diversified energy supplies and market-based competition, the APEC Sustainable Energy Center was created in China. APEC is also working to promote blue economy, sustainable marine development, forest management and rehabilitation as well as combating illegal logging and wildlife trade.

Members also reaffirmed their commitment to rationalize and phase out inefficient fossil fuels subsidies that encourage wasteful consumption. Recognizing the importance of promoting diversified energy supplies and market-based competition, the APEC Sustainable Energy Center was created in China. APEC is also working to promote blue economy, sustainable marine development, forest management and rehabilitation as well as combating illegal logging and wildlife trade.
women’s economic participation, and ensure women’s equal opportunities, participation and benefit in innovative development, economic reform and growth. APEC economies will carry out the APEC Food Security Roadmap toward 2020 and action plan for reducing food loss and waste. New anti-corruption measures were endorsed including the Beijing Declaration on Fighting Corruption and the APEC Principles on the Prevention of Bribery and Enforcement of Anti-Bribery Laws. The recently launched APEC Network of Anti-Corruption and Law Enforcement Agencies (ACT-NET) is combating large-scale corruption by working together across the region on repatriation or extradition of corrupt officials as well as confiscation and recovery of assets.

Urbanization: With the rise of urbanization in the Asia-Pacific, APEC intends to promote the sustainable development of urban areas through a newly adopted Asia-Pacific partnership on urbanization. Members continued to implement the successful multi-year Low Carbon Model Town project to facilitate the use of energy efficient infrastructure from solar panels to electric vehicles in cities around the region. Members commit to collectively promote cooperation projects on urbanization, and to further explore pathways to a new-type of urbanization and sustainable city development, featuring green, energy efficient, low-carbon and people-orientation.

III. Strengthening Comprehensive Connectivity and Infrastructure Development

Connecting the region through better physical infrastructure linkages, easier people mobility, and closer cross-border institutional ties will help bring APEC economies together and promote growth, trade, and people-to-people exchanges.

APEC Connectivity Blueprint: Members agreed to implement the first APEC Connectivity Blueprint to strengthen physical, institutional and people-to-people connectivity by taking agreed actions and meeting agreed targets by 2025, with the objective of achieving a seamless, comprehensively connected, and integrated Asia Pacific. The Blueprint contains existing connectivity-related initiatives; encourages reviving those initiatives that require further progress; and proposes future initiatives for more efficient flows of goods, services, capital and people to drive APEC progress. The Blueprint maps out specific initiatives from enhancing infrastructure financing, improving information technology and transportation infrastructure to making it easier for students, business people and tourists to travel around the region.

Infrastructure Investment through Public-Private Partnerships: Public-private partnerships are a key mechanism for economies to procure financing for infrastructure projects. The APEC PPP Experts’ Advisory Panel and Pilot PPP Center in Indonesia began its work this year and helped APEC economies tap into private sector sources of funding for infrastructure development. For example, APEC is assisting economies to structure infrastructure deals that are attractive to the private sector and to adopt a more comprehensive proposal evaluation methodology. A new roadmap guides APEC’s work to promote PPP and a second PPP Center in China was created as a center of excellence to help with capacity building for economies.

Enhanced Business Travel in the Region: The APEC Business Travel Card enables business travelers to enjoy fast-track entry and exit in airports in 19 participating economies. This year, APEC economies agreed in principle to extend the travel card’s valid period from 3 to 5 years, while the US and Canada opened the card to their residents for the first time, offering expedited customs processing at airports in other APEC economies and increasing participation in the program across the region.

Increase Tourism in Region: APEC set a goal to increase the number of international tourist arrivals in APEC economies to 800 million by 2025. APEC’s travel facilitation initiative is making it easier for tourists to travel around the region.

Cross-Border Education: In order to achieve one million intra-APEC student exchanges by 2020 and to increase the number of student exchanges to developing economies, APEC will continue its efforts to improve cross-border education cooperation. In particular, the APEC Higher Education Research Center (AHERC) and the APEC Scholarship Initiative were formed.

THE 22ND APEC ECONOMIC LEADERS’ DECLARATION
Beijing, China • November 11, 2014

Beijing Agenda for an Integrated, Innovative and Interconnected Asia-Pacific

1. We, the APEC Leaders, gathered by Yanqi Lake in Beijing for the 22nd APEC Economic Leaders’ Meeting. Under the theme of “Shaping the Future through Asia-Pacific Partnership”, we held substantial discussions on the priorities of advancing regional economic integration, promoting innovative development, economic reform and growth, and strengthening comprehensive connectivity and infrastructure development with a view to expanding and deepening Asia-Pacific regional economic cooperation, and attaining peace, stability, development and common prosperity of the Asia-Pacific.

2. The Asia-Pacific region has experienced a quarter of a century’s growth and development. APEC has not only made significant contributions to the region’s economic development, social progress and improvement of people’s livelihoods, but has also optimized the great changes and rising strategic position of the Asia-Pacific. Through its unique approach featuring voluntary action, consensus, flexibility and pragmatism, APEC has successfully established a sound regional economic cooperation framework among member economies with remarkable diversity and at different stages of development. Adhering to the spirit of mutual respect and trust, mutual assistance and win-win cooperation, we have been working to narrow the development gap among ourselves and have consistently promoted the robust, sustainable, balanced, inclusive and secure growth in the Asia-Pacific region and beyond.

3. After years of rapid development, the Asia-Pacific has become the most dynamic region of the world, and has never been as important as it is today in the global landscape. At present, the Asia-Pacific maintains a strong momentum of growth; it possesses an enormous potential and has a bright future. Yet it is also faced with risks and challenges.

4. We are at an important historical moment of building on past achievements and striving for new progress. We are committed to working together to shape the future through Asia-Pacific partnership, building an open economy in the Asia-Pacific featuring innovative development, interconnected growth, and shared interests, and consolidating the leading role of the Asia-Pacific in the world economy, with a goal of opening up new prospects for future cooperation and achieving common prosperity in the Asia-Pacific region.

5. To achieve the above-mentioned goals, we pledge to take the following actions:

1. Advancing Regional Economic Integration

Pursuing Free and Open Trade and Investment

6. We reiterate the value, centrality and primacy of the multilateral trading system in promoting trade expansion, economic growth, job creation and sustainable development. We stand firmly together to overcome any hindrance or breakdown in the implementation of the WTC and WTO reforms; to maintain a strong momentum of growth in the Asia-Pacific region, and to promote peaceful development and shared interests.

7. We express our grave concern regarding the stalled progress of the Bali Ministerial Conference in Phnom Penh and India’s proposal for the implementation of the WTO safeguard agreement. Recognizing the importance of the negotiations to expand economic growth, we reiterate our commitment to the multilateral trading system as embodied in the World Trade Organization (WTO) and reaffirm our commitment to roll back protectionist measures, where necessary.

8. We reaffirm our commitment to the multilateral trading system as embodied in the World Trade Organization (WTO) and reaffirm our commitment to roll back protectionist measures, where necessary.

9. We acknowledge that bilateral, regional and plurilateral trade agreements can play an important role in complementing global trade liberalization initiatives. We will continue to work together to ensure that they contribute to strengthening the multilateral trading system.

10. We welcome the significant progress made toward achieving the Bogor Goals. We will make every effort to achieve the Bogor Goals by 2020. We also welcome the important progress made toward achieving the Bogor Goals.

II. Pursuing Open and Free Trade

Pursuing Free and Open Trade and Investment

6. We reiterate the value, centrality and primacy of the multilateral trading system in promoting trade expansion, economic growth, job creation and sustainable development. We stand firmly together to overcome any hindrance or breakdown in the implementation of the WTC and WTO reforms; to maintain a strong momentum of growth in the Asia-Pacific region, and to promote peaceful development and shared interests.

7. We express our grave concern regarding the stalled progress of the Bali Ministerial Conference in Phnom Penh and India’s proposal for the implementation of the WTO safeguard agreement. Recognizing the importance of the negotiations to expand economic growth, we reiterate our commitment to the multilateral trading system as embodied in the World Trade Organization (WTO) and reaffirm our commitment to roll back protectionist measures, where necessary.

8. We reaffirm our commitment to the multilateral trading system as embodied in the World Trade Organization (WTO) and reaffirm our commitment to roll back protectionist measures, where necessary.

9. We acknowledge that bilateral, regional and plurilateral trade agreements can play an important role in complementing global trade liberalization initiatives. We will continue to work together to ensure that they contribute to strengthening the multilateral trading system.

10. We welcome the significant progress made toward achieving the Bogor Goals.

II. Pursuing Open and Free Trade

Pursuing Free and Open Trade and Investment

6. We reiterate the value, centrality and primacy of the multilateral trading system in promoting trade expansion, economic growth, job creation and sustainable development. We stand firmly together to overcome any hindrance or breakdown in the implementation of the WTC and WTO reforms; to maintain a strong momentum of growth in the Asia-Pacific region, and to promote peaceful development and shared interests.

9. We acknowledge that bilateral, regional and plurilateral trade agreements can play an important role in complementing global trade liberalization initiatives. We will continue to work together to ensure that they contribute to strengthening the multilateral trading system.

10. We welcome the significant progress made toward achieving the Bogor Goals.
Outcomes

13. We welcome the establishment of a Committee on Trade and Investment (CTI) Friends of the Chair Group on Strengthening Regional Economic Integration (REI) and Advancing FTAAP; and urge the Friends of the Chair Group to continue its work. We agree to launch a collective strategic study on issues related to the realization of the FTAAP and instruct officials to undertake the study, consult stakeholders and report the result by the end of 2016.

14. We endorse the establishment of an APEC Information Sharing Mechanism on RTAs/FTAs. We highlight the work on the implementation of the Action Plan Framework on Capacity Building Needs Initiatives (CBNI) and endorse the Action Plan Framework of the 2nd CBNI. We instruct officials to design targeted and tailor-made Public-Private Partnership (PPP) and Infrastructure Investment through licensing and partnerships.

15. In addition to the above, we reaffirm the role of APEC in addressing next generation trade and investment issues and sectoral initiatives, and agree to accelerate “at the border” trade liberalization and facilitation efforts, improve the business environment “behind the border”, and enhance regional connectivity “across the border” to accumulate more building blocks for the realization of the FTAAP. Therefore, we:

- Reaffirm our commitment to reduce applied tariffs to five percent or less by the end of 2015 on the list of environmental goods that we endorsed in 2012 in Vladivostok. We call upon all economies to rebuild their efforts in order to realize the economic and environmental benefits. We will instruct officials to report progress in achieving this ground-breaking commitment at our next meeting in the Philippines. We welcome the work on capacity building on Environmental Goods (EGs) commitment implementation;

- Welcome the inaugural meeting of the APEC Public Private Partnership on Environmental Goods and Services (PPEGS) on renewable and clean energy trade and investment, and endorse the APEC Statement on Promoting Renewable and Clean Energy (RCE) Trade and Investment;

- Welcome the progress on exploring products which could contribute to sustainable and inclusive growth as part of our concrete commitment to rural development and poverty alleviation;

- Endorse the APEC Action Agenda on Promoting Infrastructure Investment through Public-Private Partnership (PPP) and instruct officials to take concrete actions to strengthen cooperation on PPP to promote more robust and sustainable infrastructure investment and development in the APEC region;

- Welcome the Case Studies on Sustainable Investment in the APEC Region and encourage officials to consider and draw experience and good practices from the nominated cases to promote sustainable cross-border investment;

- Endorse the APEC Cross Border E-Commerce Innovation and Development Initiative and encourage economies to designate or establish Research Centers of Cross-border E-commerce Innovation and Development on a voluntary basis;

- Recognize that the effective protection and enforcement of IPR including trade secrets incentives and facilitates innovation and foreign direct investment and the dissemination of technology through licensing and partnerships;

- Endorse the APEC Action Agenda on Advertising Standards and Practice Development to promote alignment of advertising standards and improve the cost of doing business across the region;

- Endorse the Asia-Pacific Regional Automotive Industry Sustainable Development Declaration and welcome the outcomes of the 2014 APEC Regulatory Cooperation Advancement Mechanism (ARCAM) Dialogue on Electric Vehicles. We welcome the APEC Actions to Promote the Widespread Usage of Electric Vehicles.

Advancing Global Value Chain Development and Supply Chain Connectivity

16. Recognizing that Global Value Chains (GVCs) have become a dominant feature of the global economy and offer new prospects for growth, competitiveness and job creation for APEC economies at all levels of development, we endorse the APEC Strategic Blueprint for Promoting Global Value Chain Development and Cooperation (APEC Blueprint) as a reference point for further our trade facilitation objectives. We welcome the Case Studies on Sustainable Investment in Green Supply Chain in Tianjin, China, and encourage other economies to establish the pilot centers and advance related work actively.

17. We endorse the Strategic Framework on Measurement of APEC TIVA under GVCs and the Action Plan on this Strategic Framework. We instruct the newly-formed technical group to work closely with the WTO, OECD, the World Bank, UNCTAD and other related international organizations, with an aim to complete the construction of the APEC TIVA Database by 2018.

18. We endorse the Terms of Reference of Promoting SME’s Integration into GVCs and welcome the launch of the related activities. We encourage officials to make further efforts to contribute to regional trade facilitation and supply chain connectivity.

19. We positively value the APEC High-level Roundtable on Green Development and its declaration, and agree to establish the APEC Cooperation Network on Green Supply Chain. We endorse the establishment of the first pilot center of APEC Cooperation Network on Green Supply Chain in Tianjin, China, and encourage other economies to establish the pilot centers and advance related work actively.

20. We agree to establish the Asia-Pacific Model E-port Network (APMEN) and welcome the first batch of APEC Model E-ports nominated by the APEC economies. We endorse the Terms of Reference of APEC Model E-port Network to set up the APMEN operational center in the Shanghai Model E-port, and instruct officials to make further efforts to contribute to regional trade facilitation and supply chain connectivity.

21. We positively value the APEC High-level Roundtable on Green Development and its declaration, and agree to establish the APEC Cooperation Network on Green Supply Chain. We endorse the establishment of the first pilot center of APEC Cooperation Network on Green Supply Chain in Tianjin, China, and encourage other economies to establish the pilot centers and advance related work actively.

22. We endorse the APEC Customs 3M (Mutual Recognition of Control, Mutual Assistance of Enforcement and Mutual Sharing of Information) Strategic Framework. We instruct officials to further specify and coordinate APEC customs procedures based on the 3M Framework to facilitate the development of regional trade. We encourage APEC member economies to continue strengthening cooperation and coordination in pursuit of the 3M vision, to push forward comprehensive connectivity and make greater contributions to the sustainable development of trade and regional economic integration in the Asia-Pacific region.

23. We recognize that the use of standardized codes will enable information about traded goods to be easily understood and shared by all parties. We therefore encourage APEC economies to work with the private sector to promote further cooperation on global data standards and their wider use by developing pilot projects.

24. We welcome the initiative on manufacturing related trade and investment issues and sectoral initiatives, and agree to establish the pilot centers as a next generation trade and investment issue, and instruct officials to develop a plan of action in 2015.
25. We endorse the APEC Strategic Plan on Capacity Building to Promote Trade and Investment Agenda which adopts a strategic, goal-oriented and multi-year approach. We instruct officials to take the Strategic Plan as a guide to develop and implement more tailor-made capacity building programs that contribute to the core trade and investment liberalization and facilitation agenda of APEC.

26. We encourage economies, particularly developed economies, to provide more contributions to ECOTECH and capacity building, to achieve our goal of bridging development gaps, and help member economies to meet their APEC commitments and their economic growth objectives.

27. We welcome the initiative to upgrade the Asia Pacific Finance and Development Center (AFDC) to the Asia Pacific Finance and Development Institute (AFDI).

II. Promoting Innovative Development, Economic Reform and Growth

28. We realize that the prospects for the shared prosperity of APEC will depend on innovative development, economic reform and growth in the region, which are complementary and mutually reinforcing. We recognize that the Asia-Pacific region is at a crucial stage of economic transformation. We are committed to accelerating the pace of reform and innovation, and exploring new growth areas with the goal of bolstering the position of the Asia-Pacific as an engine for world economic growth. We agree to strengthen macroeconomic policy coordination with a view to forging policy synergy, and creating a sound policy environment for the robust, sustainable, balanced and inclusive economic growth in the region.

29. We endorse the APEC Accord on Innovative Development, Economic Reform and Growth (Annex C) which identifies Economic Reform, New Economy, Innovative Growth, Inclusive Support and Urbanization as the five pillars for promoting experience sharing, policy dialogue, capacity building and practical cooperation.

30. To advance APEC’s economic reform agenda, we agree to hold the 2nd Ministerial Meeting on Structural Reform in 2015. Recognizing that many APEC developing economies are facing the challenge of the Middle-Income Trap (MIT), we agree to incorporate the issue of overcoming the MIT into the work program of the APEC Economic Committee.

31. To meet our objective of strengthening the implementation of good regulatory practices, we will further enhance communication, exchanges, and sharing of experiences, and foster an open and transparent regulatory environment in our economies, according to individual economies’ needs and circumstances. We will endeavor to take new actions through the use of information technology and the Internet to improve our conduct of public consultations on proposed regulations.

32. We recognize the role of internationally recognized private international law instruments such as the Hague Conventions in facilitating cross-border trade and investment, enhancing ease of doing business, and fostering effective enforcement of contracts and efficient settlement of business disputes. We encourage wider use of these instruments which would contribute to APEC’s regional integration, connectivity and structural reform agenda.
33. We recognize the role of the Internet Economy and promote green, circular, low-carbon and energy-efficient development.

34. We are encouraged by the progress of APEC’s ocean-related cooperation and welcome the Xiamen Declaration issued at the 4th APEC Oceans Ministerial Meeting this year, and instruct our Ministers and officials to fully implement the Declaration. We acknowledge the Xiamen Declaration’s statement on the Blue Economy. We welcome the APEC Marine Sustainable Development Report. We encourage the Ocean and Fisheries Working Group to work with APEC fora to advance Blue Economy Ocean and Fisheries Working Group to work with APEC fora to advance Blue Economy.

35. We recognize the role of the Internet Economy in promoting innovative development and empowering economic participation. We endorse the APEC Initiative of Cooperation to Promote the Internet Economy and instruct Ministers and officials to discuss the Internet Economy further, put forward proposals for actions, promote member economies’ cooperation on developing the Internet Economy and facilitate technological and policy exchanges among member economies, taking into account the need to bridge the digital divide.

36. We welcome the Beijing Declaration of the 2014 APEC Energy Ministerial Meeting. We welcome the establishment of the APEC Sustainable Energy Center in China. We recognize the importance of promoting diversified energy supplies, and market-based competition and pricing mechanisms that reflect demand and supply fundamentals as appropriate to each economy. We encourage member economies to take actions to eliminate trade protection and restrictive measures that may impede progress in renewable energy technologies and development of this sector, and we endorse the Energy Ministerial aspirational goal to double the share of renewables including in power generation by 2030 in APEC’s energy mix. We affirm our commitment to rationalize and phase out inefficient fossil fuel subsidies that encourage wasteful consumption while still providing essential energy services. We acknowledge Peru and New Zealand for initiating voluntary peer reviews in 2014 of inefficient fossil fuel subsidies that cause wasteful consumption and encourage other economies to follow this practice, and we welcome the commitment from the Philippines to undertake a peer review in 2015. We encourage innovation, competition and cooperation to promote a sound and sustainable energy sector in the Asia-Pacific and to ensure its energy security, economic growth, poverty eradication and an appropriate response to climate change.

37. We emphasize the importance of efforts to ensure sustainable development in mining, including the development, processing, utilization, investment and trade in minerals, metals and related products and welcome Ministers’ views recognizing the important role of the Minamata Convention on Mercury.

38. We will continue our efforts to protect forest resources, combat illegal logging and associated trade, promote sustainable forest management, and work with relevant organizations, including the Asia-Pacific Network on Sustainable Forest Management and Rehabilitation (APFNat), to ensure the achievement of the aspirational goal on forests in the Sydney Declaration.

39. We commit to continue our efforts in combating wildlife trafficking. We will take steps to combat wildlife trafficking by enhancing international cooperation through Wildlife Enforcement Networks (WENs) and other existing mechanisms, reducing the supply of and demand for illegally traded wildlife, increasing public awareness and education related to wildlife trafficking and its impacts, and treating wildlife trafficking crimes seriously.

Innovative Growth

40. We recognize innovative growth as an important lever for economic growth and structural reform. We endorse the initiative on Toward Innovation-Driven Development. We commit to foster a pragmatic, efficient and vigorous partnership on science, technology and innovation. We agree to strengthen collaboration amongst government, academia, and private sector stakeholders to build science capacity, to promote an enabling environment for innovation and including by establishing training centers for the commercialisation of research, and to enhance regional science and technology connectivity, with respect for intellectual property rights and trade secrets.

41. We welcome the Nanning Declaration on Promoting SMEs Innovative Development. We commit to strengthen our support, and provide an enabling environment for SMEs in innovation activities. We welcome efforts to strengthen SMEs’ cooperation in the Asia-Pacific region, invole SMEs in APEC production and supply chains, promote ethical business practices, as well as to empower their capacity to operate in an international market. We welcome member economies’ joint efforts and contribution to promote the APEC Accelerator Network and to invest in the early stage development of innovative SMEs.

Inclusive support

42. We recognize that inclusive support is essential to maintain growth and to deal with risks and potential failure of reform, with an aim to provide a solid foundation for economic growth and to address the needs of vulnerable groups. We welcome the outcomes of the 6th Human Resources Development Ministerial Meeting and the Action Plan (2015-2018) on Promoting Quality Employment and Strengthening People-to-People Connectivity through Human Resources Development. We commit to strengthen our support, and provide an enabling environment for innovation and development of an APEC-wide women’s entrepreneurship network to empower women entrepreneurs to start and grow businesses, and increase their access to domestic and international markets.

43. We welcome recommendations from the 4th High Level Meeting on Health and the Economy and endorse the “Healthy Asia-Pacific 2020” initiative, which aims to achieve sustainable development and improve health systems that will ensure people’s health, including physical and mental well-being, through the whole life-course by means of a whole-of-government, and whole-of-society approach with the collaboration of the entire Asia-Pacific region.

44. We commit to jointly tackle pandemic diseases, terrorism, natural disasters, climate change and other global challenges. In confronting the current Ebola Virus Disease epidemic, we are determined to intensify our cooperation and work shoulder to shoulder with African nations to help them effectively end this epidemic and prevent, detect, manage and respond to pandemic diseases effectively end this epidemic and prevent, detect, manage and respond to pandemic diseases effectively end this epidemic and prevent, detect, manage and respond to pandemic diseases effectively end this epidemic and prevent, detect, manage and respond to pandemic diseases effectively end this epidemic and prevent, detect, manage and respond to pandemic diseases.

45. We endorse the Beijing Declaration on APEC Food Security issued at the Third APEC Ministerial Meeting on Food Security. We welcome APEC Action Plan for Reducing Food Loss and Waste, the APEC Food Security Business Plan (2014-2020), and the APEC Food Security Roadmap toward
Outcomes

2020 (2014 version) and the Action Plan to Enhance Connectivity of APEC Food Standards and Safety Assurance. We note the G20’s work on food security in 2014. We call on APEC economies to seek common ground to build an open, inclusive, mutually-beneficial and all-win partnership for the long-term food security of the Asia-Pacific region. We will strengthen APEC agricultural science and technology innovation and cooperation to advance sustainable agricultural development and support sustainable fisheries.

47. We commend the ongoing efforts of the APEC Food Safety Cooperation Forum (FSCF) and its Partnership Training Institute Network (PTIN), which will help ensure the safety of food produced and traded in the APEC region by improving food safety regulatory systems, encouraging harmonization with international science-based standards, building capacity in areas that will facilitate trade, and enhancing communication and collaboration between industry and regulators to address emerging food safety issues. We welcome the APEC Food Safety Beijing Statement of the 2014 APEC High-Level Regulator Industry Dialogue on Food Safety.

48. We commend the strong resolve shown in fighting corruption, including through effective anti-corruption measures. We support the Beijing Declaration on Fighting Corruption and welcome the APEC Principles on the Prevention of Bribery and Enforcement of Anti-Bribery Laws, and APEC General Elements of Effective Voluntary Corporate Compliance Programs. We commit to work together against corruption and deny safe havens for corrupt officials and their illicitly-acquired assets. We are committed to strengthening cooperation and coordination on repatriation or extradition of corrupt officials as well as confiscation and recovery of corruption proceeds, and where appropriate, through the use of anti-corruption mechanisms and platforms such as the APEC Network of Anti-Corruption and Law Enforcement Agencies (ACT-NET).

49. We encourage further cooperation of member-economies in disaster preparedness, risk reduction, response and post-disaster recovery, and cooperation in search and rescue, including through more robust networking among disaster management departments; following the APEC Guidelines on Appropriate Donations; improving supply chain resiliency; operationalizing the Trade Recovery Programme, reducing barriers to the movement of emergency responders and humanitarian relief across borders; increased data sharing; and application of science and technologies.

50. We reiterate our resolve to create a secure and resilient environment for economic activities and connectivity in the APEC region and continue concerted efforts to implement the APEC Consolidated Counter-Terrorism and Secure Trade Strategy.

51. We recognize that the Asia-Pacific is currently experiencing booming urbanization. We realize that sustained and healthy development of urbanization is conducive to promoting innovative growth and realizing robust, inclusive and sustainable development in the Asia-Pacific.

52. We commend the constructive work undertaken by APEC this year in promoting urbanization cooperation in the Asia-Pacific region, and endorse the APEC Cooperation Initiative for Jointly Establishing an Asia-Pacific Urbanization Partnership.

53. Recognizing the range of urbanization challenges and opportunities across APEC economies, we commit to collectively promote cooperation projects, and to further explore pathways to a new-type of urbanization and sustainable city development, featuring green, energy efficient, low-carbon and people-orientation.

III. Strengthening Comprehensive Connectivity and Infrastructure Development

54. We recognize that strengthening comprehensive connectivity and infrastructure development will help open up new sources of economic growth, promote cooperation and mutual assistance, and advance prosperity and the spirit of community in the Asia-Pacific region. We commend the achievements already made by APEC in connectivity and infrastructure development cooperation.

55. We endorse the APEC Connectivity Blueprint for 2015-2025 (Annex D). We are committed to implementing the APEC Connectivity Blueprint and achieving the overarching goal of strengthening physical, institutional and people-to-people connectivity by taking agreed actions and meeting agreed targets by 2025, with the objective of achieving a seamless and comprehensively connected and integrated Asia-Pacific.

56. We commit to solve the financing bottleneck of infrastructure development. We commend the work and progress accomplished under the APEC Finance Ministers’ Process (FMP) in infrastructure investment and financing cooperation. We recognize, in particular, efforts in promoting PPP on infrastructure, such as compiling demonstrative infrastructure PPP projects, advancing the work of the PPP Experts Advisory Panel, strengthening capacity building of Indonesia’s Pilot PPP Center, and carrying on capacity building project of PPP pilot demonstration and standard contract making. We welcome the Implementation Roadmap to Develop Successful Infrastructure PPP Projects in the APEC Region to guide APEC’s future work in this aspect. We welcome the establishment of the PPP Center in China as a center of excellence.

57. We encourage member economies to strengthen energy infrastructural development and connectivity, such as oil and natural gas pipelines and transmission networks, LNG terminals, smart grids and distributed energy systems on the basis of shared interest and mutual benefit.

58. We encourage all member economies to take effective measures to promote the mobility of business personnel, tourists, researchers, students and labor in the region.

59. We support initiatives and activities that further enhance the three dimensions of cross-border education cooperation found in the 2012 Leaders Declaration—mobility of students, researchers, and providers. We applaud the work that has been accomplished this year, including the establishment of the APEC Higher Education Research Center (AHERC); contributions to the APEC scholarships and internships initiative, which will encourage people-to-people exchange in our region; and promotion of virtual academic mobility by leveraging internet-based resources and innovative learning practices.
Outcomes

60. We support the target set at the 8th APEC Tourism Ministers’ Meeting of making efforts to receive 800 million international tourist arrivals in APEC economies by 2025.

61. We appreciate the initiatives which will greatly improve connectivity and infrastructure in the Asia-Pacific region, help resolve the bottleneck of financing in this field, and promote regional economic integration and the common development of the Asia-Pacific.

IV. Looking Forward

62. With joint efforts of member economies, the Asia-Pacific has become the most dynamic region of the world with enormous growth potential. Never before has the world been more in need of a harmonious, stable and prosperous Asia-Pacific. We commit to working together to shape the future through Asia-Pacific partnership in the spirit of mutual respect and trust, inclusiveness, and win-win cooperation, and making a contribution to the long-term development and common prosperity of the region.

63. We commit to carry forward APEC reform, improve its cooperation mechanisms, and implement ambitious goals and blueprints, with the aim of enabling APEC to play a more active coordinating and leading role in the Asia-Pacific.

64. We commend the constructive role of the APEC Business Advisory Council (ABAC) in strengthening public-private partnership and promoting APEC cooperation in various fields.

65. We are committed to enhancing APEC synergy with other relevant international and regional cooperation organizations and fora through coordination and cooperation, as well as aligning APEC to play an increasingly important role in the global governance system.

66. We are satisfied with the positive, meaningful and fruitful achievements of this meeting and appreciate China’s tremendous and fruitful efforts to successfully host this meeting.

67. We are committed to supporting future hosts of APEC, including Peru, Viet Nam, Papua New Guinea, Chile, Malaysia, New Zealand and Thailand who are to host APEC in the years of 2016, 2017, 2018, 2019, 2020, 2021 and 2022 respectively.

68. We look forward to convening again during the Philippines’ hosting of APEC in 2015.
Outcomes

STATEMENT ON THE 25TH ANNIVERSARY OF APEC
Beijing, China • 11 November, 2014

Shaping the Future through Asia-Pacific Partnership

1. We, the Leaders of the Asia-Pacific Economic Cooperation (APEC), having met by Yanqi Lake, Beijing, China for the 22nd APEC Economic Leaders’ Meeting, hereby issue this statement today to commemorate the 25th anniversary of APEC:

2. We recall the establishment of APEC in 1989, which opened up a new historic chapter for economic cooperation in the Asia-Pacific. Over the course of the past 25 years, in pursuit of economic growth, better wellbeing of people, and common prosperity of the region, APEC has propelled progress through “two wheels” — trade and investment liberalization and facilitation and economic and technical cooperation. Having contributed to global efforts in meeting the grave challenges of the Asian Financial Crisis and the International Financial Crisis, APEC member economies have been the main engine of global growth.

3. We are pleased to note that APEC has become the premier, and most extensive and influential regional economic cooperation forum in the Asia-Pacific, unified in a common drive to build a dynamic and prosperous Asia-Pacific community.

4. We acknowledge the historical achievements and the remarkable results APEC has delivered since its establishment in 1989. In the course of the past 25 years, the average applied tariffs of APEC economies have fallen by more than 50 percent, contributing to a seven-fold increase in both intra-APEC merchandise trade and APEC’s total trade, as well as higher economic growth compared to the rest of the world.

5. We recognize with appreciation that many successful experiences can be drawn from the 25 years of APEC:

   • APEC has established the Bogor Goals, putting forward two timelines calling for the realization of free and open trade and investment by 2010 for industrialized economies and by 2020 for developing economies.

   • APEC recognizes the importance of trade as a key to job creation, economic growth and sustainable development, and reiterates the value, centrality and primacy of the multilateral trading system as embodied in the WTO. Historically, APEC has been consistently supporting the rules-based multilateral trading system, and played a leading role in facilitating the conclusion of the Uruguay Round in 1994, launching the Doha Development Agenda (DDA) in 2001, and achieving a successful conclusion of the Information Technology Agreement (ITA) in 1996, launching the Information Technology Agreement (ITA) Expansion negotiations in 2012 and Environmental Goods Agreement (EGA) negotiations in 2014, as well as achieving Bali Package in 2013. In support of “free and open trade and investment”, APEC economies committed to refraining from raising new trade and investment barriers and combating protectionism in all its forms.

   • APEC has been a pioneer, pathfinder in regional and global economic cooperation, advancing the process towards the eventual realization of the Free Trade Area of the Asia-Pacific (FTAAP), promoting trade facilitation, including expedited business travel through the APEC Business Travel Card, supporting the development of Global Value Chains (GVCs), launching the APEC Growth Strategy, promoting trade in environmental goods and services, improving supply chain performance, promoting connectivity, strengthening the implementation of good regulatory practices, and addressing the next generation trade and investment issues.

   • APEC has carried out practical cooperation in a wide range of areas, including structural reform and convergence, women and the economy; health, education and labor; climate change; food security and food safety; energy security and sustainable energy development; green economy; blue economy; small and medium enterprises; information and communications technology; transport; infrastructure development and investment; forestry; mining; counter-terrorism; emergency preparedness; and, anti-corruption.

6. APEC has established a mechanism through the APEC Business Advisory Council to receive valuable inputs from the business sector in its policy deliberations. APEC fully appreciates the active role played by business communities in advancing the APEC agenda. APEC industry dialogues and partnerships in a range of business sectors play a unique role in enhancing the economic cooperation and integration among the member economies. We reaffirm the significant value that public-private activities have contributed to APEC work.

New Opportunities and Challenges

7. We recognize that today, 25 years on, the APEC and the Asia-Pacific economies are at a new historical starting point, and are facing unprecedented opportunities and challenges.

8. We are pleased to note that the overall development of the Asia-Pacific region has been sound and steady. With multiple efforts to reform and promote innovative development, the Asia-Pacific region is consolidating its leading role as an engine of global economic growth. We are full of confidence in the bright future of the Asia-Pacific region.

9. At the same time, we are facing grave challenges in various aspects. We also realize that in a world of burgeoning global and regional economic cooperation institutions, APEC must constantly pursue new and innovative ways to achieve its objectives and continue to keep up with the global economic trends to play its leading and coordinating role. APEC is expected to consolidate and advance regional economic cooperation, support the multilateral trading system, resist protectionism in all its forms, and guard against the risks of fragmentation.

10. It is therefore imperative for member economies to find new avenues and driving forces for growth in the post-crisis era. To this end, APEC economies are committed to redoubling efforts to achieve breakthroughs or bottlenecks and work to ensure that enhanced connectivity and infrastructure development will meet the growing needs of the member economies.

Shaping the Future through Asia-Pacific Partnership

11. Today, we gather to celebrate our successes and also look ahead, envisioning the future prospect and direction of the long-term development of the Asia-Pacific. We are fully committed to maintaining APEC’s profile as the premier forum for supporting sustainable economic growth and prosperity and advancing free and open trade and investment in the Asia-Pacific.

12. We commit ourselves to building upon APEC’s historical achievements, carrying forward
the spirit of cooperation, and shaping the future through an Asia-Pacific partnership that is built on mutual respect and trust, inclusiveness, and win-win cooperation.

13. We are committed to jointly building an open economy in the Asia-Pacific that is based on innovative development, interconnected growth, and shared interests.

14. Building on its proud tradition of leadership in advancing WTO process, we shall continue to work together to safeguard and strengthen the strong and vibrant multilateral trading system, so as to enhance the leading role of WTO in the global economic governance.

15. We are determined to promote macroeconomic policy coordination, and enhance information sharing and policy dialogue, with a view to forging policy synergy, and creating a sound policy environment for the economic growth of the region.

16. We reaffirm our commitment to realizing the Bogor Goals by 2020, and will reinforce our efforts based on the progress already achieved. Developed APEC members are willing to provide support and assistance to developing members to help them realize the Bogor Goals.

17. We strongly believe that the decisions we take at this Economic Leaders’ Meeting will lay the foundation for a dynamic and prosperous Asia-Pacific in the years to come. To this end, we reaffirm the decisions taken:

- To implement the Beijing Roadmap for APEC’s Contribution to the Realization of the FTAAP and launch a collective strategic study on issues related to the realization of the FTAAP with the goal of establishing the FTAAP as early as possible by building on ongoing regional undertakings;
- To jointly create an enabling environment for GVC development and cooperation through the implementation of the APEC Strategic Blueprint for Promoting GVC Development and Cooperation;
- To implement the APEC Accord on Promoting Innovative Development, Economic Reform and Growth; and
- To implement the APEC Connectivity Blueprint for 2015-2025 and achieve the overarching goal of strengthening physical, institutional and people-to-people connectivity by taking agreed actions and meeting agreed targets by 2025, with the objective of achieving a seamless and comprehensively connected and integrated Asia-Pacific.

18. We are determined to jointly explore the development path and model suitable for each member’s specific circumstances. We will enhance policy coordination, experience exchange and mutual learning, and foster an enabling environment for diverse and common development of all member economies.

19. We are committed to green and sustainable growth, and addressing environmental challenges through closer practical cooperation.

20. We are committed to narrowing the development gaps and achieving common development through practical cooperation and mutual assistance.

21. We reaffirm our support for the reform of APEC in an effort to achieve organizational and institutional improvement. We will strengthen APEC’s synergy and complementarity with other regional and international fora and processes to enable a more effective approach in seizing opportunities and solving complex cross-border challenges, through three work streams, namely institutional, thematic and, trade and investment. Such efforts will make way for a greater contribution to regional economic cooperation and global economic governance.

22. We support the participation of relevant stakeholders in APEC cooperation so that cooperation achievements can benefit a larger population across the Asia-Pacific. We welcome the active participation of ABAC and other private sector representatives in the process, and are committed to building a closer and broader interactive relationship with the business community.

23. We believe that through these efforts, the Asia-Pacific will embrace a brighter future. The region will enjoy a higher level of economic integration, more effective policy coordination, stronger ties in economic and technical cooperation, enhanced regional connectivity, and closer links with the rest of the world. Our enduring commitment will underwrite the peace, stability and prosperity of Asia Pacific. We are committed to making relentless efforts for the next 25 years of APEC cooperation, with the goal of fulfilling the Asia-Pacific dream of common development, prosperity, and progress.
Over the past 25 years, APEC economies have made great strides in the pursuit of free and open trade and investment. APEC’s role in facilitating regional economic growth and cooperation has proven essential in efforts to achieve greater common prosperity and stability, and has greatly contributed to the region’s reputation as an engine of world economic growth. As the global economic landscape has evolved, global supply chains and value chains have emerged, and enterprises have taken advantage of distributed and more efficient production of goods and services and global networks of investors and exporters.

Economic integration efforts in the Asia-Pacific region have entered a critical stage, and are now facing both opportunities and challenges. Over the past several years, APEC has discussed a broad range of issues relevant to the participants in the APEC process, and carried out a number of sectoral initiatives. APEC economies have committed to making a contribution by translating the vision of the FTAAP into concrete steps, and to kicking off and advancing the process in a comprehensive and systematic manner towards the eventual realization of the FTAAP.

Today, we have reached a critical juncture in global economic evolution, and APEC economies are committed to making a contribution by translating the vision of the FTAAP into concrete steps, and to kicking off and advancing the process in a comprehensive and systematic manner towards the eventual realization of the FTAAP. Establishment of this Roadmap for the Realization of the FTAAP represents an important concrete step towards the FTAAP. The APEC Leaders today, without precluding future contributions, take the following specific cooperative actions by 2016.

The rules-based multilateral trading system will remain a key element of APEC. The FTAAP should be pursued on the basis of supporting and complementing the multilateral trading system.

The FTAAP should do more than achieve liberalization in its narrow sense; it should be comprehensive, high quality and incorporate and address "next generation" trade and investment issues.

Attaining the Bogor Goals by 2020 will continue to be APEC’s core objective, and progression towards the Bogor Goals will substantially advance and help determine APEC’s contribution to the eventual realization of the FTAAP. This work will not supersede the Bogor Goals but will serve as an important driving force to consolidate and accelerate progress toward trade and investment liberalization.

The FTAAP will be realized outside of APEC, parallel with the APEC process. APEC should maintain its non-binding, voluntary cooperation principles in its contributions to the realization of the FTAAP. APEC will encourage more unilateral trade and investment liberalization and reform, continue to play a role as an incubator and building block of the FTAAP. APEC’s contribution to the realization of the FTAAP will represent an important concrete step towards greater regional economic integration. In this regard, we, the APEC Leaders, share the following common vision.
Global Value Chains (GVCs) have become a dominant feature of the global economy. Better understanding and supporting the "trading tasks" involved in adding value to the final products that cross borders has become paramount to realizing a more effective policy and regulatory infrastructure for global trade. Efficient and workable GVCs within and between each APEC economy has accordingly become a key focus for economies at all levels of development.

Given the diverse needs and situations of APEC economies participating in global trade networks today, an overall policy direction guiding improved cooperation and a more focussed GVC evolution is essential to facilitating sustainable, inclusive and balanced growth in the APEC region. We are steadfast in supporting regional economic or regulatory objectives, lowering barriers will improve economies' access to global production networks and allow firms to source less expensive inputs globally, which in turn would lower costs, increase efficiency and enhance competitiveness. For 2015, APEC could explore best practices to help economies adopt more trade and investment friendly approaches in these areas, while achieving their domestic economic or regulatory objectives, lowering trade costs, and enhancing GVCs.

APEC could then explore best practices to help economies adopt more trade and investment friendly approaches in these areas, while achieving their domestic economic or regulatory objectives, lowering trade costs, and enhancing GVCs.

Global Value Chains development and cooperation in the APEC region has accordingly become a key focus for economies at all levels of development. Given the diverse needs and situations of APEC economies participating in global trade networks today, an overall policy direction guiding improved cooperation and a more focussed GVC evolution is essential to facilitating sustainable, inclusive and balanced growth in the APEC region. We are steadfast in supporting regional economic or regulatory objectives, lowering barriers will improve economies' access to global production networks and allow firms to source less expensive inputs globally, which in turn would lower costs, increase efficiency and enhance competitiveness. For 2015, APEC could explore best practices to help economies adopt more trade and investment friendly approaches in these areas, while achieving their domestic economic or regulatory objectives, lowering trade costs, and enhancing GVCs.

In 2013, APEC Leaders agreed to promote GVC development and cooperation in the APEC region on the basis of previous work on connectivity. This agreement highlights the need for APEC economies to work strategically and take action in creating an enabling environment for GVC development and cooperation. In response to Leaders’ instruction, APEC economies agree to develop a Strategic Blueprint for promoting global value chains development and cooperation, and agree to:

1. Addressing trade and investment issues that impact GVCs. Reducing trade and investment barriers will improve economies’ access to global production networks and allow firms to source less expensive inputs globally, which in turn would lower costs, increase efficiency and enhance competitiveness. For 2015, APEC could launch initiatives in the areas of importance to enhancing GVCs, and study the impact of measures on the growth of GVCs, the participation of economies and businesses in GVCs, and our regional economy. These initiatives could address areas of importance ranging from well-known issues to next generation issues. APEC could then explore best practices to help economies adopt more trade and investment friendly approaches in these areas, while achieving their domestic economic or regulatory objectives, lowering trade costs, and enhancing GVCs.

2. Cooperate on improving statistics related to GVCs. In light of the principles of “from easy to hard” and “moving from technical proficiencies to policy”, we will take a step-by-step approach in compiling domestic accounts and foreign trade statistics, and developing categories harmonized to realize effective correlation of data among APEC economies that can contribute to the WTO-OECD Trade in Value-Added (TiVA) database.

In 2013, APEC Leaders agreed to promote GVC development and cooperation in the APEC region on the basis of previous work on connectivity. This agreement highlights the need for APEC economies to work strategically and take action in creating an enabling environment for GVC development and cooperation. In response to Leaders’ instruction, APEC economies agree to develop a Strategic Blueprint for promoting global value chains development and cooperation, and agree to:

1. Addressing trade and investment issues that impact GVCs. Reducing trade and investment barriers will improve economies’ access to global production networks and allow firms to source less expensive inputs globally, which in turn would lower costs, increase efficiency and enhance competitiveness. For 2015, APEC could launch initiatives in the areas of importance to enhancing GVCs, and study the impact of measures on the growth of GVCs, the participation of economies and businesses in GVCs, and our regional economy. These initiatives could address areas of importance ranging from well-known issues to next generation issues. APEC could then explore best practices to help economies adopt more trade and investment friendly approaches in these areas, while achieving their domestic economic or regulatory objectives, lowering trade costs, and enhancing GVCs.

2. Cooperate on improving statistics related to GVCs. In light of the principles of “from easy to hard” and “moving from technical proficiencies to policy”, we will take a step-by-step approach in compiling domestic accounts and foreign trade statistics, and developing categories harmonized to realize effective correlation of data among APEC economies that can contribute to the WTO-OECD Trade in Value-Added (TiVA) database.
Without duplicating existing work at the WTO and OECD, the CTI will undertake further efforts in 2015 and future years on policy research, information exchange, developing shared approaches on statistics collection, and offering focused capacity building programs. In order to support and facilitate the work on this area, APEC should explore the establishment of an experts group on value added trade to help its member economies undertake trade policy capacity research, exchange information, develop approaches on statistics collection, and conduct focused capacity building efforts.

3. Realize the critical role of trade in service within GVCs. We shall continue ongoing work to promote open, efficient, and internationally competitive service sectors, and maximize the contribution that services can make to strong, resilient and reliable supply chains in this region. We need to conduct targeted capacity building to help economies better understand and stimulate the development of innovative services within GVCs, build on shared information among economies. We shall work with economies at all stages of development to create an open and competitive environment for services development.

4. Enable developing economies to better participate in GVCs. In light of the diversity of APEC member economies, we recognize that comprehensive economic and technical cooperation will play a key role in ensuring greater participation of developing economies in GVCs, and help them achieve their domestic economic objectives. We shall integrate economic and technical cooperation into the paths identified for future development, and further leverage cooperation activities, including targeted capacity-building programs for helping developing economies enter and move up GVCs, for example through public-private GVC collaboration partnerships, programs on human resources development, and further work in APEC on technology dissemination and commercializing creative content. We will emphasize and adopt a multi-year strategic plan based on the core agenda of APEC and employ goal-oriented, focused approaches.

5. Assist SMEs to benefit from GVCs. We shall develop and implement initiatives to assist our SMEs in the areas that matter most to GVCs: infrastructure, supply chain connectivity, innovation, skills and adoption of international standards. We will take steps to enhance capacity building activities and raise their understanding of how to participate in GVCs. APEC shall achieve this by facilitating SMEs access to trade and investment-related information via increased utilization of information and communication technologies (ICTs), enhancing intellectual property protection, and providing further information on tools and processes that would help them enter and move up GVCs. APEC should also foster linkages between SMEs and MNEs by helping our economies build open and transparent regulatory and investment climates.

6. Improve the investment climate for GVCs Development. We recognize the importance of adopting and maintaining laws, regulations, and practices that facilitate investment. We reaffirm the importance of continued efforts to improve the investment climate in the APEC region, including through taking concrete steps to facilitate investment as per existing APEC investment documents, such as the APEC Non-Binding Investment Principles, the APEC Investment Strategy and the APEC Investment Facilitation Action Plan (IFAP). APEC will help economies 1) implement sound investment strategies which deal with investment applications expeditiously, fairly, and equitably; and 2) facilitate investment through creating and maintaining transparent and sound administration procedures that apply for the lifetime of the investment.

7. Adopt effective trade facilitation measures. We reaffirm our commitment to achieving an APEC-wide target of a ten percent improvement in supply-chain performance by 2015, in terms of reductions in the time, cost, and uncertainty of moving goods and services throughout the region. Accordingly we shall further advance a capacity building program to address the identified supply chain connectivity (SCC) chokepoints and improve the performance of supply chains. To this end, we will carry out additional concrete actions, including the establishment of an APEC Supply Chain Alliance and promoting cooperation on green supply chains. We welcome the framework for advancing supply chain connectivity through mutual recognition of control, mutual assistance of enforcement and mutual sharing of information (RCC-MA) among customs agencies and other government agencies related to trade, and will advance the Model E-port Initiative. We will also share best practices of ICT infrastructure development and efficient trade facilitation measures. We also reaffirm our commitment to implement the WTO Agreement on Trade Facilitation and encourage greater contribution by APEC.

8. Enhance resiliency of GVCs. APEC shall make a collaborative effort to enhance cross-border value chain resilience in the region, establish more secure value chains, and conduct quantitative value chain research and analysis in the region. APEC may also carry out discussions of potential cooperation in the development of practical policy, and capacity building projects based on these analyses.

9. Encourage public-private partnerships for GVCs. APEC shall continue to make good use of the Public-Private Partnership Guidelines as a tool to encourage sector level partnerships for investment in regional value chains infrastructure and capacity within a high-quality institutional and regulatory framework. APEC shall also enhance trust and shared understanding between participants to foster interaction between private and public sectors across APEC economies.

10. Strengthen collaboration with other stakeholders on GVCs. APEC shall promote collaboration with international organizations and partner institutions, such as the WTO, UNCTAD, OECD, G20, the World Bank, IMF and ADB to enhance synergies in policy making with regard to GVCs through technical assistance and capacity-building. Further, inter-governmental cooperation and NGO promotion of activities in GVCs are also encouraged.

Conducting activities contained within this strategic blueprint will be essential to strengthening our economic ties in the global network, and to ensuring our region economy is resilient, our growth is inclusive, and our economies become ever more connected. We believe that our people should secure equitable benefits from GVC development and that this is key to shaping a sound future through our Asia-Pacific partnership. We are determined to demonstrate APEC’s leadership in fostering further GVC development and will immediately begin with concerted efforts upon the approval of this Blue print that is being proposed.
Outcomes

THE 22ND APEC ECONOMIC LEADERS’ DECLARATION
Beijing, China

ANNEX C

APEC Accord on Innovative Development, Economic Reform and Growth

1. The world economy is growing at a moderate pace, with smooth recovery, weak demand and the balance of risks on the downside. Some of the legacies of the international financial crisis are still with us, and trade and investment protectionism is on the rise. To achieve strong, sustainable, balanced and inclusive growth over the longer term, we need to boost demand and identify new sources of growth through innovative development and structural reform.

2. For the Asia-Pacific region to steer the world economy, member economies should remain innovation driven and maintain strong momentum for economic growth by pressing forward with innovations and identifying new sources of growth through innovative development and structural reform.

3. Reform is an important factor in promoting economic growth and innovative development. Deepening reform eliminates barriers to sustainable economic growth, allows the market to play a decisive role in allocating resources, improves the role of government, creates a conducive growth environment, and unleashes the full potential of productivity.

4. To this end, we believe that the Asia-Pacific region should continue to deepen structural reform, strengthen innovative growth, and promote closer cooperation in five pillars: Economic Reform, New Economy, Innovative Growth, Inclusive Support, and Urbanization. In this regard, we have reached consensus as follows:

5. Under the pillar of Economic Reform, we agree to convene a Ministerial Meeting on Structural Reform in 2015, with the objective of advancing APEC’s economic reform agenda, including the review of the implementation of the APEC New Strategy on Structural Reform (ANSR), setting the future direction of APEC’s structural reform work post-ANSR, discussing how to overcome the Middle-Income Trap, and considering continuation of the Ease of Doing Business Program until 2020.

6. We resolve to encourage communication, information exchanges, and capacity building on economic policy, regulatory coherence, and good regulatory practices, and we support members’ efforts to share experiences and best practices in innovation, reform, and fostering growth. We agree to incorporate the topic of overcoming the Middle-Income Trap in the work program of the Economic Committee (EC) for in-depth discussion and cooperation.

7. Under the New Economy pillar, we will promote economic transformation, and tap into the growth potential of emerging sectors, such as the Internet Economy, the Blue Economy, and the Green Economy.

8. We support cooperation in promoting the Internet Economy and welcome an Ad Hoc Steering Group to discuss issues arising from the Internet Economy, propose actions, and encourage collaboration across APEC fora. We agree to facilitate capacity building and encourage entrepreneurship and innovation.

9. We will leverage the Internet Economy to foster an enabling environment for empowering vulnerable and disadvantaged groups, especially women, youth, people with disabilities, and the poor. We support the healthy development of internet finance and we will work together to develop the necessary framework for it to become a tool of growth. We commit to secure, efficient, low-cost and inclusive financial services to enable SMEs and individuals to share the benefits of economic development, with a view to building an open and cooperative environment for the Internet Economy. We are committed to promoting the potential benefits of the Internet of Things (IoT) to our economies.

10. We will work towards a more integrated, sustainable, inclusive and mutually favorable partnership through ocean-related cooperation in the Asia-Pacific region. We support cooperation on: coastal and marine ecosystems conservation, disaster resilience, ocean-related food security and associated trade; marine science, technology and promotion, and the Blue Economy. We acknowledge the Xiamen Declaration’s statement on the Blue Economy, which is, for the purposes of APEC, an area to advance sustainable management and conservation of ocean and coastal resources and ecosystems and sustainable development, in order to foster economic growth. We call for cooperation on the Blue Economy and encourage the implementation of related initiatives in the Asia-Pacific region.

11. In response to important energy and environmental issues, we will support stronger conservation efforts, and commit to cooperate on renewable energy, energy saving, green building standards, sustainable development of mining, and circular economy, among others, in pursuit of green, energy efficient, low-carbon development and of new economic growth sources. To protect our forestry resources, we will pay special attention to fighting illegal logging and associated trade, while promoting trade in legally harvested forest products. We welcome the statement of the APEC High-level Roundtable on Green Development.

12. We welcome the joint statement of the 2014 APEC Ministers Responsible for Mining. We note the establishment of a mining sub-fund to take forward the 10 APEC Mining Policy Principles with an emphasis on supporting capacity building projects involving collaboration between the public and private sectors.

13. We are committed to championing an Asia-Pacific concept of energy security featuring openness, inclusiveness, cooperation and sustainability. We share the importance of improving energy efficiency and promoting clean and renewable energy in the APEC region. We aspire to the goal of doubling the share of renewables in the APEC energy mix, including in power generation, from 2010 levels by 2030. We encourage member economies to create favorable conditions for natural gas and LNG trade and investment in the region, including by relaxing destination clauses.

14. Since fossil fuel will continue to play a significant role in the energy mix of this region in the medium to long term, we reaffirm the importance of clean and efficient use of fossil fuel. We encourage member economies to address these difficulties by quickly deploying alternatives to coal, to enhance cooperation in developing and applying clean coal technologies such as highly efficient coal-fired power plants and Carbon Capture Utilization and Storage (CCUS). We support the safe and efficient development of nuclear power, which functions as a stable and low power source, in interested economies.

15. We reafﬁrm our commitments to reduce energy intensity by 45 percent from 2005 levels by 2035 and to rationalise and phase out inefficient fossil fuel subsidies that encourage wasteful consumption, while recognizing the importance of providing those in need with essential energy services. We welcome the establishment of the APEC Sustainable Energy Center, to promote advanced ideas and models of sustainable energy development across the region.

16. Under the Innovative Growth pillar, we will promote cooperation in science and innovation; facilitate voluntary transfer, dissemination and commercialization of technology on mutually agreed terms; promote the use and commercialization of intellectual property; cooperate on renewable energy, energy saving, green building standards, and climate change; and support closer economic partnership through ocean-related cooperation in the Asia-Pacific region. We support cooperation on: coastal and marine ecosystems conservation, disaster resilience, ocean-related food security and associated trade; marine science, technology and promotion, and the Blue Economy. We acknowledge the Xiamen Declaration’s statement on the Blue Economy, which is, for the purposes of APEC, an area to advance sustainable management and conservation of ocean and coastal resources and ecosystems and sustainable development, in order to foster economic growth. We call for cooperation on the Blue Economy and encourage the implementation of related initiatives in the Asia-Pacific region.
Outcomes

17. We welcome the APEC Cross-Border e-Commerce Innovation and Development Initiative. We welcome efforts to create a policy environment that enables new and emerging e-Commerce technologies that drive trade, economic growth and societal benefit.

18. We support members’ efforts to promote entrepreneurial innovation through fiscal and financial policy measures and other means.

19. We encourage members to strengthen support for innovative activities by SMEs, and support the establishment of an APEC SMEs database on innovative best practices. We encourage members to improve the financing environment that enables new and emerging e-Commerce technologies that drive trade, economic growth and societal benefit.

20. We support members’ cooperation in developing innovation in e-vehicles and in promoting green growth through environmentally-friendly automotive technologies.

21. Under the pillar of Inclusive Support, we commit to strengthen cooperation on entrepreneurship and employment, health, food security, social safety, sustainable agricultural development, women’s economic participation, youth, people with disabilities, disaster prevention and mitigation, social responsibility business ethics, anti-corruption and secure trade. We recognize that promoting quality employment and developing human resources is of significance for innovative development. We support the APEC Action Plan for Promoting Quality Employment and Strengthening People-to-People Connectivity through Human Resources (2015 - 2018).

22. We encourage member economies to take measures to implement the “Healthy Asia-Pacific 2020” initiative. We commit to continue to work on the unfinished health-related Millennium Development Goals in a manner that complements the activities of the post-2015 agenda; strengthen the prevention and control of non-communicable diseases, including injuries; strengthen health systems to support Universal Health Coverage and improve health emergency preparedness, surveillance, response and recovery systems for public health events and disasters in the APEC region.

23. We recognize that unleashing the potential of women as economic drivers is vital to growth, both in terms of the magnitude and inclusiveness of that growth. We welcome the statement of 2014 APEC Women and the Economy Forum and encourage all economies to take relevant effective actions. We encourage and commit to build the capacity of women to make use of ICT to start and grow their businesses, and in engage in regional trade cooperation.

24. We support member economies’ efforts to boost agricultural productivity and food production and availability based on sustainable development, innovation, science and technology and an enabling economic environment; improve post-harvest management to reduce food loss; and, strengthen regional cooperation to promote food security and safety.

25. We support the establishment of the APEC Higher Education Research Center and welcome the APEC Scholarship Initiative. We encourage officials to elaborate on academic mobility schemes, including voluntary implementation of the APEC Virtual Academic Mobility Card Initiative.

26. We will facilitate the use of existing resources for research and capacity building on urbanization. We encourage member economies to support urbanization cooperation and urbanization-related projects, including by making voluntary contributions to establish a sub-fund within the APEC framework.

27. We applaud progress made in the APEC Low Carbon Model Town Project and the promotion activities under it. We underscore the importance of eco-city and smart city cooperation programs, and undertake to explore pathways to green urbanization and sustainable city development.

28. We encourage further consideration of urbanization-related topics in the Senior Officials’ Meetings (SOM), the EC, the Committee on Trade and Investment (CTI), the SOM Steering Committee on Economic
Outcomes

THE 22ND APEC ECONOMIC LEADERS’ DECLARATION
Beijing, China

ANNEX D
APEC Connectivity Blueprint for 2015 - 2025

Background
1. In the APEC Leaders’ 2013 Declaration, we shared our aspiration to reach a seamlessly and comprehensively connected and integrated Asia-Pacific through the pillars of Physical Connectivity, Institutional Connectivity and People-to-People Connectivity.

2. Connectivity represents an ambitious target for a diverse regional organization such as APEC, but it is precisely that ambition that will drive strong and tangible achievement.

3. Connectivity will be important not only for governments and business, but also for the people of APEC, as a community. By connecting APEC’s developed and emerging growth centers, the region’s quality of growth will improve, contributing to the Asia-Pacific’s economic prosperity and resilience.

4. In this regard, we note with appreciation that considerable progress has been made under APEC-driven initiatives in the region. However, despite the many achievements to date, significant work remains to be done to improve connectivity, both at the domestic and regional levels.

5. However, despite the many successes and achievements of APEC in promoting connectivity in previous years, many challenges remain. On physical connectivity, there is still a disparity in access to quality of physical and Information and Communications Technology (ICT) infrastructure throughout the region.

6. On institutional connectivity, there is also a significant gap in the ability of existing institutions to promote connectivity due to various regulatory constraints or lack of capacity.

7. On people-to-people connectivity, much work needs to be done to ease existing barriers to interaction and mobility, and to develop policies and instruments that will support seamless flows of people.

8. We therefore developed this Blueprint as a strategic guide for current and future initiatives that will bring the APEC region closer together and as a high-level framework towards which many APEC work streams will focus their efforts.

The Vision of APEC Connectivity in 2025
9. Through the Blueprint, we commit to strengthening physical, institutional, and people-to-people connectivity by taking agreed actions and meeting agreed targets by 2025, with the objective of achieving a seamless and comprehensively connected and integrated Asia-Pacific.

10. In order to attain this overarching goal, APEC member economies will undertake specific tangible actions at the physical, institutional, and people-to-people pillar levels.

11. This Blueprint contains existing connectivity-related initiatives, encourages new initiatives that require further progress, and proposes future initiatives for more efficient flows of goods, services, capital and people to and from APEC. It is also broad in scope and adaptable to the ever-changing conditions in the Asia-Pacific.

12. We envision this Blueprint accelerating and implementing infrastructure projects, and comprehensively connected and integrated Asia-Pacific.

Physical Connectivity
13. Under Physical Connectivity, with regard to cross-sectional issues, we will focus on improving the investment climate, enhancing infrastructure financing through public-private partnerships (PPP) and other means in APEC economies; adopting comprehensive assessment methods that considers key quality elements in evaluation of infrastructure project proposals; and, enhancing the application of good practices, and people-centered investment for planning and implementing infrastructure projects.

14. We welcome the substantial work that has been done under the Finance Ministers’ Process (FMP) to promote knowledge sharing and capacity building in the area of infrastructure PPPs.

15. We are pleased to note that the APEC PPP Experts Advisory Panel has launched work under the FMP, which supports, on a voluntary basis, a Pilot PPP Center based in Indonesia. We note with appreciation the role of the Panel in helping APEC economies tap into private sector sources of funding for infrastructure development, particularly through the identification and promotion of PPP projects. We also support the PPP Experts Advisory Panel’s APEC-wide market for PPP.

16. We commit to further establish dedicated PPP centers to share good practices.

17. We will develop, maintain and renew quality infrastructure, including energy, ICT and transport infrastructures and work to increase the quality and sustainability of APEC transport networks; increase broadband internet access promotes sustainable energy security; and build resiliency into the energy infrastructure.

18. We will help facilitate the efficient and effective operation of maritime transportation and shipments, especially considering that a majority of maritime infrastructure development projects happen on a unilateral basis. We take note of several pathfinder initiatives where future cooperation could produce tangible results.

19. We will strengthen air transport cooperation to foster robust trade and people mobility, implement joint emergency preparedness exercises and good practices to promote efficiency and security of air connectivity.

20. We note that ICT development has been a focus of APEC’s work since its inception in 1989, and increased information sharing and improved communication technology allow for faster and reliable connections between people and organizations throughout the Asia-Pacific, facilitating trade and economic growth. We resolve to continue our efforts jointly in enhancing the access to ICT resources by using available technologies to reduce digital divide and increase greater connectivity in the region.

21. We resolve to tap into APEC’s considerable potential in fostering future energy cooperation initiatives, especially in the areas of energy-related trade and environmental sustainability. APEC represents an ideal forum to explore this concept of expanded cross-border energy trade and renewable energy in a non-binding manner.

Institutional Connectivity
22. Under Institutional Connectivity, we will strive to make progress in jointly addressing issues of trade facilitation, structural and regulatory reforms as well as transport and logistics facilitation, which are of critical importance to APEC as a regional forum.

23. We aim to modernize customs and border agencies and enable a whole-of-government approach in the development of regulations, including cross-border enforcement, regulatory, standards, and trade agencies.

24. We support APEC’s work to encourage each member economy to develop its own Single Window system by 2020 and we encourage efforts to promote international interoperability between Single Window systems and paperless trading.

16
Outcomes

25. We will further strengthen the initiatives under the APEC Common Framework Action Plan (SCFAP) by systematically improving supply chain performance through implementing a capacity building plan to assist economies in overcoming specific obstacles within the eight chokepoints of the SCFAP.

26. On regulatory coherence, we will implement initiatives that focus on regulatory cooperation through the sharing of best practices on regulatory issues. We note that industry dialogues are already well advanced in this process. The internet is a good and effective tool to help economies strengthen their regulatory and, assist in the implementation of good regulatory practices (e.g., ensuring internal coordination of regulatory work, assessing the impact of regulations, and conducting public consultations) Economies will further explore using Internet-based tools to strengthen the implementation of good regulatory practices, including through the initiative on new actions APEC economies could take to strengthen the conduct of public consultations on proposed regulations in the Internet era.

27. Under structural reform, the APEC Ease of Doing Business (EoDB) Multi-Year Project (MYP) facilitates tailored capacity building activities to support economies in achieving the aspirational targets of making it 25% cheaper, faster, and easier to do business. We aim to achieve these goals by harmonizing local policies with existing international standards and approaches to consider the continuation of our work on the EoDB until 2020.

28. We commit to fostering transparency, safety, cooperation and better functioning markets, including online commerce, in the Asia Pacific and aim to expand the application of secure and trusted ICT and e-commerce environment by 2025.

29. APEC needs to build a strategy to tackle the policy challenges raised by the Middle-Income Trap (MIT) improving an economy’s competitiveness, productivity levels and its regulatory environment for the ease of doing business can contribute to overcoming some of the issues that underpin the MIT.

30. Under People-to-People Connectivity, we will strive to facilitate the movement of people across borders, and to facilitate the exchange of innovative ideas. As issues, of business travel mobility, cross-border education, tourism facilitation and skilled labor mobility will be addressed under this pillar.

31. We commit to continue expanding the number of holders of the APEC Business Travel Card (ABTC) and to improve the efficiency and effectiveness of ABTC scheme.

32. We undertake to improve cross-border education (CBE) cooperation, in recognition that student, academic, and provider mobility helps to strengthen regional ties, facilitate people-to-people exchanges and promote economic development through knowledge and skills transfer. We resolve to achieve one million intra-APEC student exchanges per year by 2020, and to increase the number of student exchanges to developing economies.

33. Tourism is an important part of APEC economic growth strategies, and this is reflected in the many tourism facilitation and cooperation activities that have been implemented within the APEC region. In this regard, we welcome domestic efforts by several economies to implement measures to ease visa restrictions for tourists as well as initiatives to promote tourism processing.

34. We will make efforts to achieve 300 million APEC tourist arrivals by 2025, with commitment to establishing an APEC-wide Code of Conduct for Travel Providers in order to reduce travelers’ costs and uncertainties related to tourism.

35. We will intensify cooperation within APEC in promoting cultural exchanges, by aiming to hold at least one cultural awareness event by each APEC economy in every other APEC economy per year by 2017.

36. We resolve to advance work on cross- border science, technology, and innovation exchanges. We note with appreciation the annual APEC Science Prize for Innovation, Research and Education (ASPIRE) which recognizes young scientists who have demonstrated excellence in education and research coming from other APEC member economies, as well as a commitment to excellence in scientific research.

37. On professional and skilled labour mobility, we welcome initiatives that focus on regulatory practices that facilitate the movement of qualified professionals in the transport and logistics industry, allowing businesses within the region to have more certainty over the skill sets of workers from other economies. There are various bilateral Mutual Recognition Agreements (MRAs), and going forward, APEC can undertake work to help expand the number of bilateral and multilateral MRAs in the region. Mutual recognition benefits and credentials can play an important role in facilitating skilled labor mobility. Timely and accurate information on skills gaps and labor market imbalances will also need to be gathered and analyzed to ensure responsive policy actions.

38. We commit to strengthen people-to-people connectivity through human resources development and welcome the APEC Action Plan for Promoting Quality Employment and Strengthening People to People Connectivity through Human Resources Development.

Strategies for Implementation: Capacity Building and Private Sector Cooperation

39. Economic and technical cooperation (ECOTECH) is one of the key pillars of APEC, focusing on narrowing the gap between developed and developing APEC economies. To help implement the Common Framework, we direct ECOTECH activities at upgrading skills and institutions by providing relevant capacity building activities for APEC economies and adhering to relevant ECOTECH frameworks, and where skills imbalances are needed, what gaps exist in institutional structures, and where skills imbalances lay in the labor market will be crucial to support economies in achieving connectivity targets.

40. The development and implementation of connectivity initiatives will require a significant amount of information on economies’ needs, expectations, gaps, and the most promising solutions. Information on what infrastructure projects are needed, what gaps exist in institutional frameworks, and where skills imbalances lay in the labor market will be crucial to support economies in achieving connectivity targets.

41. To gather this information, economies should work with the private sector. In this regard, the APEC Business Advisory Council (ABAC) and APEC’s policy partnerships and industry dialogues could contribute significantly by providing private sector feedback or insight on market needs, trends and expectations.

42. We urge the private sector, with coordination from ABAC, to provide direct support for more of the many bankable connectivity initiatives being undertaken in the region. In addition to PPP for infrastructure projects, the private sector could help support capacity building programs as well as educational and cultural exchanges. The private sector could also help in financing and promoting connectivity-enhancing innovations in the region.

43. International organizations have taken initiatives and launched projects on physical, institutional and people-to-people connectivity across the Asia-Pacific. These efforts could help advance the implementation of this Blueprint and where possible and appropriate APEC should look to coordinate and collaborate with these organizations to ensure we avoid duplication of efforts.

APEC Connectivity Blueprint for 2015 - 2025

Monitoring, Evaluation and Review

44. In order to reach the overarching goal of strengthening physical, institutional, and people-to-people connectivity by taking agreed actions and meeting agreed targets by 2025, with the objective of achieving a seamless and comprehensively connected and integrated Asia Pacific, we instruct Ministers and Senior Officials to oversee the implementation of the Blueprint on a yearly basis, particularly in reviewing the targets and objectives.

45. We direct Ministers and Senior Officials to develop a dedicated arrangement to monitor, review and evaluate the implementation of the Blueprint, and to conduct a mid-term review of the Blueprint in 2020. We further instruct Ministers and Senior Officials to work with APEC fora to develop additional ambitious and measurable actions and targets under each of the connectivity pillars. These actions and targets need to be forward-looking and directed towards the vision of APEC Connectivity in 2025.
In 2015, APEC will expand the region’s growth story to include a vision of economic prosperity and interconnectedness felt at all levels—beginning at the grassroots. As regional economic integration continues to take form and strengthen, APEC 2015 will orient policies and initiatives through the prism of its inclusive growth strategy. Integration, as such, will be defined and advanced not only for the benefit of economies but also for the people that drive economic growth.

The pursuit of trade and investment liberalization, business facilitation, and economic and technical cooperation will be guided by the goal of democratizing the fruits of economic growth—empowering individuals, businesses and communities to take advantage of the opportunities of regional economic integration, as well as withstand and address economic risks and challenges such as rising income gaps, economic inequity, natural disasters, and food security.

Under the theme “Building Inclusive Economies, Building a Better World,” APEC 2015 will focus on the following key priorities:

- Enhancing the Regional Economic Integration Agenda
- Fostering Small and Medium Enterprises’ Participation in Regional and Global Markets
- Investing in Human Capital Development
- Building Sustainable and Resilient Communities

Following APEC’s multi-year initiative towards the Bogor Goals of free trade and investment, and the realization of a Free Trade Area of the Asia-Pacific (FTAAP), APEC 2015 will expand the regional economic integration agenda to include initial building blocks such as the collective strategic study on the FTAAP and forward-looking plans based on the review of APEC’s Growth Strategy, among others.

APEC initiatives will focus on connectivity and trade facilitation, particularly in areas that will promote trade in services and the ease of doing business. Structural reform, financial inclusion measures, and good governance will also place high on the agenda to support efforts to build more inclusive value and production chains in the APEC region.

Building Inclusive Economies, Building a Better World

APEC PHILIPPINES 2015

Outlook
Fostering SMEs’ Participation in Regional and Global Markets

Recognizing the potential of small and medium enterprises (SMEs) to generate employment and serve as engines of economic development, APEC 2015 will place SMEs front and center on the trade liberalization and facilitation agenda. SMEs, which comprise more than 90 percent of businesses in many economies, are key stakeholders in regional economic integration particularly in reaping the benefits of Free Trade Agreements (FTAs)/Regional Trade Agreements (RTAs). While SMEs are most at risk to economic shocks and challenges of globalization, they continue to adapt as sources of innovative business models and new technologies.

To support the entrepreneurial nature of SMEs and their valuable contribution to overall economic growth, APEC will align its capacity-building initiatives to the needs of SMEs. APEC will continue to support SMEs through trade facilitation measures to link SMEs to global value chains and promote their full participation in markets by removing barriers to entry and promoting greater access to finance, technology, training programs and tools.

Investing in Human Capital Development

APEC underscores the importance of investing in human capital development in achieving sustained and broad-based growth. Recognizing that economic growth is anchored by the quality of its human resources, APEC 2015 will continue to pursue the long-term goal of building a skilled and adaptable APEC community through cross-border education, science and technology-based education and skills development, and innovation-driven capacity-building programs.

As trade in the Asia-Pacific continues to be increasingly integrated and interlinked by production and supply chains, disaster-related disruptions in these interwoven chains can hurt both the supply and demand sides. The cross-border effects of disasters thus make regional mechanisms and contingencies more necessary. Preparedness such as investing in resilient infrastructure, rather than just relief and recovery, are coming to the fore of APEC’s agenda. APEC looks to create and promote risk reduction and management, build SMEs’ resilience to disaster, and ensure business continuity.

Building Sustainable and Resilient Communities

Given the changing global environment and disasters such as typhoons, earthquakes, volcanic eruptions and health pandemics, APEC 2015 will prioritize the goals of resilience, sustainability and food security. As trade in the Asia-Pacific continues to be increasingly integrated and interlinked by production and supply chains, disaster-related disruptions in these interwoven chains can hurt both the supply and demand sides. The cross-border effects of disasters thus make regional mechanisms and contingencies more necessary. Preparedness such as investing in resilient infrastructure, rather than just relief and recovery, are coming to the fore of APEC’s agenda. APEC looks to create and promote risk reduction and management, build SMEs’ resilience to disaster, and ensure business continuity.

Note: Dates are subject to change, for the latest information please go to: [http://www.apec.org/Events-Calendar.aspx](http://www.apec.org/Events-Calendar.aspx)
2013 • Bali, Indonesia
APEC Leaders endorse an APEC List of Environmental Goods that directly and positively contribute to green growth and sustainable development objectives. APEC seeks to address transparency as a means to generate trade and investment issues, and Leaders endorse the APEC Model Chapter on Transparency for RTAs/FTAs to be used as a guide by APEC economies.

2011 • Honolulu, United States
APEC Leaders commit to taking concrete steps towards establishing a single market economy addressing shared green growth objectives, and advancing regulatory cooperation and convergence. To reach these goals, APEC resolves to reduce, by the end of 2015, applied tariff rates of environmental goods to 5 percent or less, taking into account economies’ circumstances, without prejudice to APEC members’ positions in the WTO. APEC sets the goal to reduce aggregate energy intensity by 45 percent by 2035. In addition, APEC commits to take specific steps by 2013 to implement good regulatory practices by ensuring internal coordination of regulatory work across the region.

2010 • Yokohama, Japan
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

2009 • Singapore
APEC resolves to pursue balanced, inclusive and sustainable growth, while Leaders agree to extend their standstill commitment on protectionism until 2010. The first-ever joint meetings of APEC senior trade and finance officials are held to address the economic crisis. APEC launches the Supply-Chain Connectivity Framework and the Ease of Doing Business Action Plan to make doing business in the region 25 percent cheaper, faster and easier by 2015. Member economies also commence work on an APEC Services Action Plan and an Environmental Goods and Services Work Program.

2008 • Lima, Peru
APEC Economic Leaders address the global financial crisis in the Lima Statement on the Global Economy, in which they commit to take all necessary economic and financial measures to restore stability and growth, to reject protectionism and to intensify efforts to advance the WTO’s Doha Development Agenda negotiations. APEC focuses on the social dimensions of trade, reducing the gap between developing and developed members and Corporate Social Responsibility. Leaders welcome the APEC Investment Facilitation Action Plan aimed at improving the investment environment in the region.

2007 • Sydney, Australia
For the first time, APEC member economies issue a Declaration on Climate Change, Energy Security and Clean Development outlining future action in support of a new international climate change arrangement and announcing a forward program of practical, cooperative actions and initiatives. Leaders also adopt a major report on closer regional economic integration, including structural reform initiatives, and welcome the second APEC Trade Facilitation Action Plan which aims to reduce trade transaction costs by a further five percent by 2010.

2006 • Ha Noi, Viet Nam
APEC Economic Leaders endorse the Ha Noi Action Plan which identifies specific actions and milestones to implement the Bogor Goals. Leaders conclude that the APEC Trade Facilitation Action Plan has achieved its target of a five percent reduction in trade transaction costs in the region between 2002 and 2006. APEC takes a strategic approach to reform fora and strengthen the Secretariat.

2005 • Busan, Korea
APEC completes the Mid-Term Stock-take of Progress towards the Bogor Goals. The stock-take finds that average tariffs in the APEC region have been reduced to 5.5 percent, down from 16.9 percent when APEC was established in 1989, and that APEC is on schedule to meet the Bogor Goals. It also outlines the Busan Roadmap to the Bogor Goals. The APEC Privacy Framework is launched.

2004 • Santiago, Chile
APEC adopts Best Practices for RTAs and FTAs, a reference guide for APEC members undertaking RTA/FTA negotiations. The Leaders’ Agenda to Implement Structural Reform (LAISR) is launched. It addresses key priority areas—regulatory reform; corporate governance; public governance; competition policy; and strengthening economic legal infrastructure. Leaders endorse the Santiago Commitment to Fight Corruption and Ensure Transparency.

2003 • Bangkok, Thailand
Members undertake to implement the APEC Action Plan on SARS and the Health Security Initiative to help the region prevent and respond to health threats. Leaders pledge to strengthen regional efforts to promote sound and efficient financial systems and encourage the development of domestic and regional bond markets.

2002 • Monterey, Mexico
APEC Leaders agree to extend their standstill commitment on protectionism until 2010. The Leaders’ Agenda to Implement Structural Reform (LAISR) is launched. It identifies key priority areas—regulatory reform; corporate governance; public governance; competition policy; and strengthening economic legal infrastructure. Leaders endorse the Monterrey Commitment to Fight Corruption and Ensure Transparency.

1999 • Seattle, USA
APEC Leaders endorse an APEC List of Environmental Goods that directly and positively contribute to green growth and sustainable development objectives. APEC seeks to address transparency as a means to generate trade and investment issues, and Leaders endorse the APEC Model Chapter on Transparency for RTAs/FTAs to be used as a guide by APEC economies.

1998 • Bogor, Indonesia
APEC Leaders reaffirm their commitment to the market-based multilateral trading system and achieving the successful Infrastructure Planning Round at the World Trade Organization (WTO) 9th Ministerial Conference. APEC Leaders endorse a multi-year plan on infrastructure development and investment. As a first step under this plan, a Public-Private Partnership Centre in Indonesia will be established. To encourage people-to-people connectivity, APEC seeks to promote cross-border cooperation with the target of 1 million intra-APEC university students per year by 2020. APEC holds its first joint Ministerial Meeting on Women and SMEs to promote women entrepreneurship.

1997 • Kobe, Japan
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1996 • Vancouver, Canada
APEC Leaders commit to taking concrete steps towards realizing a single market economy, addressing shared green growth objectives, and advancing regulatory cooperation and convergence. To reach these goals, APEC resolves to reduce, by the end of 2015, applied tariff rates of environmental goods to 5 percent or less, taking into account economies’ circumstances, without prejudice to APEC members’ positions in the WTO. APEC sets the goal to reduce aggregate energy intensity by 45 percent by 2035. In addition, APEC commits to take specific steps by 2013 to implement good regulatory practices by ensuring internal coordination of regulatory work across the region.

1995 • Seattle, USA
APEC Leaders agree to extend their standstill commitment on protectionism until 2010. The Leaders’ Agenda to Implement Structural Reform (LAISR) is launched. It identifies key priority areas—regulatory reform; corporate governance; public governance; competition policy; and strengthening economic legal infrastructure. Leaders endorse the Monterrey Commitment to Fight Corruption and Ensure Transparency.

1994 • Saigon, Vietnam
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1993 • Kobe, Japan
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1992 • Toronto, Canada
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1991 • Seoul, Republic of Korea
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1990 • Austin, USA
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.

1989 • Tokyo, Japan
APEC Leaders provide a roadmap for members to realize an economically-integrated, robust and secure APEC community. This includes the formulation of a comprehensive, long-term growth strategy. APEC completes an assessment of its progress towards the Bogor Goals and finds significant gains in the areas of liberalizing trade in goods, services, and investment, as well as trade facilitation. APEC formulates the APEC Strategy for Investment, and endorses the APEC New Strategy for Structural Reform. APEC holds its first APEC Ministerial Meeting on Food Security.
APEC Milestones

2002 • Los Cabos, Mexico
APEC adopts a Trade Facilitation Action Plan and the Statement to Implement APEC Policies on Trade and the Digital Economy. The Secure Trade in the APEC Region (STAR) initiative is launched and a Statement to Implement APEC Transparency Standards is endorsed.

2001 • Shanghai, People’s Republic of China
Leaders issue APEC’s first Statement on Counter-Terrorism and pledge to enhance counter-terrorism cooperation. Leaders also adopt the APEC Accord which focuses on: broadening the APEC vision to reflect changes resulting from the digital economy; clarifying the roadmap to reach the Bogor Goals; and strengthening the IAP Peer Review Process and capacity building activities. An e-APEC Strategy identifying the necessary policy environment and specifying appropriate goals and actions to maximise the benefits of the digital economy is also endorsed.

1995 • Osaka, Japan
APEC sets the Bogor Goals of “free and open trade and investment in the Asia-Pacific by 2010 for industrialised economies and 2020 for developing economies.” The Uruguay Round of multilateral trade negotiations conducted under the General Agreement on Tariffs and Trade is concluded. APEC is widely considered to have been a significant force in bringing the Uruguay Round to a conclusion.

1994 • Bogor, Indonesia
APEC sets the Bogor Goals of “free and open trade and investment in the Asia-Pacific by 2010 for industrialised economies and 2020 for developing economies.” The Uruguay Round of multilateral trade negotiations conducted under the General Agreement on Tariffs and Trade is concluded. APEC is widely considered to have been a significant force in bringing the Uruguay Round to a conclusion.

1993 • Blake Island, United States
APEC Economic Leaders meet for the first time and outline APEC’s vision of “stability, security and prosperity for our peoples.”

1989 • Canberra, Australia
APEC begins as an informal Ministerial-level dialogue group with 12 founding members.

2000 • Bandar Seri Begawan, Brunei Darussalam
APEC commits to the Action Agenda for the New Economy. Leaders set the goals of tripling internet access throughout the APEC region by 2005, and achieving universal access by 2010.

1999 • Auckland, New Zealand
APEC Leaders endorse the APEC Principles to Enhance Competition and Regulatory Reform aimed at addressing the structural and regulatory weaknesses that contributed to the Asian financial crisis. APEC commits to paperless trading by 2005 in developed economies and 2010 in developing economies. The APEC Business Travel Card scheme is approved and a Mutual Recognition Arrangement on Electrical Equipment and a Framework for the Integration of Women in APEC are endorsed.

1998 • Kuala Lumpur, Malaysia
APEC Ministers agree on a Blueprint for Action on Electronic Commerce, including a commitment to paperless trading by 2005 in developed economies and by 2010 in developing economies.

1997 • Vancouver, Canada
APEC endorses a proposal for early voluntary sectoral liberalisation in 15 sectors and decides that Individual Action Plans should be updated annually.

1996 • Manila, the Philippines
The Manila Action Plan for APEC is adopted, outlining the trade and investment liberalisation and facilitation measures required to reach the Bogor Goals. The first Collective and Individual Action Plans are compiled, outlining how economies will achieve the free trade goals.

1995 • Osaka, Japan
APEC adopts the Osaka Action Agenda which provides a framework for meeting the Bogor Goals through trade and investment liberalisation, business facilitation and sectoral activities, underpinned by policy dialogues and economic and technical co-operation. The APEC Business Advisory Council is established to inject a business perspective into APEC deliberations and to give advice on business sector priorities.

1994 • Bogor, Indonesia
APEC sets the Bogor Goals of “free and open trade and investment in the Asia-Pacific by 2010 for industrialised economies and 2020 for developing economies.” The Uruguay Round of multilateral trade negotiations conducted under the General Agreement on Tariffs and Trade is concluded. APEC is widely considered to have been a significant force in bringing the Uruguay Round to a conclusion.

1993 • Blake Island, United States
APEC Economic Leaders meet for the first time and outline APEC’s vision of “stability, security and prosperity for our peoples.”
The Asia-Pacific Economic Cooperation (APEC) is a regional economic forum established in 1989 to leverage the growing interdependence of the Asia-Pacific. APEC’s 21 members aim to create greater prosperity for the people of the region by promoting balanced, inclusive, sustainable, innovative and secure growth and by accelerating regional economic integration.

APEC ensures that goods, services, investment and people move easily across borders. Members facilitate this trade through faster customs procedures at borders; more favorable business climates behind the border; and aligning regulations and standards across the region.

APEC works to help all residents of the Asia-Pacific participate in the growing economy. For example, APEC projects provide digital skills training for rural communities and help indigenous women export their products abroad. Recognizing the impacts of climate change, APEC members also implement initiatives to increase energy efficiency and promote sustainable management of forest and marine resources.

The forum adapts to allow members to deal with important new challenges to the region’s economic well-being. This includes ensuring disaster resilience, planning for pandemics, and addressing terrorism.

APEC’s 21 member economies are Australia; Brunei Darussalam; Canada; Chile; People’s Republic of China; Hong Kong, China; Indonesia; Japan; Republic of Korea; Malaysia; Mexico; New Zealand; Papua New Guinea; Peru; The Philippines; The Russian Federation; Singapore; Chinese Taipei; Thailand; United States of America; Viet Nam.

APEC has grown to become a dynamic engine of economic growth and one of the most important regional forums in the Asia-Pacific. Its 21 member economies are home to around 2.8 billion people and represent approximately 57 per cent of world GDP and 47 per cent of world trade in 2012. As a result of APEC’s work, growth has soared in the region, with real GDP doubling from just USD 16 trillion in 1989 to USD 31 trillion in 2013. Meanwhile, residents of the Asia-Pacific saw their per capita income rise by 45 per cent, lifting millions out of poverty and creating a growing middle class in just over two decades.

Bringing the region closer together, reducing trade barriers, and smoothing out differences in regulations have boosted trade which, in turn, has led to this dramatic increase in prosperity. Average tariffs fell from 17 per cent in 1989 to 5.2 per cent in 2012. During that same time period, the APEC region’s total trade increased over seven times—outpacing the rest of the world with two-thirds of this trade occurring between member economies.

### Benefits of APEC

APEC has grown to become a dynamic engine of economic growth and one of the most important regional forums in the Asia-Pacific. Its 21 member economies are home to around 2.8 billion people and represent approximately 57 per cent of world GDP and 47 per cent of world trade in 2012.

As a result of APEC’s work, growth has soared in the region, with real GDP doubling from just USD 16 trillion in 1989 to USD 31 trillion in 2013. Meanwhile, residents of the Asia-Pacific saw their per capita income rise by 45 per cent, lifting millions out of poverty and creating a growing middle class in just over two decades.

Bringing the region closer together, reducing trade barriers, and smoothing out differences in regulations have boosted trade which, in turn, has led to this dramatic increase in prosperity. Average tariffs fell from 17 per cent in 1989 to 5.2 per cent in 2012. During that same time period, the APEC region’s total trade increased over seven times—outpacing the rest of the world with two-thirds of this trade occurring between member economies.
APEC operates as a cooperative, multilateral economic and trade forum. Member economies* participate on the basis of open dialogue and respect for views of all participants. In APEC, all economies have an equal say and decision-making is reached by consensus. There are no binding commitments or treaty obligations. Commitments are undertaken on a voluntary basis and capacity building projects help members implement APEC initiatives.

APEC’s structure is based on both a “bottom-up” and “top-down” approach. Four core committees and their respective working groups provide strategic policy recommendations to APEC Leaders and Ministers who annually set the vision for overarching goals and initiatives. The working groups are then tasked with implementing these initiatives through a variety of APEC-funded projects. Members also take individual and collective actions to carry out APEC initiatives in their individual economies with the assistance of APEC capacity building projects.

APEC Organisational Chart

The APEC Secretariat

The APEC Secretariat is staffed with a team of diplomats seconded from APEC member economies as well as by professional, specialist and administrative staff. The Secretariat is headed by an Executive Director.

Every year one of the 21 member economies hosts the APEC meetings and serves as the APEC Chair. The APEC host economy is responsible for chairing the annual Economic Leaders’ Meeting, Ministerial Meetings, Senior Officials’ Meetings, the APEC Business Advisory Council and the APEC Study Centres Consortium.

The APEC Policy Support Unit

The APEC Policy Support Unit (PSU), established in 2008, provides research, analysis and evaluation capabilities to assist in the implementation of APEC’s agenda. The PSU is guided and overseen by a board that comprises representatives from the current, immediate past and next APEC host economy, and from each major donor.

APEC Stakeholder Participation

APEC recognises that strong and vibrant economies are not built by governments alone, but by partnerships between governments and key stakeholders, including the business sector, industry, academia, policy and research institutions, and interest groups within the community.

APEC member economies recognise that business drives the economies of the region and therefore involves business at all levels of the APEC process. At the highest level, APEC Economic Leaders communicate through annual meetings with the APEC Business Advisory Council (ABAC). ABAC comprises high-level business people from all 21 APEC member economies.

Through the APEC Study Centres Consortium (ASCC), APEC member economies actively engage academic and research institutions in the APEC process. The ASCC assists the APEC process by undertaking independent policy research on APEC-related issues. There are APEC Study Centres in most APEC member economies, comprising some 50 universities, research centres and centres of academic excellence.

*APEC* member economies includes all economies that subscribe to the APEC process, which is composed of 21 economies.

The APEC Secretariat holds ISO 9001 Quality Management Certification. This recognises the continuous efforts made by the APEC Secretariat to provide high quality administrative and support activities. The APEC Secretariat is the first international trade-related secretariat to attain ISO certification.
About APEC

On The Web
The APEC Secretariat – www.apec.org contains information about APEC developments, issues and work programs, an APEC event calendar and links to key APEC websites. You can also follow us on social media:
